DIVISION OF CORPORATE REGULATION

U.S. SECURITIES & EXCHANGE COMMISSION

Dear Mr. President:

Sixteen years ago I began to work like a fool as a Broker-Dealer to try to build up a retirement income from clients re-invested dividends on which I got commission... I have done well... my family would have an income should I pass out of the picture... we saw to this by incorporating the family and by my wife studying for five years to pass the nasd Principal's Exam and my 24 yearold daughter did the same..... they were portected! I had a feeling of security for my family... BUT the SEC has come-out with REPORT 4766!

It takes away all this 16 years of hard labor and all of the intensive study my wife and daughter did! IF CONGRESS PASSES INTO LAW what the SEC is asking!

Can an APPOINTED BODY, one appointed by you, Mr. President, do THIS to me without your being able to stop them?

They also are cutting down my commission if this passes so that I will not be able to pay a salesman anything! And they would take away the money that brokers split with me when I go out and get money for them to buy stocks for the funds. Is NOT THE LABORER WORTHY OF HIS HIRE as the good book says, any more?

Please have some look into this thing that the SEC would do to my FAMILY!

Jim/j

Cordially,

*Jim Hammill Sr*
