UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

OFFICE OF
THE CHAIRMAN

May 6, 1988

The Honorable George Bush
President of the Senate
Washington, D.C. 20510

The Honorable Jim Wright
Speaker of the House
Washington, D.C. 20515

Gentlemen:

It is an honor to transmit the Fifty-Third Annual Report of the Securities and Exchange Commission for the fiscal year ended September 30, 1987.

The 1987 fiscal year was somewhat unusual because three different people chaired the Commission during the year. Former Chairman John Shad concluded his long and distinguished service at the Commission on June 18, 1987. Commissioner Charles C. Cox served admirably as Acting Chairman until I became Chairman on August 7, 1987.

During fiscal year 1987, the excellent work of the staff enabled the Commission to fulfill its statutory mission while meeting new challenges, in the headquarters and regional offices. Increased budgetary resources, requested from Congress for upcoming fiscal years, would enhance the Commission's ability to continue this high level of performance.

Statutory responsibilities of the Commission include enforcing the federal securities laws, ensuring complete and accurate disclosure regarding the issuer and its securities, overseeing stock exchanges and secondary market participants, regulating investment companies and investment advisers and engaging in appellate and other litigation. The Commission again successfully discharged these responsibilities during the fiscal year.

*Self-Regulatory Organizations

Enforcement: During the fiscal year, the Commission's enforcement program continued to be vigorous and comprehensive. Primary program areas are fraudulent securities offerings, violations of the securities laws by broker-dealers and other regulated entities, insider trading, and issuer financial disclosure. A total of 303 cases were brought during the year. The Commission obtained court orders requiring defendants to return illicit profits amounting to approximately $121 million. Disgorgement in insider trading cases alone amounted to $70.1 million, and civil penalties under the Insider Trading Sanctions Act amounted to $62.6 million.

Some of the most significant insider trading cases in the Commission's history were brought during the fiscal year. On November 14, 1986, the Commission instituted and settled a civil action against Ivan F. Boesky, an arbitrageur. As part of Boesky's settlement, he agreed to cooperate with law enforcement officials in continuing inquiries. The cooperation was significant in the Commission's strategic approach to law enforcement.

Full Disclosure: The full disclosure program is designed to provide investors with full and accurate material information, foster investor confidence, contribute to fair and orderly markets, facilitate capital formation, and inhibit fraud. Ongoing activities and special projects were carried out to accomplish the goals of the program.

Full reviews of disclosure filings increased during the fiscal year. Resources were devoted to new issuers, tender offer filings, and to annual meeting proxies. The latter category included over 2,000 proxies requesting shareholder approval for reducing director liabilities and broadening indemnification of corporate officers and directors as a result of new state corporate laws. New issues of securities and corporate acquisitions and restructurings were at high levels during the year.

Passage of the Tax Reform Act of 1986 required substantial staff resources for filings made to assure certain tax consequences. Innovative securities, such as private and public collateralized loan obligations, continued to proliferate. Also during the year, the Commission took action on a wide range of issues in rulemaking, interpretive, and legislative matters. Additionally staff prepared a chapter in the internationalization report.

Accounting and Auditing Matters: During the fiscal year, the Commission adopted rules that improve and simplify disclosures made by bank holding companies about loans to countries experiencing liquidity problems. It also amended its rules to delete certain requirements regarding disclosure of effects of inflation and changing prices. The Commission also issued proposed rules regarding peer review and increased disclosure of disagreements between accountants and clients. The staff also studied the draft proposals of the National Commission on Fraudulent Financial Reporting.

EDGAR: The Commission's pilot electronic disclosure system (known as "EDGAR" for Electronic Data Gathering, Analysis and Retrieval) successfully completed its third full year of operation, demonstrating the feasibility of electronic filing and review. Over 20,000 filings have been made since the pilot program began in September 1984. Filers include publicly-traded corporations, investment companies, and public utility holding companies. During the fiscal year, the Commission moved ahead with plans for an operational system and the Request for Proposals, amended to reflect changes in the funding strategy, was released on October 23, 1987. The Office of Edgar Management was created to direct the procurement and implementation of the EDGAR operational contract.

Regulation of the Securities Markets: During the fiscal year, on-going programs for oversight of the nation's securities markets and of market professionals were carried out, and progress was made on new challenges presented by the markets.

Oversight examinations of broker-dealers were enhanced with the addition of on-line computer systems to improve collection of data and with development of software programs for use in field examinations. The staff increased the emphasis placed on review of sales practices during the year in inspections of broker-dealers and of self-regulatory organizations. Also during the year, 500 new over-the-counter securities were designated as National Market System securities, and unlisted trading privileges were granted for 25 NMS securities to be traded on the Midwest Stock Exchange. In the area of clearance and settlement of securities, progress was made during the year. Specifically, mortgage-backed securities transactions settling in sameday funds, and mutual fund orders were added to the National Clearance and Settlement System, and immobilization of securities was encouraged during the year.

Issues associated with internationalization of the securities markets remained a high priority. The Commission approved certain linkages between exchanges and clearing agencies and granted certain exemptions to accommodate foreign market structures. The Commission held a roundtable discussion on internationalization issues associated with primary and secondary markets. These issues were also discussed in the Staff Report on Internationalization.

Market volatility remained a concern of the Commission throughout the fiscal year. The Commission took steps, in cooperation with the exchanges, to reduce volatility on so-called Expiration Fridays, and study of the results continued. Also during the fiscal year, the staff completed and published an intensive review and analysis of market events of September 11 and 12, 1987. Although that study did not find that immediate regulatory action was necessary, it expressed concern over a "cascade" scenario of certain sudden effects in the securities markets because of the close interplay and increased use of derivative products for index arbitrage and portfolio insurance.

Economic Research and Analysis: The economic staff provides the Commission with economic advice and analysis regarding rule proposals, policy matters, and the capital markets. It also engages in statistical monitoring of the securities industry. During the year, the staff reviewed 110 rules and rule proposals. It also provided advice to operating divisions regarding the requirements of the Regulatory Flexibility Act, reviewing 65 Regulatory Flexibility analyses and certifications. A major initiative during the year was the Staff Report on Internationalization. Also, staff prepared studies concerning: the effects of multiple trading of options; the use of repurchase agreements; trading and returns behavior of initial public offerings; alternative criteria for subjecting of issuers to the mandatory disclosure requirements; and effects of full cost accounting on oil and gas firms. Additionally, the staff prepared several studies regarding changes in corporate control. These included tender offer financing; dual-class recapitalizations; effects of defeating takeover attempts; market anticipation of takeovers; and the effects of the Ohio anti-takeover law. Other analyses were performed during the year regarding various aspects of mutual funds.

Litigation and Legal Activities: The Office of the General Counsel represented the Commission in 304 litigation matters. During the fiscal year, 36 federal court of appeals and Supreme Court cases were concluded, all but three favorably to the Commission. Of 16 appeals in Commission injunctive actions, six were concluded, with only one outcome

unfavorable to the Commission. There were also 23 appellate and district court actions seeking to overturn Commission orders. Ten were concluded, with one adverse result.

Also during the year, the Commission participated as *amicus curiae* in 46 cases, and entered its appearance in 32 of 94 reorganizations under Chapter 11. The General Counsel handled more than 217 other proceedings before the Commission or in the federal district courts, assisted the Commission in preparation of testimony on a number of important issues and on a legislative proposal to amend the Exchange Act to permit the Commission to regulate certain brokerage activities of banks. The General Counsel also assisted in preparation of the Staff Report on Internationalization.

Investment Companies and Advisers: The number of investment companies, investment advisers, and assets managed by them increased substantially during the fiscal year, while staff levels in the Division of Investment Management remained essentially unchanged. For the first time, the number of examinations completed by regional and headquarters staff during the fiscal year exceeded 2,000, almost double the number completed five years ago. Both regional and headquarters staff continued efforts to coordinate with state regulators by conducting joint examinations, providing training for state examiners, and routinely sharing examination results. Also during the year, substantial progress was made on a report requested by Congress regarding the financial planners industry. Among the areas discussed in the report is the National Association of Securities Dealers' pilot project to inspect investment advisers who are also NASD members.

Other initiatives undertaken by the staff during the year included work on legislative proposals, on the Staff Study on Internationalization, rulemaking and disclosure and administration of the Public Utility Holding Company Act.

Management and Program Support: During the fiscal year, management staff initiated 24 major projects, including reviews of information security and internal control objectives. Consistent with prudent management, internal audits were conducted of programs, activities and functions. Consumer affairs specialists responded to approximately 40,000 complaints and inquiries during the fiscal year, an 11 percent increase over the previous year. During fiscal year 1987, 1,908 Freedom of Information Act requests were processed, and 2,005 Congressional requests for records were fulfilled. Programs in support of Equal Employment Opportunity were carried out during the year, as were programs designed to enhance computerization. Also during the year, training programs emphasized computer literacy, leadership subjects related to equal employment opportunity, and other significant areas.

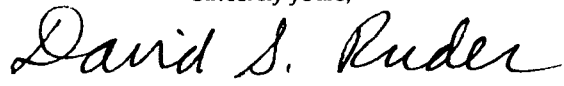
In November 1986, the Commission received the Outstanding Employer of the Year Award from the District of Columbia Rehabilitation Services Administration, recognizing efforts in hiring, training and retaining the handicapped.

Also during the year, the Commission testified before Congress 19 times regarding issues such as tender offers, insider trading, oversight and surveillance of the securities markets, federal government loan sales, the role of auditors in financial reporting, and the Commission's authorization and appropriation.

As the new fiscal year began on October 1, 1987, further regulatory challenges emerged. Periods of volatility in the securities markets continued to be of deep concern. Automation in the securities markets continued to bring farreaching changes. Speeded by automation,

internationalization of the markets continued at a rapid rate, presenting issues of policy for regulators around the world. Addressing these issues will be a high priority during the coming fiscal year.

Sincerely yours,



David S. Ruder
Chairman

Enforcement Program

Key 1987 Results

The Commission's 1987 enforcement program was both vigorous and comprehensive in nature. While the largest program areas continued to involve fraudulent securities offerings and violations by broker-dealers and other regulated entities, the Commission also brought record numbers of cases involving insider trading and issuer financial disclosure, areas which have received continuing emphasis. The Commission brought a total of 303 cases in fiscal year 1987. In fiscal 1986, it brought 312.

Total Enforcement Actions Initiated

	FY '83	FY '84	FY '85	FY '86	FY '87
Total	261	299	269	312	303
Civil Injunctive Actions	151	179	143	162	144
Administrative Proceedings	94	114	122	136	146
Civil And Criminal Contempt Proceedings	14	4	3	14	13
Reports of Investigation	2	2	1	0	0

In fiscal year 1987, the Commission obtained court orders requiring defendants to return illicit profits amounting to approximately $121 million, either as disgorgement or as restitution to defrauded investors or entities. Disgorgement orders in insider trading cases amounted to $70.1 million, compared to $29.7 million in 1986. Civil penalties under the Insider Trading Sanctions Act of 1984 (ITSA) amounted to $62.6 million.

The Commission referred matters, or granted access to its files, to the federal and state prosecutorial authorities in 150 cases. There were 72 criminal indictments or informations and 87 convictions obtained during fiscal year 1987 in Commission-related cases.

Introduction

The Commission's enforcement program seeks to preserve the integrity, efficiency and fairness of the securities markets by enforcing the federal securities laws. These laws provide civil and administrative remedies designed to rectify past violations and prevent future violations.

Most Commission enforcement actions are preceded by a private investigation to determine whether a violation of the securities laws has occurred or is about to occur. Where necessary, the Commission may order a formal investigation and thereby authorize the staff to issue subpoenas compelling testimony and the production of documents.

Depending on the results of an investigation, the Commission may authorize the staff to commence a civil action in a United States District Court, institute an administrative proceeding, or refer the matter to the Department of Justice for

criminal prosecution. Matters may also be referred to state or local authorities or self-regulatory organizations for appropriate action.

The Commission's primary civil remedy is a federal court injunction which directs the subject to comply with the law in the future. If an injunction is violated, contempt of court proceedings may result in imprisonment or the imposition of fines. Courts may also issue orders providing other equitable relief such as restitution, disgorgement of illicit profits, and other appropriate remedies. Those who commit insider trading violations may be subject to a penalty not to exceed three times the profit gained or loss avoided.

The Commission is authorized to bring administrative proceedings against regulated entities such as broker-dealers, investment companies, and investment advisers, as well as persons associated with such entities. Where the Commission finds that a regulated entity has willfully violated the securities laws, it may impose remedial sanctions ranging from a censure to revocation of the registration required for the entity to conduct business. The Commission also may censure or limit the activities of associated persons, or suspend or bar such persons from association.

Issuers of securities are subject to administrative proceedings if they fail to comply with the disclosure, proxy and tender offer provisions of the Securities Exchange Act of 1934 (Exchange Act). Individuals causing such failures may also be named as respondents in such proceedings. Respondents may be ordered to comply with applicable provisions of the securities laws upon specified terms and conditions, or to take steps to effect compliance.

Issuers may also be named as respondents in certain proceedings authorized by the Securities Act of 1933 (Securities Act). In addition, the Commission may publish reports of investigation under Section 21(a) of the Exchange Act.

Criminal sanctions for federal securities law violations include fines and imprisonment for up to five years for each violation. The Commission has developed close working relationships with the Department of Justice and U.S. Attorneys' Offices to assist in the investigation and prosecution of such cases. The Commission also cooperates closely with state securities regulators and self-regulatory organizations, including the National Association of Securities Dealers (NASD) and the various national securities exchanges.

Program Areas

The Commission investigates and brings enforcement actions to remedy a broad range of violations. Classified by primary violation, enforcement activity during fiscal year 1987 included (1) cases concerning corporate reporting and accounting, (2) insider trading, (3) violations by regulated entities and associated persons, (4) market manipulation, (5) securities offerings, (6) changes in corporate control, (7) related party transactions, (8) fraud against regulated entities, (9) civil and criminal contempt actions, and (10) delinquent filing cases against both issuers and individuals. (See Table 33 for a listing of all enforcement actions instituted in fiscal year 1987).

Corporate Reporting and Accounting— Financial disclosure cases continued to be a high priority in fiscal year 1987. The Commission brought 61 cases containing

significant allegations of financial disclosure violations against issuers, regulated entities or their employees (including 18 actions in which financial disclosure violations were alleged in addition to other primary violations), compared with 35 such cases in 1986.[1] The Commission also brought 11 cases alleging misconduct on the part of accounting firms or their partners or employees in fiscal year 1987, including two of the issuer disclosure cases set forth above.[2] There were 15 enforcement actions against accountants or accounting firms in 1986.

Typical financial disclosure cases involve the improper valuation of assets or liabilities; the improper recognition of revenue or income; the failure to establish sufficient provisions for bad debts or other contingencies; or the failure to provide adequate disclosure concerning the issuer's financial condition. Many cases also involve violations of the accounting provisions of the Foreign Corrupt Practices Act. Financial disclosure cases are often complex and require more resources than other types of cases, but their effective prosecution is essential to preserving the integrity of the disclosure system.

The Commission brought several enforcement actions this fiscal year concerning the adequacy of financial disclosures made by financial institutions. On September 21, 1987, the Commission instituted an injunctive proceeding, *SEC v. Financial Corporation of America (FCA),*[3] in which it alleged that the holding company for a major savings and loan institution violated the reporting, books and records, and internal controls provisions of the federal securities laws. The complaint alleged, among other things, that FCA improperly and prematurely recognized income from certain real estate transactions, referred to as "buy/sell" transactions, which were designed to conceal FCA's involvement in the transactions and its continuing financial exposure relative to the underlying real estate, causing improper recognition of income of approximately $13.3 million in one year, and $7 million in the next. The Commission also alleged that FCA failed to maintain adequate reserves to cover losses in its loan and real estate portfolio, due to, among other things, a decline in underwriting standards that led to an increased volume of substandard loan assets. It also alleged that FCA improperly recognized income from certain acquisition, development and construction loans. FCA consented to the entry of a permanent injunction and to certain reviews, to be performed by its independent accountants.

On February 27, 1987, the Commission instituted an administrative proceeding, *In the Matter of Continental Illinois Corporation,*[4] against the holding company of Continental Illinois National Bank and Trust Co. of Chicago, one of the largest banks in the United States. The Commission alleged that Continental mischaracterized a substantial portion of the loan loss provision reported in its Form 10-Q for the second quarter of 1984.

Continental characterized $425 million of the nearly $1 billion provision as "loss on sale of loans subject to FDIC agreement." Continental did not disclose, however, that the Office of the Comptroller had directed a $950 million provision for Continental to provide for credit losses in Continental's portfolio prior to the loan sale. The Commission determined that it was materially misleading for Continental to attribute the $425 million, which was clearly part of the $950 million provision, to the event of the sale. Continental consented to a Commission order directing it, among other things, to comply with various provisions of the Exchange Act, and to

restate its financial statements to properly characterize the $425 million provision.

On August 17, 1987, the Commission instituted an administrative proceeding, *In the Matter of Texas Commerce Bancshares, Inc. (TCB),*[5] in which it found that TCB, a bank holding company, failed to have in place an adequate loan loss review system, and that as a result, the consolidated loan loss reserve for TCB, as of December 31, 1984, was understated by $28.2 million.

The Commission pointed out four factors which played key roles in creating the system's inadequacy: (1) substantial growth in TCB's aggregate loan portfolio through the relevant period; (2) TCB's failure to adapt its loan review system to the increased loan level; (3) TCB's failure to give sufficient emphasis to an ongoing assessment of the loan portfolio; and (4) TCB's reliance on loan officers (rather than on a separate loan review function) to identify problem loans on a continuing basis.

TCB consented to the issuance of an order requiring it to comply with the reporting, books and records, and internal controls provisions of the Exchange Act, and to comply with certain undertakings.

On August 10, 1987, the Commission instituted administrative proceedings, *In the Matter of DeLaurentiis Entertainment Group, Inc. (DEG),*[6] in which it found that DEG, a company engaged in the financing, production and distribution of motion pictures, violated the books and records and internal control provisions of the Exchange Act. The Commission found that DEG incorrectly capitalized approximately $1.5 million in interest costs that should have been expensed, and at the same time expensed an approximately equivalent amount of selling, general and administrative costs, and other costs, which should have been capitalized as production costs.

It also found that DEG's books and records and system of internal controls failed to adequately reflect such transactions, and led to the serious compromise of the accuracy of DEG's financial statements. DEG consented to the Commission's order which required it to comply with the books and records and internal control provisions of the Exchange Act and to comply with its undertakings to put in place certain remedial procedures.

Included in Commission enforcement actions against independent accountants who examine and issue opinions on an issuer's financial statements is *SEC v. Grant Thornton, et al.,*[7] an injunctive action which was filed on October 16, 1986. The Commission alleged that Grant Thornton (formerly Alexander Grant & Co.) violated the antifraud provisions of the federal securities laws in connection with the issuance of audit reports based on its examination of the financial statements of ESM Government Securities, Inc. (ESM), a broker-dealer principally engaged in government securities repurchase transactions. The Commission alleged that the audits were not conducted in accordance with Generally Accepted Auditing Standards (GAAS), and that the financial statements were not prepared in accordance with Generally Accepted Accounting Principles (GAAP).

The Commission alleged that many of the audit deficiencies stemmed from Grant Thornton's failure to understand the nature of the business of ESM. The complaint also alleged one of the individual defendants, a partner at the firm, became aware that Jose L. Gomez, the partner with primary responsibility for ESM, had taken money from ESM principals, thereby compromising his independence. The defendants consented to the entry of permanent injunctions.

On March 25, 1987, the Commission brought an administrative proceeding, pursuant to Rule 2(e) of its Rules of Practice, against KMG Main Hurdman,[8] a firm of certified public accountants, alleging that Main Hurdman engaged in improper professional conduct in connection with the audits of the First National Bank of Midland, Texas (FNBM), and of Time Energy Systems, Inc. In the case of FNBM, the Commission alleged that a sale and leaseback of the bank's principal properties was not recorded in accordance with GAAP and was structured to allow the reporting of a profit in 1982. The Time Energy financial statements allegedly violated GAAP by prematurely recording incentive and management fees from research and development contracts entered into with various limited partnerships with which it conducted business.

Main Hurdman consented to the entry of a Commission order in which it was censured and ordered to comply with certain undertakings, including undergoing an augmented peer review and documenting certain internal consultations on auditing questions.

The Commission brought five cases primarily involving the misrepresentation of or failure to disclose information concerning related party transactions, the compensation of officers, or other matters during fiscal year 1987. The Commission also brought 23 delinquent filing actions during the fiscal year, compared with 18 in 1986.

Insider Trading—Insider trading refers generally to the act of purchasing or selling securities in breach of a fiduciary duty or a relationship of trust or confidence, while in possession of material nonpublic information about an issuer or the trading market for an issuer's securities. The federal securities laws prohibit such trading not only by corporate officers and directors and other persons having a relationship of trust or confidence with the issuer or its shareholders, but also by persons who misappropriate material nonpublic information from sources other than the issuer. The tippees of any such person may also be subject to the prohibition.

The Commission's insider trading enforcement program achieved record results in fiscal year 1987. The Commission brought 36 cases in which insider trading was the primary violation alleged, including several of the most significant insider trading cases ever brought by the Commission. Insider trading violations were also alleged in an additional six cases, which were primarily financial disclosure cases.[9]

On November 14, 1986, the Commission instituted the largest insider trading case in its history against arbitrageur Ivan F. Boesky.[10] The Commission alleged that Boesky caused certain affiliated entities to trade in securities while in possession of material nonpublic information concerning tender offers, mergers, and other extraordinary corporate transactions. Boesky was alleged to have obtained this information from investment banker Dennis B. Levine, who previously had been enjoined in a Commission action brought in May 1986.

As part of a settlement of that action, Boesky consented to the entry of an order of permanent injunction. He paid $50 million in cash as disgorgement of profits obtained by his affiliated entities as a result of the illegal insider trading, and paid a penalty consisting of securities which had an estimated aggregate value of $50 million. Boesky also consented to the entry of an administrative order permanently

barring him from the securities industry.[11] Additionally he pleaded guilty to a federal felony charge of conspiracy to make false filings with the Commission. Boesky thereafter cooperated with the Commission in its continuing investigation, which resulted in several additional significant cases during fiscal year 1987.

On February 13, 1987, in *SEC v. Martin A. Siegel,*[12] the Commission filed an injunctive action against an investment banker, alleging that he disclosed to Boesky material nonpublic information which he obtained by virtue of his employment. Siegel allegedly disclosed the information to Boesky under circumstances in which Siegel knew that Boesky would cause certain affiliated entities to trade while in possession of the information. Siegel allegedly received approximately $700,000 from Boesky in return for the information.

Siegel consented to the entry of a permanent injunction and agreed to disgorge cash or cash equivalents in the amount of approximately $4.25 million. Siegel also agreed to disgorge his ownership interest in securities of the investment banking firm which employed him at the time of the action and in partnerships sponsored by that firm or its subsidiaries. Siegel also consented to the entry of an order barring him from the securities industry,[13] and pleaded guilty to two felony charges arising out of insider trading violations.

On June 4, 1987, the Commission instituted an injunctive action against Kidder Peabody & Co., Inc.,[14] alleging that it traded securities while in possession of material nonpublic information. The information was allegedly disclosed to Kidder through Siegel, who was then a senior mergers and acquisitions professional at Kidder, by an arbitrageur at an investment bank.

At the time, Siegel was also involved in risk arbitrage activities at Kidder. The Commission alleged that the Kidder risk arbitrage account purchased and sold securities and options based on information provided relating to tender offers, mergers, leveraged buyouts and other business combinations or extraordinary corporate transactions.

The complaint also alleged, as a separate matter, that Kidder illegally "parked" securities on behalf of entities controlled by Boesky, by holding securities transferred from Seemala Corporation, a broker-dealer controlled by Boesky, subject to an agreement that Seemala would repurchase the securities shortly thereafter, and would bear responsibility for all profits and losses from the transactions. Such transfers, among others, enabled Seemala to conceal its inability to maintain the minimum net capital required of broker-dealers by the Commission.

Kidder consented to an injunction and was ordered to pay a total of $25,294,775. Total disgorgement equaled $13,676,101. The remaining $11,618,674 represented a double ITSA penalty.

In a separate administrative proceeding,[15] the Commission censured Kidder and ordered the firm to comply with its undertakings to retain a consultant to review its policies and procedures. Kidder further consented not to resume previously terminated risk arbitrage trading activities before adopting the procedures recommended by the consultant and special compliance procedures pertaining to risk arbitrage trading. Kidder also agreed to cooperate with the Commission's continuing investigation of these matters.

The Commission's continuing investigation has also led to the filing of several cases involving securities law violations other than insider trading. In *SEC v. Boyd*

L. Jefferies, et al.,[16] for example, the Commission alleged that the defendants violated the securities laws by engaging in market manipulation and in the the "parking" of securities.

Among other things, the Commission's complaint alleged that Boyd L. Jefferies, then owner of Jefferies & Co., a broker-dealer, entered into an agreement with Boesky to "park" stock on behalf of Seemala Corporation. The Commission further alleged that securities parked at Jefferies & Co. dropped substantially in value, leaving Jefferies & Co. with an approximate $3.6 million loss when it "sold" the securities back to Seemala. Boesky then paid Jefferies & Co. $3 million pursuant to a false invoice created by Jefferies & Co. for purported "investment advisory and corporate financial services" rendered. The complaint also alleged that Jefferies & Co. parked its own securities at various Boesky entities, including Seemala, under a similar arrangement. Each of the defendants consented to the entry of a permanent injunction and agreed to cooperate with the Commission in its continuing investigation.

In a related administrative proceeding,[17] Jefferies consented to an order barring him from the securities industry, with a proviso that Jefferies may apply for re-entry into the securities industry after the greater of five years or the period of any penalty imposed on him in connection with criminal proceedings. Jefferies & Co. agreed to a censure and was ordered by the Commission to comply with its undertakings to, among other things, retain an outside consultant and implement recommendations made by that consultant concerning policies and procedures designed to prevent future violations of the securities laws. On April 15, 1987, Jefferies pleaded guilty to two felony charges arising out of the activities which led to the Commission's actions.

In fiscal year 1987, the Commission also brought a number of significant insider trading cases which were not related to the Levine and Boesky investigations.

On December 10, 1986, the Commission filed an action against Michael N. David,[18] formerly an associate with a law firm, alleging that he misappropriated material nonpublic information from the law firm concerning proposed or considered corporate takeovers. David allegedly conveyed the information to persons who traded in the securities of the takeover targets for their own accounts or for an account in which David had a beneficial interest. Those persons also allegedly conveyed the information to others who also traded in the securities of the takeover targets. David consented to the entry of a permanent injunction against future violations, and agreed to disgorge $50,000 and pay a civil penalty not to exceed $100,000.

The Commission's investigation of the insider trading scheme in which David was involved also led to criminal indictments against David and four others for their participation in the scheme. David pleaded guilty to charges against him.

On February 17, 1987, the Commission instituted an action against Israel G. Grossman,[19] a former associate at a law firm, and six others for trading while in possession of material nonpublic information allegedly misappropriated by Grossman from the law firm. The Commission alleged that Grossman misappropriated information concerning a recapitalization of a client, and passed that information on to the other defendants. Those defendants allegedly traded while in possession of the information, realizing illegal profits of approximately $1.5 million. In

supporting papers filed in the action, the Commission alleged that the defendants attempted to conceal their activities from the Commission by fabricating a story concerning the reasons for their trading. At the close of the fiscal year, the case was pending against all seven defendants.

Grossman has been convicted of criminal violations arising out of the insider trading scheme.

On March 11, 1987, the Commission filed *SEC v. Nahum Vaskevitch,*[20] against a former managing director in charge of mergers and acquisitions in the London office of a United States broker-dealer, David Sofer, a businessman, and two entities. The Commission alleged that Vaskevitch provided Sofer with material nonpublic information obtained during the course of his employment concerning mergers, tender offers, and other extraordinary corporate transactions. Sofer allegedly traded while in possession of the information through accounts in the names of the two entities. The defendants allegedly realized over $4 million in illegal profits as a result of the scheme.

On March 30, 1987, an order was entered against the defendants preliminarily enjoining them from future violations of the antifraud provisions of the securities laws, and orders were entered freezing assets, providing for an accounting, and preventing alteration or destruction of documents. At the end of the fiscal year, the case was still in litigation.

Regulated Entities and Associated Persons—The enforcement program area that accounts for the largest number of cases involves regulated entities such as broker-dealers, investment companies, investment advisers and transfer agents.

Ensuring that regulated entities conduct their business with integrity and fairness is a consistent priority with the Commission. The Commission commenced 117 enforcement proceedings involving regulated entities during fiscal year 1987. Seventeen of these cases involved securities offerings violations by regulated entities. Of the other cases, 75 were brought against broker-dealers or persons associated with broker-dealers, 18 primarily involved investment advisers, and six primarily involved investment companies.

Broker-dealer cases generally involve violations such as fraudulent sales practices, violations of the net capital and customer protection provisions, or broker-dealer books and records violations. On June 15, 1987, the Commission instituted a proceeding, in which it found that Shearson Lehman Brothers, Inc.,[21] a broker-dealer, on multiple occasions improperly used customers' securities for stock loans. In violation of the customer protection provisions of the Exchange Act, the securities were delivered out of safekeeping before receipt of anticipated deliveries of equivalent securities had been verified. In the largest such transaction, the broker-dealer improperly used customer's securities worth $69 million. Shearson Lehman consented to a Commission order censuring it and ordering it to comply with its undertakings to implement procedures and establish policies to prevent a recurrence of the violations.

The Commission's financial recordkeeping and reporting provisions require broker-dealers subject to the Currency and Foreign Transaction Reporting Act of 1970 to report currency deposits in excess of $10,000. On February 27, 1987, the Commission filed an administrative proceeding, in which it found that Dean Witter

Reynolds, Inc. failed to file such reports in repeated instances.[22] Dean Witter, by consent, was censured and ordered to comply with its undertakings to implement procedures designed to correct its reporting deficiencies, and to have its compliance with such procedures reviewed by an independent public accountant.

In January 1987, the Commission instituted administrative proceedings, *In the Matter of Advest, Inc.*,[23] concerning alleged customer overcharges for mutual fund sales commissions. The broker-dealer revised its compliance procedures and refunded to customers over $600,000 after the Commission staff notified it of the problem. The broker-dealer consented to a Commission order finding that it had failed to ensure against such overcharges and censuring it for having failed reasonably to supervise its registered representatives to prevent such overcharges. At the end of the fiscal year the case remained pending against other respondents.

During fiscal year 1987, the Commission revoked the registration of 11 firms, suspended 18 and censured 15. This compares with seven revocations, eight suspensions, and 15 censures in fiscal year 1986. Also during the fiscal year 79 individuals were barred, 26 suspended, and three censured, as compared to 58 bars, 20 suspensions, and 11 censures in 1986.

Securities Offering Violations—Some issuers fail to register public offerings of their securities, although required to do so by the Securities Act. Some purport to rely on exemptions to registration requirements which are not available. Some violate antifraud provisions of the federal securities laws by making material misrepresentations or omissions in connection with a securities offering. There were 40 cases principally involving offering violations by issuers and other persons brought during fiscal year 1987. (This figure does not include 17 cases principally involving offering violations on the part of regulated entities, which are discussed above).

This past fiscal year, the Commission instituted a series of proceedings concerning so-called "blank-check" offerings, registered offerings in which the proposed use of proceeds has not been disclosed. Such offerings have been the subject of abuse by promoters and entrepreneurs in various parts of the country, who have used them in connection with a variety of schemes. For example, on February 13, 1987, the Commission filed an injunctive action alleging that Steven A. Keyser,[24] former president of L'Oiseau Bleu Corporation which had a registered offering in November 1985 for the stated purpose of engaging "in the acquisition of business endeavors in one or more industries", diverted almost all of the offering proceeds to his own use. The case was pending at the end of the fiscal year.

On June 2, 1987, the Commission suspended the Regulation A exemption from the registration requirements of the Securities Act of Gin Enterprises, Inc., based on, among other things, the failure to disclose the involvement of the conflict of interest of George L. Norman, the promoter of the offering, who was also an affiliate and promoter of 18 other blank-check offerings.[25]

In a separate proceeding, the Commission instituted administrative proceedings pursuant to Rule 2(e) of the Commission's Rules of Practice against Myron E. Berryman,[26] auditor of the financial statements of the registration statements or offering circulars filed for each of the 18 public offerings. Citing identical deficiencies in each of the 18 audit reports, the Commission concluded that the auditor failed to obtain sufficient evidence to provide a reasonable basis for the reports, and that

such failure to comply with GAAS constituted improper professional conduct. Berryman consented to the issuance of a Commission order permanently suspending him from appearing before the Commission, but providing that after two years he may apply to resume appearing before the Commission upon fulfilling certain conditions.

On March 31, 1987, the Commission instituted an injunctive action against Charles Phillip Elliott and others involved in the operation of an alleged unregistered broker-dealer.[27] The complaint alleged that the defendants obtained at least $50 million from at least 1000 investors through the sale of unregistered debt securities, and that they failed to disclose, among other things, that securities purportedly pledged as collateral for the investments were routinely rehypothecated. Elliot and the various entities through which he operated consented to the entry of a permanent injunction, to an accounting of proceeds received, and to disgorgement of an amount to be determined by the court at a later date. A temporary restraining order was entered by the court against the two remaining defendants.

Market Manipulation—The Commission is charged with ensuring the integrity of trading on the national securities exchanges and in the over-the-counter markets. The Commission staff, the exchanges and the NASD engage in surveillance of these markets. The Commission brought 12 cases primarily involving market manipulation during fiscal year 1987, compared with 14 in 1986. One of these cases was *SEC v. Boyd L. Jefferies, et al.,* discussed above.

On April 9, 1987, the Commission filed an action, *SEC v. Andrew Nanos, et al.,*[28] in which it alleged that the six defendants violated the antifraud and the beneficial ownership provisions of the federal securities laws. The Commission alleged, among other things, that the defendants manipulated the market in a stock which had been the subject of a negative news article by placing purchase orders for the stock with numerous broker-dealers in order to prevent a price decrease. The case was pending at the close of the fiscal year.

Changes in Corporate Control—Section 13 and 14 of the Exchange Act govern proxy solicitations and the filing of reports by persons or groups who make a tender offer or acquire beneficial ownership of more than five percent of a class of equity securities registered with the Commission. These requirements are intended to ensure that investors have the material information needed to make informed investment or voting decisions concerning potential changes in the control of a corporation. During fiscal year 1987, the Commission brought four enforcement actions which were primarily corporate control cases, compared to six in 1986 .

On July 22, 1987, the Commission issued an order in an administrative proceeding, finding that Allied Stores Corporation[29] violated the tender offer solicitation provisions of the Exchange Act by failing properly to disclose steps taken by Allied in response to a tender offer, including adoption of a resolution by Allied's board of directors directing management to execute a merger agreement with a third party. Allied consented to the entry of the Commission order to comply with such provisions in the future.

The administrative proceeding was pending at fiscal year end against the attorney for Allied Stores, who was named as a respondent. .

Sources for Further Inquiry—The Commission publishes in the SEC Docket litigation releases which describe its civil injunctive actions and criminal proceedings involving securities-related violations. Among other things, these releases report the identity of the defendants, the nature of the alleged violative conduct, and the disposition or status of the case. Commission orders that institute administrative proceedings or provide remedial relief also are published in the SEC Docket.

Full Disclosure System

Key 1987 Results

The full disclosure system is administered by the Division of Corporation Finance. The disclosure system is designed to provide investors with full and accurate material information, foster investor confidence, contribute to the maintenance of fair and orderly markets, facilitate capital formation, and inhibit fraud in the public trading, voting, purchase, and sale of securities.

Administration of the full disclosure program was affected by a number of legal and economic developments in fiscal year 1987. The passage of the Tax Reform Act of 1986 on October 22, 1986, required the dedication of substantial staff resources in the first quarter of the year to accommodate the large number of filings made on an accelerated time schedule to assure certain tax consequences. The 1986-87 proxy season in the second and third quarters was characterized by over two thousand issuers that sought shareholder approval of the implementation of new state corporate law provisions allowing for reducing director liabilities and broadening indemnification of corporate officers and directors. The new issue market continued to flourish, with registration statements for initial public offerings under the Securities Act of 1933 (Securities Act) approximating fiscal year 1986's high. Approximately 43 percent of the regionally filed registration statements filed in fiscal year 1987 covered blank check offerings.

Corporate acquisitions and restructurings were also at high levels. In fiscal year 1987, 215 third party tender offers with a value of $85.5 billion were commenced, representing a 47 percent increase over 146 offers with a value of $54 billion in fiscal year 1986. In view of the increasing complexity and multiplicity of accounting issues arising in the filing review process, the Division hired 30 accountants during the year. This effort is part of the Division's on-going program to have at least 50 percent of its review staff comprised of accountants.

The active acquisition market was evidenced in the 328 merger proxy filings and the 209 going-private transactions filed during the year. That market was also characterized by an increasing use of bridge loans financed by investment banking firms and high-yield debt securities (junk bonds). Proxy contests, which decreased substantially for most of fiscal year 1987, increased during the last quarter to bring the year end total to nearly the same level as fiscal year 1986. Asset-backed financings continued to increase, including those backed by credit card receivables, automobile loans, residential mortgage obligations, commercial mortgage leases, Mack Truck loans, and loans made by the Federal Farmers Home Administration. New instruments continued to proliferate with offerings of reverse principal exchange-rate linked securities (PERLS), liquid yield option notes (LYONS), and currency exchange warrants (CEWS) being filed.

In legislative, rulemaking and interpretive matters, the Commission took action on a wide range of issues. The Commission adopted a rule that eliminates the need to file most pricing amendments to Securities Act registration statements. In the

tender offer area, the Commission proposed for comment rules to govern "market sweeps" and in an interpretive release, reiterated its view that material changes in the terms of a tender offer must be disseminated in a manner that gives security holders sufficient time to consider and act on the new information. The Commission also proposed to eliminate the requirement to file proxy statements in preliminary form where the shareholders at an annual meeting will consider only the election of directors, selection of auditors and certain shareholder proposals.

Amendments to modernize the Trust Indenture Act were recommended for submission to the Congress.

Full Disclosure Filings Given a Full Review

	FY 1983	FY 1984	FY 1985	FY 1986	FY 1987

° Excludes reviews of certain amendments to post-effective registration statements filed in response to staff comments on a prior post-effective filing.

* Includes reports reviewed in connection with other filings.

In fiscal year 1987, 82,883 full disclosure filings were made with the Commission, an increase of 8 percent over fiscal year 1986. The number of registration statements filed under the Securities Act increased to 7,708 from 7,358 filings in fiscal year 1986. This includes 2,233 and 2,182 filings, respectively, by issuers who had not previously offered securities to the public.

During fiscal year 1987, the staff fully reviewed financial statements of 3,865 registrants. This was accomplished through the full review of, among other things, 1,949 and 187 registration statements filed by new issuers under the Securities Act and the Securities Exchange Act of 1934 (Exchange Act), respectively; 775 registration statements filed under the Securities Act by issuers with existing public security holders; 1,389 annual reports filed by issuers under the Exchange Act; and full financial statement reviews of 60 issuers. The staff also fully reviewed annual meeting proxy statements of 3,046 issuers, and 65 proxy contest filings. The substantial increase in reviews of annual meeting proxy statements from the fiscal year 1986 level (1,629) was due primarily to issuers adopting new officer and director liability and indemnification provisions provided for under state law. During the year, 248 merger proxies and 215 third-party tender offer and 209 going private transactions were reviewed.

Rulemaking, Interpretive, and Legislative Matters

Pricing Amendments

On May 27, 1987, the Commission adopted new Rule 430A under the Securities Act,[30] which was proposed earlier in the year. The rule allows registrants, under specified conditions, to omit information on the public offering price, other matters dependent upon the public offering price, terms of the securities dependent upon the offering date, and the underwriting syndicate from the form of prospectus filed as part of a registration statement that is declared effective. Rule 430A requires that the omitted information be contained in a prospectus filed within a specified time frame or in a post-effective amendment. Also adopted were amendments to the filing rules for prospectuses used after effectiveness, which eliminate unnecessary filings, classify prospectuses according to the nature of the information being added or modified, and shorten the filing period.

Tender Offers

On October 1, 1987, the Commission published for comment proposed rules that would govern certain acquisitions undertaken during and shortly after a conventional tender offer for securities of the same class and related activities.[31] With certain exceptions the proposed rules would require that purchases, offers to purchase, arrangements or understandings to purchase and solicitations of offers to sell securities undertaken during and shortly after a tender offer that would increase any person's ownership of the class of securities subject to the tender offer by 10 percent or more of the class be made in compliance with the statutory provisions and rules applicable to tender offers.

The Commission issued an interpretive release on April 3, 1987, with respect to the disclosure and dissemination of material changes in the terms of tender offers.[32] The Commission expressed its view that a waiver of a minimum share condition is a material change in the terms of the offer and reiterated its view that material changes must be disseminated in a manner reasonably calculated to inform security holders of such changes and within sufficient time for them to consider and act on such new information, generally a minimum of five to ten business days.

Proxy Rules

On June 4, 1987, the Commission published for comment a proposal to eliminate the requirement to file proxy or information statements in preliminary form where the only matters to be considered at an annual shareholder meeting are the election of directors, selection of auditors and/or certain shareholder proposals.[33] The Commission also proposed certain amendments to the shareholder proposal rule, including the deletion or modification of the provision for exclusion of a shareholder proposal where a proponent delivers written proxy materials to holders of more than 25% of a class of the registrant's securities.

On May 21, 1987, the Commission adopted amendments, proposed earlier in the year, to its proxy rules and certain other rules. The amendments conformed further the proxy disclosure for mergers and similar transactions to that required

for registration of securities in certain business combinations. They also clarified the timing requirements for such transactions where incorporation by reference is used.[34] The Commission also adopted a rule concerning modified or superseded statements in documents incorporated by reference into a proxy statement.

Shareholder Communications

On March 27, 1987, and June 18, 1987, the Commission published for comment proposals that would exclude, on an optional or mandatory basis, specified employee benefit plan participants from the operation of the proxy processing and/or direct communications provisions of the shareholder communications rules.[35] Under these alternative proposals, an employee benefit plan participant would not receive proxy material through brokers and banks in accordance with the proxy processing provisions of the shareholder communications rules where (1) the plan provides a mechanism for forwarding such materials to plan participants; or (2) the registrant has access to participant names and addresses and is not prohibited from communicating with them, with the registrant required to cause proxy material to be furnished to plan participants. The alternative proposals also provide for exclusion of plan participants from the direct communications provisions if the registrant otherwise has access to the names and addresses of such beneficial owners.

Prospectus Delivery Requirements

On December 18, 1986, the Commission published for comment alternative proposals to reduce the 40 or 90 day period during which dealers must deliver prospectuses in aftermarket securities transactions following public offerings.[36] Both of the proposals would provide relief, under certain circumstances, with respect to aftermarket transactions in the securities of issuers not subject to the periodic reporting requirements under the Exchange Act prior to filing their registration statements.

On July 31, 1987, the Commission published for comment two alternative proposals for a new Rule 433 concerning the timing of delivery to investors of a prospectus meeting the requirements of Section 10(a) of the Securities Act.[37] The proposals would permit, if all conditions are satisfied, the sending of a final prospectus no later than five business days after a confirmation of sale is sent to a purchaser in a registered firm commitment offering of securities for cash.

Exempt Private Offerings

On January 2, 1987,[38] the Commission published for comment proposed amendments to Regulation D and Rule 215 and solicited comments on other possible revisions of Regulation D, including the application of a good faith compliance standard. The Regulation D amendments, as proposed, would (1) expand the accredited investor definition under Rule 501, (2) raise the offering ceiling and expand the availability of general solicitation under Rule 504, and (3) make certain technical amendments to Regulation D in an effort to clarify the rules of the regulation and to codify certain staff interpretations under the regulation.

Employee Benefit Plans

On January 2, 1987, the Commission proposed new Rules 701, 702 and 703, which would provide an exemption from the registration requirements of the Securities Act for limited offers and sales of securities in connection with compensatory employee benefit plans by issuers not subject to Exchange Act reporting requirements.[39] As a result of public comments on the proposal, the rules were revised and reproposed in August 1987.[40]

Management's Discussion and Analysis

The Commission published a concept release on April 17, 1987, discussing the disclosure required by Management's Discussion and Analysis and requesting public comment on the adequacy of these requirements.[41] The Commission specifically requested comment on recent recommendations by several accounting firms that Management's Discussion and Analysis contain more risk disclosure and be subject to audit.[42] The Commission is reviewing comments made in response to this release to determine whether any rulemaking is appropriate.

Classification of Issuers

A concept release was issued by the Commission on July 8, 1986,[43] requesting information and suggestions from the public concerning possible substitute or supplementary threshold criteria governing entry into and exit from the Exchange Act reporting requirements. In addition, a study was commissioned on the effect of those requirements on small businesses. The study, which is being conducted by The SEC and the Financial Reporting Institute of the University of Southern California, is expected to be completed and a final report issued in fiscal year 1988.

Publication of No-Action and Interpretive Letters

On September 22, 1987, the Commission published for comment a proposal that, with certain exceptions, would provide for the expedited publication of interpretive and no-action correspondence at the time a response is sent or given to the requesting party, unless temporary confidential treatment is granted.[44] The Commission also proposed to codify the application of the existing publication rule to certain exemption letters.

Trust Indenture Legislative Proposal

On November 30, 1987, the Commission submitted its recommendations for amendment of the Trust Indenture Act to Congress. If enacted, the proposed bill, entitled the Trust Indenture Reform Act of 1987, will comprehensively modernize federal regulation of publicly-offered debt securities. Under the proposed bill, mandatory indenture terms would be self-executing and imposed by law, a measure that will simplify preparation of indentures. Conflicts of interest would be relevant to a trustee's eligibility only after default. The proposal would also broaden the Commission's exemptive authority to allow variation from the statute in appropriate circumstances and would conditionally allow foreign trusteeships.

Internationalization

On July 29, 1987, the staff sent to Congress a report on the internationalization of the securities market. The report included a chapter prepared by the Division on the disclosure and distribution standards in multinational and international issues of securities. The chapter included a descriptive analysis of the international financial markets and the effects of regulation on these markets. An overview of United States distribution and disclosure practices that affect foreign issuers, and the disclosure, distribution, and tender offer practices in several nations other than the United States were also discussed. The discussion concluded with an evaluation of the major issues and problems raised by international offerings.

Conferences

SEC Government-Business Forum on Small Business Capital Formation

The sixth annual SEC Government-Business Forum on Small Business Capital Formation was held in Washington, D.C. on September 14-15, 1987. Approximately 150 small business executives, accountants, attorneys, government officials and other small business representatives were in attendance. The format of this year's conference was structured around a series of lectures and discussion groups on federal, state and local equity financing programs and other more traditional equity financing techniques such as venture capital, securities offerings and employee stock option plans. The final report on the conference, which is issued to Congress and available to the public, will be presented this year in an informational-type pamphlet rather than setting forth a list of recommendations for legislative and regulatory changes in the area of small business capital formation which has been the basis for the final reports for most of the previous forums.

SEC/NASAA Conference under Section 19(c) of the Securities Act

In April 1987, approximately 35 senior staff officials of the Commission met with representatives of the North American Securities Administrators Association Inc. in Baltimore, Maryland, to discuss methods of effectuating greater uniformity in federal and state securities matters. Following the conference, the staff issued a final report that described two resolutions that were approved, summarized the discussions of the working groups, and identified conference participants.

Accounting and Auditing Matters

Key 1987 Results

The federal securities laws provide for the audit of financial statements of publicly held corporations by independent accountants. Thus, those laws have placed upon the accountant important responsibilities in facilitating the capital formation processes, and as a result, the economy as a whole.

Today, the accounting profession is subject to a unique combination of public and private sector initiatives that is designed to ensure that the profession meets its public responsibilities. These initiatives include peer review and other membership requirements of the American Institute of Certified Public Accountants' (AICPA) Division for CPA Firms, private sector standards-setting, the Commission's programs (including oversight of private sector initiatives), state licensing activities and private civil litigation against accounting firms. This framework has been built over time and is subject to continued refinements and improvements.

The primary Commission programs for ensuring compliance with the accounting and financial disclosure aspects of federal securities laws are:

- *Rulemaking* initiatives which supplement accounting standards, implement financial disclosures and establish independence criteria for accountants;
- The *review and comment process* which results in improvement of filings, identification of emerging accounting issues (which can result in rulemaking or private sector standards-setting), and identification of problems warranting enforcement actions;
- The *enforcement program*, which imposes legal sanctions and serves to deter irregularities by enhancing the care with which registrants and their accountants analyze accounting issues; and
- *Oversight* of private sector efforts to establish accounting and auditing standards, and to improve the quality of audit practice.

The Commission's direct efforts are multiplied by the efforts of the Financial Accounting Standards Board (FASB), the AICPA and other activities of the profession under Commission oversight. In addition to Commission enforcement actions, significant numbers of actions are brought by private litigants, many of which are a direct result of Commission actions.

The cumulative effect of the Commission's programs, private sector initiatives and civil litigation comprises a comprehensive system under which the integrity of financial reporting for public companies is constantly being challenged, modified and improved. The Commission's review and comment process and enforcement programs are discussed elsewhere in this report. The remainder of this section summarizes the Commission's accounting-related rules and interpretations and the oversight function.

Accounting-Related Rules and Interpretations

Regulation S-X provides guidance as to the form and content of financial statements filed with the Commission. The Commission has also adopted various rules

that specify disclosure of financial information outside of the financial statements. For example, certain supplementary financial information, selected financial data and a management's discussion and analysis of the company's financial condition and results of operations are required by Regulation S-K.

To address significant accounting issues, the Commission may issue interpretive releases and, when announcing rule changes, provide guidance for compliance with new or amended rules. In addition, the Commission staff periodically issues Staff Accounting Bulletins (SABs) to inform the financial community of its views on accounting and disclosure issues.

As for rulemaking initiatives, the Commission, during the past fiscal year, adopted rules which improve and simplify disclosures made by bank holding companies about loans to borrowers in countries experiencing liquidity problems.[45] The Commission also amended its rules to delete certain requirements to disclose the effects of inflation and changing prices called for by Statement of Financial Accounting Standards No. 33 to conform with a similar action taken by the FASB.[46] In announcing this action, the Commission emphasized that registrants will continue to be required to discuss the effects of inflation within Management's Discussion and Analysis, when material. The Commission also issued a concept release on Management's Discussion and Analysis based on suggestions from major accounting firms.[47]

In the interpretive area, a release was issued to address various matters relating to accounting for loan losses by registrants engaged in lending activities.[48]

In addition to requiring financial disclosure of registrants, Commission rules also address the qualifications of accountants, including their independence and accountants' reports on financial statements, and require disclosure about a registrant's public accountants. In April 1987, the Commission issued proposed rules which would require all accountants of public companies to undergo peer review.[49] The Commission's proposal would require that financial statements included in filings be certified by an independent accountant that had undergone a peer review of its accounting and auditing practice within the three years prior to the filing and has established and is complying with an audit quality control system meeting the requirements under generally accepted auditing standards. The proposal contains certain peer review standards, minimum requirements for a peer review organization, and a procedure whereby the final authority to determine whether an accountant may continue to practice before the Commission rests with the Commission. This procedure would be used when a public accounting firm failed to remedy material deficiencies in its quality controls. The comment period expired July 9, 1987, and comment letters are presently being reviewed by the staff with a view toward developing recommendations for Commission consideration.

On June 18, 1987, the Commission published for comment a proposal to amend the disclosure requirements related to a registrant's change in independent accountants. If adopted, the proposed item would require disclosure by the registrant of issues related to the registrant's financial statements discussed with the new accountant during approximately the two years prior to its engagement.[50] The views of the new and old accountants on those issues would be summarized by the registrant, and the names of other accountants consulted on those issues (and the extent their views materially differed from the new accountant's views) would be

disclosed. Also, amendments to the current requirement to disclose disagreements with the former auditor were proposed to clarify when such disagreements are deemed to have occurred. The comment period expired September 24, 1987, and the staff is in the process for developing recommendations for Commission consideration.

During fiscal year 1987, SABs were issued regarding (1) risk sharing in business combinations accounted for as poolings of interest; (2) disclosure by bank holding companies regarding loans to countries experiencing liquidity problems; (3) the appropriate income statement presentation of restructuring charges; (4) accounting for increasing rate preferred stock; (5) the appropriate disclosure of lending and deposit activities by financial institutions other than bank holding companies; (6) accounting for non-recourse debt collateralized by lease receivables; and (7) financial statements of properties securing mortgage loans.[51]

Oversight of Private Sector Standards-Setting

In addition to its direct action through rulemaking and other programs, the Commission monitors the structure, activity and decisions of the private sector standards-setting organizations.

FASB—Although the Commission has adopted Regulation S-X, promulgated other rules and disclosure requirements in the financial reporting area, and has published interpretations and guidance where necessary, it has generally refrained from prescribing the accounting methods to be followed in the preparation of financial statements.

In lieu of specifying accounting principles, the Commission has presumed financial statements to be misleading or inaccurate unless prepared in accordance with accounting principles which have substantial authoritative support. Under this concept, the Commission looks to the FASB to provide the initiative in establishing and improving accounting principles. Oversight of the process involves not only Commission review of the standards set, but also the direct participation of staff members and, in some instances, the Commission itself in the initial setting of standards.

Staff members monitor developments closely and are in frequent contact with the FASB, participate in meetings, public hearings, and task forces. The Commission monitors the progress of FASB projects and meets periodically with the FASB to discuss topical issues.

Financial Instruments—In fiscal year 1986, the FASB (in response to a recommendation from the Commission's Chief Accountant) added a major long-term project to its agenda that will address financial instruments and off balance sheet financing issues. The project is comprised of several parts, some of which will be developed simultaneously. Significant parts of the project include (a) disclosure about financial assets and transactions, (b) accounting for risk-transfer instruments such as guarantees and interest rate hedging instruments, (c) off balance-sheet financing arrangements, (d) the appropriate measurement basis for financial instruments; and (e) accounting for securities with both debt and equity characteristics.

Subsequent to fiscal year end, the FASB issued an exposure draft which would require certain disclosures about financial assets and liabilities now carried in the

balance sheet and obligations, commitments and guarantees not now recognized in financial statements.[52]

Consolidations and the Equity Method—In November 1987, the FASB issued a statement requiring consolidation of all majority-owned subsidiaries unless control is temporary or does not rest with the majority owner.[53] This statement is part of a broader project which includes development of a concept of the reporting entity, and its application to the issue of consolidation policy.

Cash Flow Reporting—The FASB issued a statement requiring a statement of cash flows to be presented as part of a full set of financial statements of all business enterprises, replacing the statement of changes in financial position.[54]

Income Taxes—Subsequent to fiscal year end, the FASB issued a statement on accounting for income taxes. The statement represents a significant change in the method of accounting for income taxes by adopting a liability approach to the issue of comprehensive interperiod tax allocation.[55]

Regulated Enterprises—The FASB issued statements on accounting for abandonments and disallowances of plant costs and accounting for phase-in plans.[56] Both of these statements involve rate-regulated enterprises and represent amendments to Statement of Financial Accounting Standards No. 71.

Other Projects—Other significant projects on the FASB's technical agenda include stock compensation plans, sales and leasebacks involving real estate, postemployment benefits other than pensions and accounting for universal life insurance.

Timely Financial Reporting Guidance—Encouraged by the Commission, the FASB has continued its efforts to provide more timely guidance on emerging issues. Technical bulletins issued in fiscal year 1987 by the FASB staff included guidance on accounting for (a) certain effects of the Tax Reform Act;[57] (b) interests in the residual value of a leased asset;[58] and (c) changes in the method of accounting for certain postretirement benefits.[59] In addition, a technical bulletin concerning accounting for mortgage servicing fees and rights was finalized after fiscal year end.[60]

Also, the Emerging Issues Task Force (EITF) (in which the Commission's Chief Accountant plays a significant role) has discussed over 150 issues since its inception in 1984, covering a range of specific issues such as financial instruments and financial institutions, business combinations, and income taxes. A number of the issues were introduced by or at the request of the Commission. On many issues, the group reached a consensus that either: (a) a single method of accounting is preferable based on existing literature; (b) existing guidance is adequate; or (c) the issue does not present a pervasive problem. Other issues have been referred to the FASB or the AICPA for action or further consideration. The Commission expects the positions agreed upon at those meetings to be followed by registrants. Those that do not follow them will be asked to justify departure from any consensus reached. Based on the work of the EITF to date, the Commission believes that the EITF is performing a useful role in providing timely guidance to registrants and their accountants.

Oversight of the Accounting Profession's Initiatives

In addition to oversight of the private sector process for setting accounting stan-

dards, the Commission also oversees various activities of the accounting profession conducted primarily through the AICPA. These include (a) the Auditing Standards Board (ASB), which establishes generally accepted auditing standards; (b) the Accounting Standards Executive Committee, which provides guidance on specific industry practices and prepares issues papers on accounting topics for consideration by the FASB; and (c) the SEC Practice Section (SECPS) of the Division for CPA Firms, which seeks to improve the quality of accounting firms through various membership requirements including peer review.

The AICPA, along with other organizations, sponsored the National Commission on Fraudulent Financial Reporting (NCFFR), an independent commission which studied issues involved in the prevention and detection of fraud in the context of financial reporting. The NCFFR issued its report in October 1987.[61] The report contains recommendations for the public company, the independent public accountant, and for the Commission and others to improve the regulatory and legal environment. The Commission staff is evaluating these recommendations.

In February 1987, the ASB issued for public comment ten proposed standards which comprise the so-called "Expectation Gap" projects. These proposals include projects relating to the auditor's standard report and auditor responsibilities for detection and reporting of fraud and evaluating an entity's continued existence.[62] The Commission staff is supportive of the ASB's efforts to enhance auditors' communication and responsibilities and is closely monitoring the ASB's progress toward establishing final standards in these areas.

SEC Practice Section—The Commission oversees the activities of the SECPS through frequent contact with the Public Oversight Board (POB) and members of the executive and peer review committees of the SECPS. In addition, the staff reviews POB files and selected working papers of the peer reviewers. The Commission believes the peer review process contributes significantly to improving the quality control systems of member firms and thus should enhance the consistency and quality of practice before the Commission. According to the POB's Annual Report as of June 30, 1987, 395 firms have voluntarily become members of the SECPS, including all firms with 30 clients reporting to the Commission.[63]

Special Investigations Committee—Activities of the Special Investigations Committee (SIC) supplement peer review. The SIC determines whether allegations of failure in the conduct of an audit indicate need for improvements in, or compliance with, quality control systems of the reporting firms, whether changes in professional standards are required, and whether any corrective action taken by the firm was appropriate. The POB monitors the activities of the SIC and has complete access to the process and to SIC files.

The Commission staff also monitors the SIC process. However, as the audits reported to the SIC are generally the subject of litigation, the Commission's access to documentation of the SIC review has been limited. Because of this limited access the Commission does not have a basis for reaching any conclusions about the SIC process. In an effort to find ways to improve the Commission's access to SIC documentation and to address other concerns, the SECPS Executive Committee appointed the Task Force on SIC Methodology. This task force recommended, among other things, that more comprehensive and informative summaries be furnished to the Commission when a case is closed and that the SIC meet

regularly with the Commission staff to discuss concerns the Commission staff may have with actions taken by the SIC as reflected in the summaries and any changes the Commission believes would make the process more effective. The Commission staff, however, has just begun to review SIC documents prepared under the new procedures, and has not yet reached a conclusion as to whether they will enable the Commission to fully assess the effectiveness of the SIC function.

The EDGAR Project

Key 1987 Results

Introduction

The primary purpose of EDGAR is to increase the efficiency and fairness of the securities markets for the benefit of investors, securities issuers, and the economy. Under EDGAR, information will be filed electronically for acceptance and review by the Commission staff. Once accepted, public information also will be rapidly available to investors, the media and others on computer screens via public reference rooms or subscription services. When fully operational, EDGAR will accelerate dramatically the filing, processing, dissemination and analysis of time-sensitive corporate information filed with the Commission.

The EDGAR Pilot system completed its third full year of successful operations on September 24, 1987. It has demonstrated clearly the feasibility of electronic filing and review procedures. Over 20,000 electronic filings have been made since September 1984.

The Commission also continued to move ahead with its plan to develop a fully operational EDGAR system. The Request for Proposals (RFP) was amended to reflect changes in EDGAR funding strategy and released on October 23, 1987.

Pilot System

The Pilot system serves a group of volunteer companies whose filings are processed by the Divisions of Corporation Finance and Investment Management. At the end of fiscal year 1987, 299 corporations plus 198 investment companies and 21 public utilities were filing electronically as fully participating registrants. An additional 700 investment companies participate partially in the Pilot by electronically filing their annual and semi-annual reports on Form N-SAR.

As a consequence of this growth, the Pilot was closed to most new participants as of August 31, 1986. Generally, the only exceptions are for affiliates of current Pilot participants and initial public offerings by registrants whose filings are processed by the Division of Corporation Finance. In addition, Public Utility Holding Company Act filings and Forms N-SAR and 13F-E may be submitted electronically even if the filer is not a current Pilot participant. Companies also may continue to make test filings via the Pilot.

In fiscal year 1987, certain enchancements were added to the Pilot to make electronic filing more convenient and test potential productivity improvements for the operational system. For example, a reference filing capability was added in November 1986. This capability permits filers to submit an electronic reference filing which can then be included in subsequent electronic filings by designation in lieu of retransmission. As a result of this enhancement, the Commission received more than 4,400 reference filings through September 30, 1987. By using the reference

capability, the filers avoided the cost of submitting over 89,000 pages. One reference filing was incorporated into 726 separate electronic documents.

Another Pilot enhancement permits institutional investment managers to file Form 13F voluntarily on magnetic tape using temporary Form 13F-E. Participating investment managers that maintain 13F information on a computer will no longer need to transmit paper copies of these reports to the Commission. As more filers submit Form 13F-E electronically, there will be more rapid compilation and dissemination of summary information. Processing of Form 13F-E tapes includes automated receipt and acceptance procedures that are more efficient than the procedures used to process other tape filings. The experience gained with these new procedures will be incorporated in the design of the operational system.

In January 1987, the central processing unit of the Pilot was upgraded from an IBM-4381—Model 2 to an IBM 4381—Model Q14. This nearly doubled processing capacity, improved internal response time, and added dual processing capabilities. Further enhancements were made at the end of fiscal year 1987 to increase disk storage, tape backup and the number of EDGAR terminals within the Commission. These enhancements will enable the Pilot to handle the larger volume of filings that is anticipated during the next fiscal year. They also provide a framework for testing procedural and system enhancements that may be incorporated in operational EDGAR.

Operational System

During fiscal year 1987, plans for Operational EDGAR continued to move forward. The EDGAR RFP was originally released on May 7, 1986. Bids were ultimately received on February 27, 1987, after two closing date extensions due to requests by potential offerors. On July 22, 1987, prior to awarding the contract, the Commission announced its intention to reopen competition for 90 days because of a change in the funding strategy for the operational contract.

Under the prior RFP, federal funding for the EDGAR contract was limited to a maximum of $46.5 million for the acceptance and review subsystem. Excess funds were to be spent on the receipt subsystem. The contractor was expected to fund the remainder of the receipt subsystem and all of the dissemination subsystem and recover costs via the regulated sale of data and services. In response to a GAO recommendation, and subsequent discussions with Congressional staff, the Commission agreed to fully fund the receipt subsystem as well as the acceptance and review subsystem. This change, coupled with an analysis of the bids received and the requirements of the Federal Acquisition Regulation, resulted in the decision to amend the RFP and reopen competition.

The Commission staff subsequently reviewed and amended the RFP to conform with the new funding strategy and the Commission's authorization legislation. Under the amended RFP, the Commission will fully fund the development and operation of the receipt and acceptance and review subsystems. The cost of developing and operating the dissemination subsystem will be borne by the contractor and recovered as before. The amended RFP is structured as a cost-reimbursement plus fixed fee contract for the first three years with the fee calculated on labor and overhead costs only. The last five years are structured as a fixed price contract as before.

The RFP, as amended, requires that offerors who intend to provide retail services in addition to regulated services pay the same Level I subscription fee as other entities who purchase the entire EDGAR data base. This fee will not be waived unless the contractor can show that such payment will place it at a significant competitive disadvantage.

The amended RFP provides for an extended phase-in period for mandatory filing; from 36 months up to 48 months, and longer if necessary. This is necessary to allow a reasonable time for system development and a six month test period for the initial group of mandatory filers.

The amended RFP was released on October 23, 1987, with proposals due in late January 1988. Further consideration of existing offers will be deferred until any additional interested parties have had an opportunity to submit their proposals.

Office of EDGAR Management

The Commission has enhanced its managerial and technical expertise in preparation for the operational system by creating a separate Office of EDGAR Management.

The Director reports to the Chairman of the Commission and has overall responsibility for the procurement, implementation and operation of the EDGAR system. In addition to overseeing the Office of Edgar Management, the Director is the contract officer for the project with responsibility for maintaining liaison within the Commission and with filers and users of the filed information. The Director will be assisted in these tasks by a professional staff including two special assistants, a legal counsel, and an industrial liaison representative. Also reporting to the Director will be three branch chiefs for contract administration, filer training and assistance, and technical systems administration. When fully staffed in late 1988, the Office of EDGAR Management will consist of approximately 40 employees.

Conclusion

The Commission is firmly committed to proceeding with EDGAR. Work on the operational system in fiscal year 1988 will include proposal evaluation, contract award, rulemaking, development of a filer training/support staff, and preparation for the transition from the Pilot to the Operational EDGAR.

Regulation of the Securities Markets

Key 1987 Results

The Division of Market Regulation, with the assistance of the regional offices, is charged with the responsibility of overseeing the operations of the nation's securities markets and market professionals. In fiscal year 1987, over 11,000 broker-dealers and ten exchanges as well as the over-the-counter markets were subject to the Commission's oversight.

During fiscal year 1987, the Commission designated 500 new over-the-counter securities as National Market System (NMS) securities for a total of 3,000. Unlisted trading privileges were granted to 25 National Association of Securities Dealers Automated Quotation System (NASDAQ)/NMS securities to be traded by the Midwest Stock Exchange (MSE). Mortgage-backed securities transactions, transactions that settle in same-day funds and mutual fund orders were added to the National Clearance and Settlement System. The immobilization of the securities certificate was expanded by the addition of California as the forty-seventh state to allow domiciliary insurance companies to use securities depositories. The use of book-entry systems was extended to corporate debt offerings when Ford Motor Credit Corporation issued $200 million of three-year notes in "global certificate form."

In response to increased market volatility, the staff examined the effects of index-related trading and published a study pertaining to specific market declines during

fiscal year 1987. The staff has undertaken additional studies scheduled for release in fiscal year 1988 which will further examine these issues.

Internationalization of the securities markets was furthered through the linkage of a variety of clearing agencies for both equities and options. Global securities offerings were granted certain exemptions from Rules 10b-6 and 10b-7 under the Securities Exchange Act of 1934 (Exchange Act), to permit "passive market making" and to accommodate foreign regulations and practices with respect to offering and trading of securities. The Commission sponsored a roundtable discussion on February 17, 1987, focusing on secondary market issues and primary offerings in the international area. The Division also prepared a chapter in the Staff Report on Internationalization.

Rules were proposed to regulate certain acquisitions of blocks of securities undertaken during and shortly after tender offers, referred to as "market sweeps." Rules governing short sales practices in connection with underwritings were also proposed.

The broker-dealer examination program was enhanced through the use of on-line systems which monitor the administration of the program by the nine regional offices. Moreover, field examinations will shortly include review of net capital and mark-up compliance by portable computers.

Securities Markets, Facilities and Trading

The National Market System

Rule 11Aa2-1 under the Exchange Act provides procedures for designating certain securities as NMS securities and Rule 11Aa3-1 requires that transactions in NMS securities be reported on a real-time basis, increasing market efficiency and improving execution of orders.

The Commission adopted amendments to Rules 11Aa2-1 and 11Aa3-1 resulting in the designation as NMS securities of all securities—whether traded on exchanges or over-the-counter (OTC)—for which transaction reports are required to be submitted pursuant to an effective transaction reporting plan. The Commission also adopted conforming amendments to related rules. Over 3,000 OTC securities now are designated as NMS securities, 500 more than in fiscal year 1986.

In April 1987, the Commission approved the Midwest Stock Exchange's application for unlisted trading privileges on 25 NASDAQ/NMS securities and approved an interim joint transaction reporting plan submitted by the MSE and the National Association of Securities Dealers (NASD) to provide for consolidated reporting of transaction and quotation data in these securities.[64] In addition, the Commission is monitoring ongoing negotiations among the NASD and several exchanges, including the MSE, on a permanent transaction reporting plan for NASDAQ/NMS securities traded on one or more exchanges on a listed or unlisted basis.

The NASD submitted a proposed rule change to the Commission that, if approved, would provide the NASD with the authority to halt trading in NASDAQ/NMS securities pending the dissemination of material news by the issuer and to halt trading in listed securities traded in the third market when the primary market for the securities halts trading pending the dissemination of material news. The Commission is currently considering the proposal.

The Commission also continued to study automation in the OTC market. The Commission issued a no-action position concerning the regulation of an automated OTC trading system (POSIT) informing the system developer that the Commission would not recommend enforcement action if such a system were not registered as an exchange.[65] The Commission is now considering new regulatory approaches for such systems.

National System for Clearance and Settlement of Securities Transactions

In fiscal year 1987, the Commission approved proposals that expanded the services of the National Clearance and Settlement System (National System) to mortgage-backed securities transactions, transactions that settle in same-day funds, and mutual fund orders. In February, the Commission granted the MBS Clearing Corporation (MBSCC) temporary registration as a clearing agency, in order to provide trade clearance and certificate depository services for mortgage-backed securities, including Government National Mortgage Association pass-through certificates.[66] In July 1987, the Commission approved, on a pilot basis through January 1988, the Depository Trust Company's (DTC) proposed same-day funds system, which expanded DTC's certificate immobilization and book-entry delivery services to certain securities settling in same-day funds, such as short-term municipal notes.[67] The Commission also approved extension of the National Securities Clearing Corporation's (NSCC) Mutual Fund Settlement, Entry and Registration Verification (Fund/SERV) Service, which provides centralized, automated handling of mutual fund orders.[68]

The Commission also approved a proposal that reduces foreign currency delivery obligations to the Options Clearing Corporation (OCC) and the Intermarket Clearing Corporation (ICC) for electing joint clearing members.[69] This is accomplished by netting foreign currency delivery obligations arising from exercises and assignments of foreign currency options at OCC with obligations to accept foreign currency at ICC arising from settling foreign currency futures contracts.

Market Volatility Studies

On September 11 and 12, 1986, the Dow Jones Industrial average fell 120 points on record volume, at that time one of the sharpest market declines in history. In response to public and Congressional concerns about the role of index-related arbitrage in the market decline, the Division of Market Regulation, in conjunction with staff of the Commodity Futures Trading Commission (CFTC), conducted a review of trading activity on those two days.

The Division observed the substantial use of index products by professional and institutional investors to shift and control risk, and to respond to market movements. The Division concluded, however, that the magnitude of the September decline was a result of changes in investors' perceptions of fundamental economic conditions, rather than artificial forces arising from index-related trading strategies. Nevertheless, index-related futures trading was instrumental in the rapid transmission of these changed investor perceptions to individual stock prices, and may have condensed the time period in which the decline occurred.

In addition, the Division has analyzed trading on "Expiration Fridays" and, with the cooperation of the New York Stock Exchange (NYSE), has implemented a plan to reduce volatility on those days.

On September 19, 1986, the NYSE, at the request of the Commission, conducted an experiment in disseminating order imbalances in an attempt to address volatility associated with the coincident expiration of index futures and options. The NYSE sent a circular to member firms instructing them to submit all market-on-close (MOC) orders in the 30 Dow Jones Industrial Average stocks by 3:30 p.m., and provided for the public dissemination of all significant MOC order imbalances.[70] This experiment worked well, and for the December 19 expiration the NYSE expanded the experiment to include 50 stocks.

Securities Immobilization

In fiscal year 1987, the Commission continued to make progress in its effort to increase the immobilization of securities certificates in securities depositories. For example, California removed restrictions on depository use by domiciliary insurance companies for their portfolio assets. Forty-seven states now allow domiciliary insurance companies to use depositories. Also during the fiscal year, issuers, transfer agents, broker-dealers and clearing agencies, through several task forces, continued their cooperative efforts to identify ways to increase the immobilization of securities certificates and to experiment with uncertificated book-entry systems. In 1986, Ford Motor Credit Corporation became the first "book-entry only" corporate debt issuer by issuing $200 million of three-year notes in "global certificate form" through the DTC. In August 1987, IBM Credit Corporation became the second issuer of global certificate corporate debt obligations, with a $200 million note offering. To date, corporate debt distributed in global certificate form totals $3.25 billion. In calendar year 1986, approximately $7.2 billion in municipal debt obligations were issued in global certificate form.

Internationalization

In its continuing efforts to foster the development of the internationalization of the securities markets, the Commission sponsored a roundtable discussion on February 17 that focused on secondary market issues and primary offerings in the international context. A summary of the internationalization roundtable was prepared by the Commission. In addition, on August 5, 1987, the Commission submitted to Congress a comprehensive staff study of the internationalization of the world's securities markets.[71] The Commission continues to monitor and review international trading and clearing linkages and proposals.

During fiscal year 1987, the Commission took several actions with respect to the application of Rules 10b-6 and 10b-7 under the Exchange Act to multinational offerings involving concurrent United States and foreign distributions. Rule 10b-6 proscribes certain conduct by persons participating in a distribution to ensure that they do not artificially condition the market for a security to facilitate its distribution. Rule 10b-7 regulates stabilization activities during distributions. The Commission's actions permitted non-United States distribution participants to continue certain customary market activities in foreign jurisdictions, subject to certain con-

ditions designed to assure that there would not be a manipulative impact on the United States market. For example, in September 1987, a letter was issued to the International Stock Exchange of the United Kingdom and the Republic of Ireland Limited (ISE) granting exemptions from Rules 10b-6 and 10b-7.[72]

The exemptions permit ISE member broker-dealers to engage in "passive market making" activities while such firms are participating in a multinational distribution of securities of certain United Kingdom issuers partially being offered in the United Kingdom, or where the United Kingdom firms are affiliated with United States broker-dealers participating in a distribution in the United States. "Passive market making" refers to the ability of the United Kingdom firms to provide depth and liquidity in the United Kingdom securities market by continuing to act as market makers, but the firms may not lead the market either in price or size of quotations. The exemptions were developed in a cooperative effort between the Commission and the ISE in response to a request from the ISE that the Commission accommodate the ISE's new market making rules prohibiting "fair weather market making" which appeared to be in conflict with Rule 10b-6.

Exemptions were also granted to permit affiliated purchasers of French and Spanish distribution participants to bid for and purchase securities in the French and Spanish markets, respectively, during multinational distributions.[73] In France, a bank sponsoring the underwriting (or the issuer) generally will assist French market makers in the maintenance of an orderly market for a period of time following the distribution. In Spain, it is customary for affiliates of the issuer to act as market makers, even during distributions, to ensure liquidity and modulate price swings. Without the granted exemptions, such activities would have been prohibited by Rule 10b-6.

Finally, in May 1987, the Commission issued two exemption orders under Rule 10b-7 with respect to stabilization of global securities offerings. The exemption orders treated certain foreign markets as the "principal market" for purposes of determining appropriate stabilizing price levels.[74]

As part of its secondary market internationalization program, the Commission continued to foster the development of international linkages between clearing agencies. For example, the Commission issued no-action letters to the International Securities Clearing Corporation (ISCC) and NSCC to permit a pilot link with the ISE.[75] The Commission also granted a no-action request from Midwest Clearing Corporation (MCC), Midwest Securities Trust Company (MSTC) and the Sociate Interprofessionelle pour la Compensation des Valeurs Mobilieres (SICOVAM) permitting MCC/MSTC to maintain custody of securities for SICOVAM and, on a fully disclosed basis, SICOVAM participants.[76]

The Commission has also fostered foreign participation in the National Clearance and Settlement System. The Commission approved OCC rule changes that exempt Canadian clearing members from OCC's accounting and capital requirements keyed to United States standards and requirements and permit Canadian clearing members to maintain OCC membership under Canadian net capital requirements and Canadian accounting standards.[77] The Commission also approved an OCC proposal to issue and clear options on the Major Market Index (XMI) fungible with those currently traded on the American Stock Exchange (Amex)[78] for trading on the European Options Exchange.

Options

During fiscal year 1987, the Commission issued a Rule 9b-1 order under the Exchange Act that approved proposed revisions to the Options Disclosure Document (ODD).[79] The revised ODD, submitted by the OCC in conjunction with the Amex, Chicago Board Options Exchange (CBOE), Pacific Stock Exchange (PSE), NYSE, Philadelphia Stock Exchange (Phlx) and NASD, reflects recent changes in the options market such as the introduction of evening trading hours in foreign currency options and the growing international trading of options. In this regard, the Commission approved rule changes by the Amex and OCC which enabled the European Options Exchange to trade options on the XMI, a broad-based, price-weighted index constructed by the Amex.[80] This is the first occasion in which options that are identical to and fungible with option contracts traded on a domestic securities exchange have traded on a foreign securities exchange.

The Commission also approved a rule change that would allow the Phlx to list options on a narrow-based utility index comprised of the common stocks of 20 domestic companies that are involved primarily in electric power generation.[81] In addition, the Commission issued an order that approved a PSE proposal to list and trade options on the Financial News Composite Index (FNCI), a broad-based price-weighted index comprised of 30 NYSE listed stocks designed to track the overall market.[82] Additionally, the PSE arranged with the International Futures Exchange (Bermuda), Ltd. (Intex), a foreign commodity exchange, for Intex to trade futures on the FNCI. Also, the PSE ceased trading options on the PSE Technology Index as of the September 1987 expiration.[83]

The Commission approved proposed rule changes submitted by the Amex, Phlx, and NYSE to list foreign currency warrants for trading.[84] These warrants, issued by highly capitalized corporations or their affiliated finance companies, are cash settled, exercisable before their expiration date, and have a value linked to the value of a foreign currency.

Pursuant to Section 2(a)(1)(B) of the Commodity Exchange Act, the Commission sent a letter to the CFTC not objecting to the designation of the Chicago Board of Trade (CBT) as a contract market for the trading of stock index futures on the Institutional Index (XII).[85] The XII, developed by the Amex, is an index comprised of 75 stocks that are held by institutional investors. The Commission also sent a letter to the CFTC not objecting to the designation of the CBT as a contract market for the trading of futures contracts on the Long-Term Corporate Bond Index.[86] The Long Term Corporate Bond Index, developed by the CBT, is composed of 100 fixed-rate, non-convertible, publicly-offered, highly-rated, long-term, United States dollar-denominated bonds issued by United States corporations with a principal value of $100 million.

In addition, the Commission sent a letter to the CFTC not objecting to the designation of the Commodity Exchange, Inc. as a contract market for the trading of futures contracts on the Moody's Investment-Grade Corporate Bond Index.[87] The index, developed by Moody's Investors Service, is composed of 80 fixed-yield, non-convertible, highly-rated, intermediate and long-term bonds issued by United States corporations with a principal value of at least $100 million. In response to a CFTC request, the Commission also sent a letter to the CFTC not objecting to a

CFTC no-action position authorizing the Singapore International Monetary Exchange, Ltd. (SIMEX) to offer and sell stock index futures contracts based on the Nikkei Stock Average (Nikkei) to United States citizens.[88] The Nikkei is a price-weighted stock index which is calculated based on the prices of 225 highly-capitalized stocks on the Tokyo Stock Exchange.

Further, the Commission amended Rule 3a12-8 under the Exchange Act to eliminate the requirement that futures on foreign government securities be traded on a board of trade in the country that issued those securities.[89]

As previously noted in the market volatility section, the Commission continued to examine the effects of index-related trading strategies involving index options and futures and the underlying component stocks both on the last trading day before expiration (so-called "Expiration Friday") and on non-expiration days in fiscal year 1987. In addition to the rule filing involving the submission of market-on-close orders relating to index arbitrage in 50 designated stocks,[90] the Commission approved a NYSE rule change to modify the settlement price of expiring stock index options on the NYSE Composite Index and NYSE Beta Index to the opening prices of component stocks, rather than the closing prices, on Expiration Friday.[91] The Commission also approved a NYSE rule change implementing special stock opening procedures designed to reduce order imbalances due to the settlement of certain index options and futures at the opening rather than the closing of trading.[92] As previously discussed, the Commission also published a staff study looking at non-expiration volatility and, in particular, the role of index-related trading strategies in the market decline of September 11 and 12, 1986.

In fiscal year 1987, the Commission revisited the question of eliminating the existing options allocation plan and permitting trading of exchange-listed options on more than one exchange. In particular, the Commission authorized a proceeding under Section 19(c) of the Exchange Act to consider whether to: (1) adopt a policy permitting multiple trading on exchange-listed stocks; and (2) amend the rules of the options exchanges to remove restrictions on the multiple trading of options on exchange-listed stocks.[93]

Regulation of Brokers, Dealers, Municipal Securities Dealers, and Transfer Agents

Broker-Dealer and Transfer Agent Examinations

During fiscal year 1987, the Commission continued to make increased use of computers in the broker-dealer regulatory programs. A new on-line system now captures all broker-dealer examination data. This data is used to monitor the activities of the Commission's nine regional offices in carrying out the examination program goals and objectives. Additionally, software programs for the review of net capital and mark-up compliance were developed for use in field examinations, when portable computers become available. By the end of the fiscal year, the Commission had ordered a number of portable computers, which will become available to field examiners for conducting broker-dealer and transfer agent examinations in fiscal year 1988. Previously, a pilot test program determined that portable computers would improve examiner productivity.

The broker-dealer oversight program continued to emphasize review of sales

practice activities at large national firms. These examinations included on-site reviews at both the headquarters and branch offices of the selected firms. Also, the Commission placed greater emphasis on compliance with the currency reporting provisions of the Bank Secrecy Act. As a result, the Commission brought enforcement proceedings against several broker-dealers for failure to report cash transactions and referred matters to the Department of Treasury for possible civil or criminal action.

The Commission completed 452 oversight examinations of SRO members, a 6.0 percent decrease from the 481 examinations completed in fiscal year 1986. This decrease was the result of an increased emphasis on comprehensive oversight examinations with an increased emphasis on sales practice reviews. As a result, despite the decrease in the number of completed oversight examinations, the Commission increased the amount of time spent on the oversight examination program by 3.3 percent. The Commission also completed 56 cause examinations, a decrease from the 69 conducted in fiscal year 1986. The decrease in cause examinations has resulted from the Commission's determination to place greater reliance on the SROs to handle matters for which they have adequate remedies.

In addition, the Commission also reviewed several broker-dealers to examine their procedures for limiting access to market-sensitive information within multi-service firms. This "Chinese wall" inspection revealed that each firm used a different approach to control the flow of inside information through the Chinese wall. The Commission concluded that the firms would benefit by setting clearer minimum standards in several areas. Consequently, the NYSE agreed to include supervision of its members' Chinese walls in its regular examination program and the Commission plans to aid in the development of an examination module and provide oversight of NYSE examinations.

The Commission also conducted 111 transfer agent examinations, an increase of 2.8 percent from the 108 examinations conducted in fiscal year 1986. These examinations were conducted following guidelines set by the Commission which are designed to improve examination selection and to follow-up on deficiencies noted in prior examinations.

Market Sweeps

In September 1987, the Commission approved issuance of a release soliciting comments on proposed Rules 13e-2 and 14d-1 under the Exchange Act which would govern certain acquisitions of securities undertaken during and shortly after a conventional tender offer for securities of the same class and related activities.[94] If adopted, the proposed rules would apply to purchases, offers to purchase, arrangements or understandings to purchase and solicitations of offers to sell securities that are the subject of the tender offer. If any such transaction is undertaken during and shortly after a tender offer and would increase any person's beneficial ownership of the class of securities subject to the tender offer by 10 percent or more of the class, the transaction must be made in compliance with the statutory provisions and rules applicable to tender offers. Exceptions would be provided for: (1) purchases of blocks which had been reported to the Commission for one year; (2) purchases from the issuer; (3) purchases pursuant to a pre-existing written

agreement; (4) issuer transactions approved by security holder vote, including recapitalizations and reorganizations; and (5) purchases in connection with mergers approved by the issuer's security holders. The provisions would apply to all persons from the formal commencement of a tender offer until 10 business days after the scheduled expiration date.

Short Sales

On May 20, 1987, the Commission issued a release soliciting comments on proposed Rule 10b-21 under the Exchange Act.[95] If adopted, the rule would prohibit a person who effects short sales of an equity security during the period between the filing of a registration statement relating to the same class of equity securities and the commencement of the public offering of such equity securities from directly or indirectly covering such short sales with securities purchased from an underwriter or broker or dealer participating in the public offering. The proposed rule is designed to prevent manipulative short selling by market participants in anticipation of underwritten public offerings.

Bank Securities Activities

On May 4, 1987, the Commission submitted to Congress proposed legislation entitled the Bank Broker-Dealer Act of 1987. The Bank Broker-Dealer Act, introduced in both the House of Representatives[96] and the Senate,[97] would modify the blanket exceptions for "banks" found in the definitions of "broker" and "dealer," and would remove the exemption for banks that engage in any of the activities enumerated in Rule 3b-9 under the Exchange Act. The Bank Broker-Dealer Act would expressly require banks that fall within the definitions of "broker" or "dealer" to establish separate entities registered as broker-dealers with the Commission, through which securities activities would be carried out.

The proposed legislation is intended to codify the concepts first presented in Rule 3b-9, which the Commission adopted on July 1, 1985.[98] The rule would have required banks to conduct certain securities activities through broker-dealers registered under the Exchange Act. These activities are: (1) public solicitation of brokerage for transaction-related compensation, (2) receipt of transaction-related compensation for providing brokerage services for trust, managing agency, or other accounts to which the bank provides advice, or (3) dealing in or underwriting securities. The rule also contains several exceptions for banks that conduct only limited securities activities. On November 4, 1986, the rule was invalidated by the Court of Appeals of the District of Columbia Circuit.[99] In its opinion, the Court suggested that perhaps Congress should address the issue of bank broker-dealer activities.

Zero-Coupon Securities

In April 1987, the Commission issued a release reminding broker-dealers that the Commission's and self-regulatory organizations' (SRO) mark-up policies apply to transactions in zero-coupon securities.[100] The Commission issued the release because it had become concerned about mark-up and mark-down practices that may have developed with respect to such securities.

Financial Responsibility Rules

On June 11, 1987, the Commission amended its net capital, recordkeeping and quarterly securities count rules in connection with the treatment of repurchase and reverse repurchase agreements entered into by registered broker-dealers.[101] The record-keeping rule was amended to specifically require broker-dealers to maintain certain books and records with respect to their repurchase and reverse repurchase transactions, including securities records and copies of all confirmations. The quarterly securities count rule was amended to clarify that broker-dealers are required to account for securities that are the subjects of repurchase agreements as they do for other securities for which they are responsible. The net capital rule was amended to establish deductions from net worth in arriving at net capital for repurchase and reverse repurchase agreements under certain risk circumstances, to require additional capital when the broker-dealer has attained a high degree of leverage as a result of those agreements and to require deductions in connection with transactions with affiliates when the affiliate's records are not made available for examination.

Customer Protection Rule

On August 6, 1987, the Commission amended its customer protection rule, effective January 31, 1988, in connection with repurchase agreements where the broker-dealer agrees to retain custody of the securities that are subject to those agreements.[102] The amendments to the rule will require registered broker-dealers to obtain repurchase agreements in writing, to make specific disclosures regarding certain risks associated with hold-in-custody repurchase transactions and to disclose that the Securities Investor Protection Corporation (SIPC) has taken the position that coverage under the Securities Investor Protection Act of 1970 is not available to repurchase agreement participants. The amendments further require registered broker-dealers to maintain possession or control of securities subject to hold-in-custody repurchase agreements, except that possession or control during the trading day is not required if certain conditions are met.

Interpretations of the Customer Protection Rule

On September 8, 1987, the Division issued a no-action letter to the New York Stock Exchange Sponsored Joint Industry Rule 15c3-3 Committee regarding possession or control of customers' securities for purposes of the customer protection rule.[103] The letter permits broker-dealers to rely on the expected receipt of securities borrowed in order to process "today for tomorrow" delivery instructions for fail to deliver requirements under certain conditions, until a permanent DTC system designed to assist the broker-dealer community in segregating fully paid or excess margin securities is operational.

Lost and Stolen Securities

In 1977, the Commission instituted the Lost and Stolen Securities Program. The Commission's designee, the Securities Information Center (SIC), maintains an up-to-date database on lost, stolen and counterfeit securities. Program data for calendar year 1986 indicate the continuing utility of the program to broker-dealers,

banks, and investors. Program participants number just over 20,300, a three percent increase over 1985. In 1986, the dollar value of certificates that were reported to SIC as lost, missing, stolen or counterfeit was $2.3 billion, a 15 percent increase over 1985. As a result, the aggregate dollar value of the database increased from $9.8 billion to $12.1 billion. The number of certificates reported as lost, stolen, missing or counterfeit increased approximately 18 percent, from 506,223 in 1985 to 596,707 in 1986. Registered institutions also made inquiries concerning 2.5 million certificates. The number of 1986 inquiries from participants that matched previous reports of lost, missing, stolen or counterfeit securities (hits) was 596, a decrease from 1,036 in 1985. The dollar value for hits, however, increased slightly, from $15.4 million in 1985 to $15.5 million in 1986.

Municipal Bond Redemption Processing

To improve the processing of whole-issue and partial calls of municipal securities, the Commission endorsed voluntary notification and processing guidelines that were developed in consultation with federal regulators, self-regulatory organizations, and organizations representing municipal securities issuers, bond counsel and securities processors.[104]

During fiscal year 1986, the number of called bonds increased fourfold, due to declining interest rates. The voluntary guidelines are designed, among other things, to assure that bond holders receive timely and accurate notice to redeem their bonds.

Oversight of Self-Regulatory Organizations

National Securities Exchanges

As of September 30, 1987, nine active exchanges were registered with the Commission as national securities exchanges.[105] During the fiscal year, the Commission granted applications by exchanges to delist 88 equity and debt and 16 option issues and granted applications by issuers requesting withdrawal from listing and registration for 29 issues. In addition, during the fiscal year the Commission granted 1,188 applications by exchanges for unlisted trading privileges.

During fiscal year 1987, the Commission instituted proceedings pursuant to Section 19(c) of the Exchange Act to consider the adoption of a new rule for certain exchanges and associations. The rule would place a prohibition on an exchange listing, or an association (i.e., the NASD) authorizing for quotation the common stock or equity securities of an issuer if, on or after May 15, 1987, the issuer issues securities or takes other corporate action that would have the effect of nullifying, restricting or disparately reducing the voting rights of any common stock of such issuers.[106] As part of this proceeding, the Commission held a public hearing in July for interested persons to present their views. The Commission decided to institute Section 19(c) proceedings after the NYSE submitted a proposal to amend its "one share, one vote" rule to permit listed companies to issue stock with disparate voting rights if certain requirements were satisfied.[107] Public hearings on the rule change were held on December 16 and 17, 1986.

The Commission set aside actions by the NYSE denying two members, William J. Higgins and Michael D. Robbins, permission to communicate by telephone from

the Exchange floor with non-member customers located off the floor.[108] In its Opinion, the Commission rejected arguments by the NYSE that it had a longstanding rule prohibiting such communication links. The Commission held that the NYSE had no rule, or policy enforceable as a rule, denying members the right to have direct telephone communication from the floor with their non-member customers located off-floor and ordered the NYSE to permit Higgins and Robbins to install the telephone connections they had requested.

During fiscal year 1987, the Commission received 205 proposed rule changes from the stock exchanges. The Commission approved several significant rule filings, including proposals of the NYSE and Amex to permit them to waive or modify certain of their corporate governance and financial disclosure listing standards for foreign issuers that conflict with the home country's laws or practices.[109] Under the Amex and NYSE rules, such a waiver may be granted only where the practices of the foreign companies are in compliance with business practices and legal requirements of their country of domicile.

The Commission also approved proposed rule changes of the Amex and NYSE that eliminate certain restrictions imposed on approved persons[110] which own or control specialist units on the floor of the exchanges if the approved persons establish an organizational separation, or "Chinese wall," between its entity and the specialist unit.[111] It also approved a proposed rule change by the Amex to require specialists to accept stop orders in common stock and accept stop limit orders where the stop and prices are not identical.[112]

The Commission approved proposals by the NYSE to: (1) amend its rule pertaining to the execution of percentage orders to broaden the ability of NYSE specialists to represent percentage orders in the trading process by allowing the specialist to convert such orders into limit orders on destabilizing ticks;[113] and (2) establish, on a pilot basis, a policy for reviewing certain proposed mergers and combinations between specialist units that could, in the NYSE's view, potentially result in concentration levels harmful to the NYSE, the quality of its markets, and its specialist community.[114]

Finally, the Commission approved a proposal by the Cincinnati Stock Exchange (CSE) regarding an affiliation with the CBOE.[115] The affiliation provides CBOE members access to trading on the CSE by allowing CBOE members to become CSE members without having to purchase CSE certificates of proprietary membership. The affiliation, in part, is a result of the CBOE's desire to have access to a stock market in the event the side-by-side trading of options and stocks is commenced.

National Association of Securities Dealers, Inc.

The NASD, the only national securities association registered with the Commission, has over 6,600 member firms. In fiscal year 1987, the NASD reported the disposition of 415 formal and summary disciplinary actions and 194 formal and summary actions by its NASDAQ and Market Surveillance Committees.

In addition, the Commission received 46 filings of proposed rule changes from the NASD. The Commission approved 29 proposed rule changes in fiscal year 1987. The Commission approved NASD proposals: (1) extending for a two-year period the pilot program for the exchange of quotation information between the

NASD and the ISE;[116] (2) establishing a NASDAQ Workstation pilot that would update terminals used in the NASDAQ marketplace by providing a state-of-the-art workstation for NASDAQ market makers;[117] (3) amending Schedule D to the NASD's By-Laws which governs the operation of the NASDAQ system;[118] and (4) amending the NASD's Rules of Fair Practice to regulate members' communications with the public with regard to direct participation program advertising.[119]

The Commission also approved amendments to the NASD's Transaction Reporting Plan with respect to NASDAQ/NMS Securities. The purpose of the amendments was to specify eligibility requirements, including certain corporate governance standards, that determine the NASDAQ securities that can be included in the NMS and thus have real-time last sale reporting. The eligibility criteria were added to Schedule D of the NASD's By-Laws.[120]

Municipal Securities Rulemaking Board (MSRB)

In fiscal year 1987, the Commission received 14 proposed rule changes from the Municipal Securities Rulemaking Board and approved 11 MSRB rule filings. Of particular note was the approval of an amendment of Rule G-8(a)(xi) to require municipal securities dealers to record and maintain suitability information obtained pursuant to Rule G-19(b).

Clearing Agencies

During fiscal year 1987, the Commission received 98 proposed rule changes from registered clearing agencies and approved 93. The Commission approved self-regulatory organization rule changes designed to improve the transfer of customer accounts among member firms[121] and clearing agency rule changes establishing automated systems for transferring customer funds and securities among member firms.[122] The Commission also approved an NSCC proposal that established a Reorganization Processing System, which would allow, for the first time, centralized automated netting and settlement of transactions in securities subject to a reorganization (*e.g.*, a tender offer).[123] The Commission also approved changes to OCC's by-laws to clarify OCC's authority, and standards for the exercise of that authority, to adjust the terms of outstanding options contracts, among other things, for changes in securities underlying those contracts.[124]

SRO Surveillance and Regulatory Compliance Inspections

During the fiscal year 1987, the Commission conducted 23 inspections of SRO market surveillance, compliance, disciplinary and operational programs.

In fiscal year 1987, the staff completed a review of the NYSE program of formal discipline for floor trading violations. Since the previous inspection, the NYSE has made significant advances in its overall disciplinary program, resulting in the prosecution of more actions than in any other prior period. The inspection report noted a need for further progress in the areas of timeliness of disciplinary actions, the determination of sanctions, case management, and document control procedures.

An inspection was conducted of systems to detect and deter insider trading at three SROs and several broker-dealers. The staff reviewed surveillance procedures

for detection of insider trading at the NYSE, the Amex, and the CBOE. These systems were found to be operating effectively and additional enhancements were being implemented to further improve surveillance capabilities. The staff also noted that investigations resulting from surveillance procedures were generally thorough and well-documented. Nevertheless, the Division suggested that the SROs shorten the length of investigations. In an effort to improve the timeliness and quality of insider trading referrals to the Commission, the Intermarket Surveillance Group formed an insider trading subgroup. This subgroup, consisting of representatives from SROs and the Divisions of Market Regulation and Enforcement, formulated an insider trading initiative with the goal of reducing referral time on SRO investigations, along with proposals for enhancing communication and coordination between the SROs and the Commission. The initiative was endorsed and the Intermarket Surveillance Group was commended by the Commission for its efforts and response to the concerns in the marketplace regarding insider trading.

The inspection staff also visited several broker-dealers to examine their procedures for limiting access to market-sensitive information within multi-service firms. This "Chinese wall" inspection revealed that each firm used a different approach to control the flow of inside information through the Chinese wall, but that improvements could be made in documenting actions taken by the firm and in increasing the auditability of the process. Consequently, the NYSE agreed to include supervision of its members' Chinese walls in its regular examination program. The Commission plans to aid in development of an examination module and provide oversight of NYSE examinations.

An inspection of the new NASD free-riding and withholding program revealed significant improvement in surveillance of manipulation in newly issued securities. In January 1986, the NASD implemented new procedures for manipulation review into its oversight of new issues. Automated surveillance systems were combined with manual procedures and improved questionnaires to greatly enhance the prior review procedure. Minor recommendations were made regarding follow-up on questionnaires at the district level. Nevertheless, the NASD was commended for vastly improved procedures.

The Commission also conducted an inspection of NASD's surveillance of non-NASDAQ over-the-counter securities (commonly known as "pink sheet" stocks). In response to this inspection, the NASD has enhanced its "pink sheet" surveillance program by agreeing to review all non-NASDAQ issues rather than just those cleared by the NSCC. In addition, the NASD plans to implement a rule requiring member firms to submit information to the NASD that will aid in the surveillance procedure.

The May 1987 inspection of the PSE revealed significant improvements in surveillance procedures and implementation of an options audit trail. Additional recommendations for improvement of PSE surveillance systems were made in some areas. The PSE was advised to further automate options surveillance procedures by automating trading analyses of the underlying equities. In addition, the Commission suggested increased staffing and further automation of surveillance procedures.

The Commission also completed comprehensive inspections of the surveil-

lance, investigatory, and disciplinary programs for options and equities at the Phlx. In both options and equities, the inspection found that the Phlx had improved its surveillance procedures. The inspections also found improvement in timeliness and quality of investigations. The Commission had minor recommendations for strengthening Phlx penalties and for the specialist performance evaluation program.

During fiscal year 1987, the Commission completed an inspection of the surveillance, investigatory and disciplinary programs of the MSE. A review of the Listing Department was conducted as well. The MSE surveillance procedures and staffing levels were found to be satisfactory and minor recommendations were made regarding improvement in documentation of investigations and disciplinary actions. In addition, enhancements to surveillance procedures and Listing Department operations were advised.

An inspection of the CSE revealed adequate surveillance and compliance programs. However, due to increasing trading volume, improvements were recommended in the areas of documentation of daily surveillance and investigatory activity and informal disciplinary actions for minor CSE rule violations.

A comprehensive inspection of CBOE's surveillance and disciplinary program for trading violations was conducted in fiscal year 1987. The Commission found that the CBOE's three-year surveillance automation project was proceeding on schedule and promised to permit the surveillance program to keep pace with the CBOE's increasing options trading volume. The Commission made recommendations for enhancements to existing surveillance procedures and advised the CBOE to increase the severity of sanctions in appropriate cases of recidivist violations.

The Commission conducted a comprehensive inspection of the Amex. Specifically, the inspection focused on four major program areas: (1) routine options sales practices examinations of those firms for which the Amex is the designated options examining authority; (2) investigations of customer complaints, terminations of registered representatives for cause and firms' notices of disciplinary actions; (3) processing of formal disciplinary actions resulting from examinations and investigations; and (4) examinations and financial surveillance of those firms conducting a public business for which the Amex is the designated examining authority under Rule 17d-1 of the Exchange Act. Overall, the inspection disclosed that the Amex regulatory programs are functioning satisfactorily. The Commission did note delays in processing disciplinary actions as well as isolated deficiencies in the Amex's examinations and investigations of members' options sales practices.

The Commission conducted an inspection of the NYSE's handling of referrals (typically, customer complaints) from the Commission. The inspection disclosed that the initial processing of the referrals by the Customer Complaint Department was being handled satisfactorily. However, the inspection found deficiencies in investigations conducted by the Department of Enforcement. The NYSE represented that significant increases in staff would be made and that procedural and organizational changes were being made to improve the timeliness and quality of investigation of all cause matters, including those cases referred by the Commission.

The Commission also conducted an inspection of the MSE's broker-dealer ex-

amination, financial surveillance and formal disciplinary action programs, as well as the handling of customer complaints and Regulation T extension requests. The Commission concluded that the MSE is ensuring members' compliance with the federal securities laws in a satisfactory manner and is conducting effective regulatory programs with respect to MSE member firms. Minor deficiencies in the Regulation T and financial surveillance program were noted.

The Commission also conducted inspections of eight of the fourteen NASD district offices. Inspections of the district offices in California, Denver, Dallas, Atlanta, Chicago, Cleveland, Philadelphia and New York were conducted by the Commission's regional offices. As in prior years, the Commission noted isolated deficiencies in the districts' financial surveillance routine examination, cause investigation and formal disciplinary action programs. Nevertheless, the NASD district office inspections generally revealed that the NASD was satisfactorily meeting its oversight responsibilities under the Exchange Act. In particular, the Commission noted significant improvements in the district office in New York as a result of management and procedural changes. In addition, the Commission met with the NYSE and the NASD on a quarterly basis to discuss current regulatory, examination and oversight issues.

The staff completed a comprehensive review of securities industry sponsored arbitration that reflected the Commission's belief in the need for thorough oversight of SRO arbitration systems. The review found that while securities industry arbitration generally operates fairly, the process can be improved in a number of respects. Major recommendations regarding the operation of SRO arbitration systems have been sent to members of the Securities Industry Conference on Arbitration, the group that drafted the rules under which SRO arbitration operates.[125] The Commission's principal recommendations were that: (1) SROs establish standards for who may serve as a public arbitrator, (2) make publicly available summary data on the results of arbitrations, (3) adopt improved discovery procedures, (4) review arbitrator disclosure provisions, (5) implement effective arbitrator training programs, (6) institute arbitrator evaluation programs, and (7) explore flexible rules for large cases. The SROs have been asked to respond to the recommendations in fiscal year 1988.

Applications for Re-entry

During fiscal year 1987, the Commission received 103 SRO applications to permit persons subject to statutory disqualifications, as defined in Section 3(a)(39) of the Exchange Act, to become or remain associated with broker-dealers. The distribution of filings among the SROs was the following: NASD (89); NYSE (12); and Amex (2). Of the total filings processed, 8 applications were subsequently withdrawn, 99 were completed, and 4 were pending at year-end.[126] The Commission refused to take a no-action position in two applications.

As part of the review of SRO arbitration, the Commission examined the operation of the NASD's arbitration program. In addition to the recommendations set out above, the Commission recommended that the NASD improve the turnaround times of its cases. Discussions with the NASD on appropriate changes to its program should conclude in fiscal year 1988.

SRO Final Disciplinary Actions

Section 19(d)(1) of the Securities Exchange Act of 1934 and Rule 19d-1 thereunder require all self-regulatory organizations to file notice with the Commission of all final disciplinary actions.

A Rule 19d-1 filing reports a completed action that may have been initiated at any time during the previous years. The duration of a SRO action frequently reflects the severity of the violations(s) charged, the number of respondents involved, and the complexity of the underlying facts. SROs generally conclude cases involving minor or techincal violations with a single respondent in less than a year; cases involving serious trading violations (e.g., price manipulation, prearranged trading, front-running, etc.) require more time to complete because of the necessity to demonstrate specific intent to the disciplinary panel that acts as a trier of fact. Consequently, the volume of Rule 19d-1 notices submitted by a SRO in a given year is not a precise measure of its proficiency in market surveillance and compliance. Nevertheless, the number of actions reported can be useful in assessing the regulatory effectiveness of different SROs over similar time periods, and this information has proved useful in focusing inspections of SRO regulatory programs.

In fiscal 1987 the American Stock Exchange filed 44 Rule 19d-1 reports, the Chicago Board Options Exchange filed 145; the New York Stock Exchange filed 128; the Philadelphia Stock Exchange filed 11; the Pacific Stock Exchange filed 50; the Boston Stock Exchange filed none; the Midwest Stock Exchange filed 4; and the National Association of Securities Dealers filed 609.

Investment Companies and Advisers

Key 1987 Results

The Division of Investment Management oversees the regulation of investment companies and investment advisers under two companion statutes, the Investment Company Act of 1940 (Investment Company Act) and the Investment Advisers Act of 1940 (Investment Advisers Act), and administers the Public Utility Holding Company Act of 1935 (Holding Company Act).

Number of Active Registered Investment Companies and Investment Advisers

	FY'83	FY'84	FY'85	FY'86	FY'87
Investment Companies	2,057	2,210	2,458	2,912	3,305
Investment Advisers	7,043	9,083	10,908	11,707	12,690

Investment Company and Adviser Assets Under Management
(in billions)

	FY'83	FY'84	FY'85	FY'86	FY'87
Investment Companies	$360	$370	$ 525	$ 742	$1,200
Investment Advisers	$780	$850	$1,170	$1,400	$3,500

Inspections/Examinations of Investment Companies and Advisers

	FY'83	FY'84	FY'85	FY'86	FY'87
Investment Companies	348	497	567	643	739
Investment Advisers	737	837	1,039	1,263	1,294
Total Examinations	1,085	1,334	1,606	1,906	2,033

During fiscal year 1987, the number of registered investment companies increased by 13 percent and the assets they manage increased by 62 percent. The number of investment advisers registered increased by 8 percent and the assets they manage increased by 199 percent.

The number of investment company and investment adviser examinations completed during fiscal year 1987 exceeded 2,000 for the first time, almost double the number completed in fiscal year 1982.

During fiscal year 1987, the Division and the regional offices continued efforts to coordinate their regulatory activities with state authorities that share the Commission's jurisdiction over investment advisers, by conducting joint examinations, providing training for state examiners, and routinely sharing examination results.

The Commission staff is preparing a report on the financial planner industry, requested in July 1986 by Congressmen Timothy E. Wirth and Matthew J. Rinaldo of the House Committee on Energy and Commerce's Subcommittee on Telecommunications, Consumer Protection and Finance. The report will focus on the financial planning industry's customer demographics, planner characteristics, compensation, registration, inspection, and the National Association of Securities Dealers' (NASD) pilot project to inspect investment advisers who are also NASD members.

In June 1987, the Board of Governors of the National Association of Securities Dealers passed a resolution to take steps to become a self-regulatory organization with jurisdiction over the investment advising activities of its members and affiliates who are investment advisers. The Commission will consider the NASD proposal in greater detail after the related report on the financial planning industry is completed.

The Division's Office of the Chief Counsel coordinated the Division's work on a number of Commission-wide special projects and legislative initatives, including the Commission's internationalization and bank guarantee studies.

Disclosure Requirements

During fiscal year 1987, the Commission reproposed for comment Form N-7, a simplified form under the Securities Act of 1933 (Securities Act) and the Investment Company Act for all unit investment trusts other than insurance company separate accounts.[127] The Commission proposed for comment Rule 24f-3 under the Investment Company Act, which would provide a simplified method for unit investment trusts to pay securities registration fees imposed under the Securities Act.[128] In addition, the Commission adopted an amendment to Regulation S-X to require that registered investment companies account for net costs incurred under a Rule 12b-1 plan as an expense.[129] The amendment provides for uniform accounting treatment so that investors may more accurately compare investment results and expense ratios among investment companies. An amendment to Form N-SAR, the semi-annual report filed by investment companies, was proposed that would conform the form's change-of-accountant disclosure requirements to those of Form 8-K under the Exchange Act.[130]

The Commission also proposed amendments to Form N-1A, the registration form for mutual funds to provide for a consolidated table of expenses (fee table) near the front of the prospectus.[131] The fee table is intended to assist investors in comparing expenses among mutual funds.

EDGAR

In July 1985, the Office of Public Utility Regulation began accepting electronic filings from registered public utility holding company systems and their member companies. An EDGAR Pilot Branch was formed in October 1985, which began processing electronic filings for a volunteer group of investment company registrants in November 1985. The volunteers include a representative group of 184 management investment companies and 77 unit investment trusts with over 2,700 active series. Electronic filings on Form N-SAR, the semi-annual report of registered investment companies, also were made by 700 registered management investment companies not participating full-time in the EDGAR Pilot. As of September 30, 1987, the Commission received 16,368 investment company filings through the EDGAR Pilot Branch.

In March 1987, the Commission adopted a temporary rule and form to allow optional electronic filing of Form 13F, the report of securities holdings filed by institutional managers. The rule specifies a uniform format and requires that electronic filings of this form be made on magnetic tape. These electronic filings, which

should facilitate tabulation of 13F data, are expected to begin in November 1987, for the quarter ended September 30, 1987.

Regulatory Policy

In November 1986, the Commission adopted an amendment to Rule 31a-2 under the Investment Company Act to permit investment companies to maintain required records on magnetic tape, disk, or other computer storage media, in recognition of the greater use of computers in the industry.[132]

In December 1986, the Commission proposed Rule 11a-3 under the Investment Company Act, which would permit, under specified conditions, a mutual fund or its principal underwriter to make an exchange offer to the fund's own shareholders or to shareholders of another fund in the same family of funds. At the same time, the Commission proposed Rule 11c-1 under the Investment Company Act which would conditionally permit a unit investment trust or its sponsor to make exchange offers to certain unit holders.

In June 1987, the Commission proposed amendments to Rule 19b-1 under the Investment Company Act, which restricts registered investment companies to making one distribution of long-term capital gains for any one tax year, plus a supplemental distribution not exceeding ten percent of the prior distribution. The amendments, which were adopted in final form in October 1987, permit investment companies to make one additional distribution of longterm capital gains for any one tax year where the distribution is made to avoid the assessment of an excise tax on the investment company under the Internal Revenue Code, as amended by the Tax Reform Act of 1986.

In October 1987, the Commission adopted Rule 6c-9, which provides an exemption from the Investment Company Act for foreign banks selling their own debt securities or non-voting preferred stock in the United States. The rule also applies to the sale of those securities by a foreign bank's finance subsidiary.

Investment Advisers

The Commission adopted Rule 206(4)-4 under the Investment Advisers Act, which codifies an investment adviser's fiduciary obligation to give material financial and disciplinary information to clients.[133]

The Commission also issued Investment Advisers Act Release No. 1092, which sets forth uniform interpretations of federal and state investment adviser laws as they apply to financial planners and other persons. Developed jointly by the Commission's staff and the North American Securities Administrators Association, Inc., the release revised Investment Advisers Act Release No. 770 issued in August 1981. Among other things, it clarifies the definition of investment adviser as applied to financial planners and discusses the staff's view that an adviser's duty to disclose material facts includes the duty to disclose the various capacities in which the adviser might act when dealing with a particular client.

Insurance Products

One exemptive rule under the Investment Company Act has been proposed, and another adopted on a temporary basis, to facilitate the process under the se-

curities laws of bringing new variable insurance products to the marketplace. In March 1987, a new approach to exemptive relief for the deduction of mortality and expense risk charges from the assets of life insurance company separate accounts was introduced in the reproposal of Rule 26a-3. In May 1987, a new round of amendments to Rule 6e-3(T) became effective, essentially codifying relief granted in individual exemptive orders over the last several years, and updating the rule to reflect the latest features of flexible premium product designs.

In June 1987, the Commission issued a notice of the filing of an application by the College Retirement Equities Fund (CREF) and The Teachers Insurance and Annuity Association of America for an order granting exemptions from certain sections of the Investment Company Act and approving certain transactions in order to allow CREF to continue to operate as it had before agreeing to register as an investment company. A number of requests for a hearing were filed before the expiration of the notice period by CREF participants, colleges and universities, and mutual fund complexes. Several hearing requests were also filed on CREF's request for temporary exemptive relief pending the outcome of any hearing that might be ordered on its exemptive application.

Public Utility Holding Companies

There are now 13 registered public utility holding company systems with aggregate assets, as of June 30, 1987, of $87.3 billion, an increase of $4.3 billion, or 5.2 percent over June 30, 1986. Total operating revenues, as of June 30, 1987, were $31.9 billion, a $2.0 billion decrease from June 30, 1986. There are 68 electric or gas utility subsidiaries, 73 non-utility subsidiaries, and 24 inactive companies in the 13 registered systems, a total of 178 companies operating in 24 states (excluding seven power supply subsidiary companies).

In June 1987, the Commission published for comment a proposed amendment to Rule 45 under the Holding Company Act. The proposed amendment would make unnecessary the filing of declarations for orders of the Commission approving routine agreements where a parent company in a registered holding company system guarantees, assumes joint liability upon, or acts as surety or indemnitor for the obligations of its subsidiary company. Comments received have indicated that substantial savings will inure to consumers and shareholders by the adoption of the proposed rule amendment.

Holding Company Financings—During fiscal year 1987, the Commission authorized $6.3 billion of senior securities and common stock financing for the 13 registered systems: $5.0 billion in long-term debt financing, with $1.3 billion in common and preferred stock. Long-term debt financing decreased by 34.3 percent from fiscal year 1986, primarily due to an increase in long-term interest rates, which reduced the economic incentives to refinance. In addition, approximately $430 million in pollution control financing and $5.5 billion in short-term debt financing were approved. The pollution control financing was a 61 percent decrease from amounts authorized in fiscal year 1986. Short-term debt increased by 4.3 percent over the previous year. Total financings in fiscal year 1987 of $12.3 billion were less than financings authorized in fiscal year 1986 by $3.4 billion, a decrease of 21.9 percent. The Middle South Utilities, Inc. system accounted for approximately

15 percent of the total financing authorized under the Holding Company Act. The Commission also authorized over $1 billion for fuel exploration and development activities during fiscal year 1987. Substantial expenditures in fuel procurement were incurred through the acquisition of $546 million of nuclear fuel and over $380 million in coal mining equipment and refinancing.

The Commission's continuing review of holding company fuel procurement activities, accounting policies, audits of service companies and annual reports of the subsidiary service companies and fuel procurement subsidiaries, and the review of quarterly reports by non-utility subsidiaries resulted in savings to consumers during fiscal year 1987 of approximately $45.0 million.

The Commission required electric subsidiaries of public utility holding companies to credit revenues from their selling excess oil and gas ($32 million), and subleasing coal and oil barges ($13 million) to their fuel costs, reducing consumer electric bills.

Significant Applications And Interpretations

Investment Company Act—The Commission authorized ML-Lee Acquisition Fund, L.P., a limited partnership regulated as a business development company under the Investment Company Act, to make joint purchases with its investment adviser of so-called "mezzanine securities" (subordinated debt and preferred stock with equity participation) issued in connection with leveraged buyouts. ML-Lee Acquisition Fund is the first leveraged buyout investment company made available to retail investors. Its investment policies prohibit the fund from providing financing for hostile takeovers.

Applications of FmHA Trust and ED Trust were filed by private parties on behalf of trusts established to acquire loans made by the Farmers Home Administration of the Department of Agriculture and the Department of Education. Exemptive orders under the Investment Company Act were granted for the FmHA Trust on August 24, and for the ED Trust on September 18. The FmHA Trust and the ED Trust are collateralized by non-recourse loans originated by the respective agencies being sold as part of the federal government's pilot loan asset sales program.

An application filed by the National Rural Utilities Cooperative Finance Corporation was granted to exempt specified trusts it had established from most of the provisions of the Investment Company Act in connection with the public sale of certificates representing trust participation interests. Each trust will hold a single note guaranteed by the Rural Electrification Administration evidencing loans used to refinance borrowings from the Federal Financing Bank.

Holding Company Act—The Commission authorized Consolidated Natural Gas Company (Consolidated), a registered holding company, to form a new, wholly-owned, gas marketing subsidiary, CNG Trading Company (CNG Trading), to engage in the marketing of low cost, non-regulated gas supplies.[134] CNG Trading will purchase, pool, transport, exchange, store and sell gas supplies from competitively priced sources, including the spot markets, independent producers and brokers, as well as from Consolidated system producing affiliates, CNG Development Company and CNG Producing Company.

The Commission authorized Middle South Utilities, Inc. (MSU), a registered

holding company, and its wholly-owned generating subsidiary, System Energy Resources, Inc. (formerly Middle South Energy, Inc.), to guarantee potential rate refunding obligations of Mississippi Power & Light Company (MP&L), an operating subsidiary of MSU.[135] The guarantees were needed to obtain a bond to maintain a stay pending MP&L's appeal to the United States Supreme Court in the case of *Mississippi Power & Light Co. v. State of Mississippi.*

Central and South West Corporation (CSW), a registered holding company, and its wholly-owned subsidiary, CSW Credit, Inc. (CSW Credit) (collectively, Companies), was authorized to factor accounts receivable of the CSW electric utility companies.[136] Related financing was also approved. CSW Credit was also authorized by the Commission in July 1986, to purchase receivables of nonassociate electric utility companies, subject to the condition that the average amount of such purchases during any twelve-month period would be less than the corresponding amount of associate company receivables. Related financing was also authorized. The Companies are now requesting the removal of the limitation imposed by the 1986 order upon the factoring of nonassociate electric utility receivables by CSW Credit.

The Commission authorized Wisconsin Energy Corporation to acquire all of the common stock of the Wisconsin Electric Power Company and the Wisconsin Natural Gas Company, and exempted it from all provisions of the Holding Company Act except Sections 9(a)(2), subject to certain conditions.[137] Requests for a hearing were denied; however, jurisdiction was reserved on the retention of gas properties along with electric properties.

In a letter dated March 5, 1987, the Division stated it was unable to concur in the opinion of counsel for Noverco, Inc. (Noverco) that the acquisition by Noverco of the limited partnership interests of the limited partners in Energy Future Limited Partnership (EFLP) would not require prior approval by the Commission under Sections 9(a)(2) and 10 of the Holding Company Act. EFLP is the owner of all of the voting securities of New England Gas Corporation (NNEG). NNEG, in turn, owns all of the voting securities of Vermont Gas Systems, Inc. (VGS), a small gas utility incorporated and operating in Vermont. Based upon the facts and circumstances, the Commission was unable to conclude that the transaction would not constitute an indirect acquisition by Noverco of 5% or more of the voting securities of NNEG, and hence of VGS. Noverco is already an affiliate of a Canadian gas utility company.

In a letter dated June 18, 1987, to Central and South West Corporation (CSW), a registered holding company, the Commission refused to assure CSW that it would not recommend any enforcement action to the Commission under the Holding Company Act should a trust, funded by CSW, acquire shares of a non-affilated electric utility even though CSW would agree (1) not to acquire the shares from the trust without prior Commission approval under Section 9(a) of the Holding Company Act; and (2) to dispose of the shares held by the trust if approval for CSW to acquire them was denied or not received within a specified period. In the Commission's view, the acquisition by such a trust would constitute an indirect acquisition by CSW of public utility securities and would be unlawful under Section 9(a)(1) unless approved in advance by the Commission under Section 10.

Institutional Disclosure Program—Securities Exchange Act Section 13(f)(1)

and Rule 13f-1 require specified "institutional investment managers" to file quarterly reports on Form 13F. As noted above, under Rule 13f-2 (T), effective July 1, 1987, these managers may file the report on Form 13F-E through magnetic tape by using the Commission's pilot electronic disclosure system, EDGAR. Managers filing these reports disclose specified equity holdings of the accounts over which they exercise investment discretion. As of June 30, 1987, Form 13F reports had been filed by 1,683 managers for holdings totaling $1.375 trillion.

Form 13F reports are available to the public at the Commission's Public Reference Room promptly after filing. Two tabulations of the information contained in these reports are available for inspection: (1) an alphabetical list of the individual securities, showing the number of shares held by the managers reporting the holding; and (2) a list with the total number of shares of a security reported by all reporting managers. Both tabulations normally are available two weeks after the date on which the reports must be filed.

The tabulations are prepared by a independent contractor selected through the competitive bidding process. The contractor provides its services to the Commission without charge, and is required to make a variety of specified tabulations available to the public at reasonable prices within ten days after receiving the reports.

The General Counsel represents the Commission in all litigation in the United States Supreme Court and the Courts of Appeals, defends the Commission and its employees when sued, prosecutes administrative disciplinary proceedings against securities professionals, and appears amicus curiae on behalf of the Commission in significant private litigation involving the federal securities laws. In addition, under the supervision and direction of the General Counsel, the regional offices represent the Commission in corporate reorganization cases under the Bankruptcy Code that have a substantial public investor interest. The General Counsel also analyzes legislation that would amend the federal securities laws or otherwise affect the Commission's work and prepares legislative comments and congressional testimony. In addition, the General Counsel reviews proposed Commission action to ensure that enforcement and regulatory programs are consistent with the Commission's statutory authority.

The General Counsel represented the Commission in 304 litigation matters in fiscal year 1987. During the year, 36 court of appeals and Supreme Court cases were concluded, all but three favorably to the Commission. There were 16 appeals in Commission injunctive actions, six of which were concluded, with only one outcome unfavorable to the Commission. By comparison, the General Counsel handled 285 litigation matters in fiscal year 1986, including 18 appeals in injunctive actions. Seven such appeals were concluded in 1986, with only two outcomes unfavorable to the Commission.

In fiscal year 1987, there also were 23 appellate and district court actions seeking to overturn Commission orders in administrative proceedings or affirming self-regulatory organization disciplinary proceedings against securities professionals. Of these appeals, ten were concluded, with only one adverse result. Eight such actions were concluded in fiscal year 1986, with no adverse results.

The Commission participated as amicus curiae in 46 cases during the year, compared to 42 such cases in fiscal year 1986. It participated in nine private cases that were decided, only one of which resulted in a decision adverse to the Commission.

The General Counsel also handled more than 217 other proceedings before the Commission or in the federal district courts. These included 56 suits brought

against the Commission or its staff, and 86 suits seeking access to Commission documents, including actions under various public information statutes. Of the latter, 78 suits involved discovery subpoenas in private actions where the Commission is not a party. In fiscal year 1986 there were 24 suits brought against the Commission or its staff and 54 suits (including 46 third-party subpoenas) under the various public information statutes.

During fiscal year 1987, 94 debtors with publicly-held securities registered under the Securities Exchange Act of 1934 (Exchange Act) commenced Chapter 11 reorganizations. The Commission entered its appearance in 32 of these cases, which involved assets of $22.6 billion and nearly 380,000 public investors. The largest of these proceedings was that of Texaco, Inc., with $18.3 billion in assets and about 275,000 public investors. The 32 Chapter 11 cases are set forth in Table 38 of the Appendix to this report.

In addition to litigation, the General Counsel is involved in significant legislative and regulatory work. For example, the office assisted the Chairman and the Commissioners in preparing testimony on a number of important issues, such as the Commission's insider trading program and development of a definition of insider trading; securities laws aspects of the sale of federal government loan assets; regulation of corporate takeovers; and the proposed Agricultural Credit Act of 1987, which would provide for the creation of securities backed by pooled Farmers Home Administration loans. The office also assisted the Commission in preparing a legislative proposal to amend the Exchange Act to permit the Commission to regulate certain brokerage activities of banks.

Litigation

Appeals In Commission Enforcement Actions—This litigation consists of appeals of district court decisions in Commission injunctive actions. In most cases, the defendants ask a court of appeals to reverse a district court's finding of securities violations and its order enjoining future violations or providing for other relief such as disgorgement of illegal profits. The Commission also may appeal when it is denied relief.

In *SEC v. Burns,*[138] the United States Court of Appeals for the Ninth Circuit affirmed a district court decision that a company's chief executive violated a Commission rule prohibiting participants in a stock distribution from purchasing that stock during the distribution. The defendant had provided two corporate officers with company funds to buy stock during the distribution. He argued that he did not violate the rule because some of the purchases had been made before the registration statement was filed and hence before the "distribution" commenced, and because the remaining purchases were made after the distribution was completed. The court held that a distribution of securities may commence whenever there is an incentive to influence the market artificially, even before a registration statement is filed. Because the defendant had such an incentive in this case, the purchases took place during a distribution. Moreover, the court held that any inducement to purchase securities during the distribution period violates the rule, even if the actual purchase is made outside that period. The court also affirmed the district court's decision that the defendant acted with scienter when the company improperly inflated its revenues in financial statements filed with the Commission.

The Commission has appealed to the United States Court of Appeals for the District of Columbia Circuit a district court decision refusing to enter an injunction, on First Amendment grounds, against a magazine publisher for violating the touting disclosure provision of the Securities Act of 1933 (Securities Act). In *SEC v. Wall Street Publishing Institute, Inc.*,[139] the Commission had requested an injunction to require a publisher to disclose that drafts of articles promoting securities of companies were supplied by those companies. The Commission argued that such an injunctive order, written in the language of the statute, is a valid way to enforce an antifraud provision, and thus is not an impermissible prior restraint of the press.

In *SEC v. The American Board of Trade, Inc.*,[140] the United States Court of Appeals for the Second Circuit affirmed a district court decision to appoint a receiver for the defendant companies and their affiliates. The court had previously issued two decisions in this litigation holding that the defendants were illegally selling corporate notes issued by one of the defendant companies,[141] and that the defendants could not effect registration of the notes because the defendants were unable to provide required certified financial statements.[142]

Finally, the positions of the Commission were affirmed without opinion in two cases. In *SEC v. Charles Byers*,[143] the United States Court of Appeals for the Third Circuit affirmed a district court decision ordering that all of the proceeds of illegal securities sales be distributed to all defrauded investors on a *pro rata* basis, rather than imposing a constructive trust on some of the proceeds in favor of certain investors. In *SEC v. Zoe Products, Inc.*,[144] the United States Court of Appeals for the Ninth Circuit affirmed the district court's entry of summary judgment for the Commission, finding that the company and its chief executive officer acted with scienter when they recklessly misstated facts concerning the company's financial condition and future business prospects.

Petitions to Review Commission Orders—Petitions to courts of appeals for judicial review of Commission orders arise from administrative proceedings conducted under various provisions of the federal securities laws. These proceedings include Commission review of disciplinary actions by national securities exchanges and the National Association of Securities Dealers, Inc. (NASD), which often involve interpretative issues central to the Commission's own enforcement program and thus to the integrity of the securities markets.

During fiscal year 1987, petitions for review were filed in several cases where the Commission proceeded against broker-dealers for underwriting violations. In *C.E. Carlson, Inc. and Charles E. Carlson v. SEC*,[145] a broker-dealer and its president have requested review by the United States Court of Appeals for the Tenth Circuit of a Commission decision imposing sanctions for fraudulently closing a "part-or-none" public offering. Petitioners, without disclosure to purchasers, personally bought the final twelve percent of the shares needed to close the offering, financed the purchases in large part with loans arranged from persons with a financial interest in the offering, and then repaid the loans with money obtained from the proceeds of the offering. The Commission had ruled that these transactions defrauded public investors by vitiating the part-or-none condition on which they had relied.

Similarly, in *Lowell H. Listrom & Co. v. SEC*,[146] the United States Court of Appeals for the Eighth Circuit affirmed the Commission's determination that a

broker-dealer violated Exchange Act recordkeeping, confirmation, and credit-extension regulations in connection with "best-efforts" underwritings. In affirming the Commission's decision, the court gave substantial deference to the Commission's interpretation of its own rules. The court also agreed with the Commission's finding that the broker-dealer, by paying for the securities of certain customers in the underwritings, had extended credit to those customers in violation of the Exchange Act.

A third case, pending before the District of Columbia Circuit, seeks review of a Commission decision upholding NASD sanctions imposed on principals of a broker-dealer for concealing their purchases of approximately one million shares in a "best efforts, all-or-none" public offering. In *Svalberg v. SEC,* consolidated with *Lippitt v. SEC,*[147] petitioners argue that their purchases were immaterial, that they acted without scienter, and that the Commission abused its discretion in affirming their sanctions. The Commission argues that the purchases were material and that petitioners' conduct constituted knowing or reckless misrepresentation in connection with the purchase of securities. Moreover, an underwriter's undisclosed actions to complete an otherwise unsuccessful all-or-none offering are fraudulent.

Review has been sought in two cases where the Commission held that securities professionals failed to determine whether sales were part of an unregistered distribution. For example, in *Butcher & Singer, Inc. and Thomas A. Grey v. SEC,*[148] the United States Court of Appeals for the Third Circuit affirmed the Commission's determination that a broker-dealer violated the registration provisions of the Securities Act by failing to conduct an inquiry into the need for registration when one of the firm's salesmen sought to sell, through the firm, a large amount of a little-known stock he owned. The Commission had found a breakdown in the firm's compliance procedures because the trader who sold the salesman's stock did not make a thorough inquiry into the need for registration or delegate that responsiblity to someone else within the firm.

Similarly, in *Kane v. SEC,*[149] a registered representative of a broker-dealer seeks review of a Commission order suspending him from association with any broker-dealer for six months because of his participation in the sale of unregistered securities. The Commission argues that the petitioner was responsible for determining whether the securities could be sold without registration, and that he failed to make the "searching inquiry" necessary for this determination. The Commission contends that the sanction imposed on the petitioner, which the court may reverse only for gross abuse of discretion, was not too severe, and is appropriate to deter Kane and others from such violations in the future.

The severity of a sanction imposed by the Commission is frequently challenged. In *Kuznetz v. SEC,*[150] the United States Court of Appeals for the District of Columbia Circuit upheld a Commission order barring petitioner from association with any broker or dealer based on a finding that he defrauded customers by making false and misleading representations about a company's stock. Petitioner had argued that the Commission failed to specify its reasons for increasing the sanction recommended by the administrative law judge and abused its discretion when it barred him from association with a broker or dealer. In upholding the sanction, the Court pointed to the Commission's findings that petitioner had extensive experi-

ence in the securities business, that he had engaged in serious misconduct over the course of a year, and that he must have been aware that there was no reasonable basis for his recommendations to his customers.

The United States Court of Appeals for the District of Columbia Circuit affirmed the Commission's imposition of a six-month suspension in *Dirks v. SEC.*[151] The sanction was levied pursuant to the Securities Investor Protection Act of 1970 (SIPA) after the Commission found that petitioner was negligent when he failed to take appropriate action in response to warnings that the brokerage firm of which he was general partner was in precarious financial condition. The Commission found that his negligence contributed to the firm's insolvency and subsequent liquidation. Petitioner argued that the sanction provision of SIPA, which authorizes the Commission to impose sanctions if "in the public interest", is unconstitutionally vague. The Court, however, found that when Congress directs an agency to act in the public interest, it is the agency's job to define that standard. In this case, the Commission had given petitioner fair warning of what conduct was proscribed because a prior administrative opinion had announced the use of a negligence standard for sanctions under SIPA.

Petitioners in *Blinder, Robinson & Co. and Meyer Blinder v. SEC,*[152] also pending before the District of Columbia Circuit, make a broad attack on, among other things, the Commission's sanction determinations. The Commission had suspended a broker-dealer's registration for 45 days, limited the firm's underwriting activities for two years, and barred its president from association with any broker-dealer—provided that he may reapply for association after two years. The Commission proceeding was based on the entry of an injunction against petitioners in a prior Commission civil action and on the findings of violations made in that action. Petitioners argue that the Commission employs a "double standard" in sanctioning broker-dealers based on whether they are affiliated with the New York Stock Exchange (NYSE). The Commission's order imposing sanctions found that, in light of petitioners' serious and repeated violations and their regulatory history, the sanctions were well within the Commission's discretion.

In the same case, petitioners also attack the Commission enforcement action that was the basis for the administrative proceeding. They argue that the formal order authorizing the investigation violated the Fourth Amendment. The Commission responds that, since a formal order is neither a search nor a seizure, the Fourth Amendment does not apply. Separately, petitioners argue that it is a violation of due process for the Commission to litigate an injunctive action in district court and then initiate an administrative proceeding to impose sanctions for the same conduct.[153] The Commission argues that it is well-established that administrative agencies may combine investigatory, prosecutorial and adjudicative functions. Moreover, there is no due process violation where an independent decisionmaker —a federal court—decides that petitioners have violated the securities laws, and the Commission subsequently makes a separate determination of whether the public interest requires a limitation upon petitioners' participation in the securities business.

Petitioners also have sought judicial review of Commission orders in a variety of other contexts. For example, the United States Court of Appeals for the Eighth Circuit affirmed the Commission's order in *Pagel, Inc. v. SEC,*[154] where the Commis-

sion had found that, through the use of nominee accounts and other manipulative devices, a broker-dealer and certain of its affiliates had unlawfully manipulated the market price of common stock issued in connection with the first public offering of an unseasoned research and development company.

The United States Court of Appeals for the Ninth Circuit is currently considering a petition to review the Commission's order in *Rutherford v. SEC.*[155] In that case, the Commission had affirmed a two-month bar imposed by the NYSE against the petitioner for deliberately lying on the Uniform Application for Securities Industry Registration in response to two questions concerning arrests and convictions. Petitioner insists, among other things, that there is no public interest in imposing a sanction since his arrests and conviction were not securities-related. The Commission contends that the sanction was not imposed on petitioner because of his arrest and conviction record, but because he deceived the NYSE. Therefore, it was in the public interest to sanction him to deter future acts of deception.

Finally, in *Newell v. SEC,*[156] the United States Court of Appeals for the Ninth Circuit dismissed a petition for review of a Commission order as untimely on the ground that it was filed 63 days after the date of entry of the order, instead of within the 60-day period allotted by statute. Newell contended that, for purposes of appellate jurisdiction, the date of entry of the order was the date on which notice of the order is received. The court, however, agreed with the Commission that, under the Commission's Rules of Practice, the date of "entry" of a Commission order is "the date of the adoption of the order by the Commission, as reflected in the caption of the order," and held that the rule is appropriate.

Constitutional Challenges To Commission Enforcement Authority—In several recent cases, defendants in Commission enforcement actions have moved to dismiss suits on the ground that the Commission, as an independent agency whose members are not removable at will by the President, is barred by Article II of the Constitution from bringing enforcement actions. These defendants argue that law enforcement is an executive function that may only be exercised by an official who serves at the pleasure of the President.

In *SEC v. Thomas,*[157] the court denied this constitutional challenge from the bench. In *SEC v. Warner,*[158] the court rejected the constitutional attack in a written opinion relying heavily on a 1935 Supreme Court decision.[159] And in *The American Board of Trade, Inc. v. SEC,*[160] the court dismissed an action for declaratory and injunctive relief without reaching the constitutional issue, holding that plaintiffs could assert their claim as a defense in two pending Commission enforcement actions.

Another district court rejected a similar argument in *SEC v. Blinder, Robinson & Co.*[161] The defendants in that case subsequently raised the argument in two pending appeals—one to the United States Court of Appeals for the Tenth Circuit from the district court's denial of a motion to vacate an injuntion in the Commission's enforcement action,[162] and another to the United States Court of Appeals for the District of Columbia Circuit for review of a Commission order in an administrative proceeding.[163] In both cases, the Commission argues that the President's substantial authority over the Commission, including "for cause" removal power, satisfies the constitutional requirement that the President "take care that the Laws be faithfully executed."[164]

Commission Participation in Private Litigation—The Commission also participates as a friend of the court in selected private lawsuits that involve significant securities law issues. Such litigation is an important supplement to the Commission's enforcement program. In addition, because the federal securities laws provide for private remedies as well as government enforcement actions, decisions in private cases may have precedential effect on the Commission's own regulatory activities.

In *Shearson/American Express v. McMahon,*[165] the Supreme Court ruled, in accordance with arguments advanced by the Commission, that the Exchange Act does not preclude enforcement of pre-dispute arbitration agreements between brokers and customers to resolve Rule 10b-5 claims. The Commission had urged that a 1953 decision[166] holding a pre-dispute arbitration agreement unenforceable was not applicable in light of the expanded authority given to the Commission under the Exchange Act since 1975 to regulate arbitration procedures and ensure that statutory rights are adequately protected.

The Commission has participated in several cases concerning the availability of private remedies under the federal securities laws. *Pinter v. Dahl,*[167] pending before the Supreme Court, concerns what relief is available, and who may be liable, under Section 12(1) of the Securities Act, which provides a private remedy of rescission for violations of the Act's registration provisions. A purchaser of unregistered securities who had encouraged his co-plaintiffs to purchase brought this action to rescind the sales. The defendant argued that the plaintiff was "in pari delicto," or at equal fault, with the defendant and could not, therefore, rescind his purchases. The Commission takes the position that the issuer may raise an "in pari delicto" defense where (1) the plaintiff primarily promotes, rather than invests in, the securities offering, and (2) the plaintiff bears substantially equal responsibility for the issuer's failure to register the securities or for the decision to conduct the offering in a manner that requires registration. The Commission also takes the position that only persons who either pass title or who solicit a purchase may be found liable for the private remedy of rescission under Section 12(1). By contrast, Commission enforcement actions for violations of the registration provisions of the Securities Act may be brought against a broader range of persons, including aiders and abettors of the seller.

In the case of *Ettinger v. Merrill Lynch,*[168] a private litigant sued Merrill Lynch under Rule 10b-5 for selling zero-coupon bonds at alleged undisclosed excessive mark-ups. In a brief filed with the United States Court of Appeals for the Third Circuit, the Commission urged reversal of the district court's determination that a broker-dealer's compliance with routine confirmation disclosure requirements precludes fraud liability for undisclosed excessive mark-ups. The Commission also reiterated its long-standing position that undisclosed excessive mark-ups by securities dealers violate the general antifraud provisions of the securities laws.

In another case concerning the liability of a brokerage firm, the Commission has disagreed with a district court's determination that, when a firm employs a salesman as an "independent contractor," the firm cannot be liable for the actions of the salesman when he steals its customers' money. In *Hollinger v. Titan Capital Corp.,*[169] pending before the United States Court of Appeals for the Ninth Circuit, the Commission argues that, when a firm's salesman is not himself registered as a

broker-dealer, the salesman is an associated person of the firm, which has a duty to supervise him.

In *AZL Resources, Inc. v. Margaret Hall Foundation, Inc.*,[170] the Commission filed a brief urging that certiorari be denied on the question whether Exchange Act provisions that make a "controlling person" liable for acts of a company's employees or agents displace common law principles of vicarious liability. The Commission took the position that this question was not squarely presented in the case because the complaint alleged a claim that the company was directly liable for the fraud at issue. The Supreme Court denied certiorari.

The Commission filed a friend of the court brief in the United States Court of Appeals for the Second Circuit in *Brawer v. Options Clearing Corp.*[171] This case raised the question of whether there is an implied right of action, under Exchange Act provisions relating to clearing agencies and stock exchanges, for violations of the Options Clearing Corporation (OCC) by-law provision requiring adjustment of options prices and terms in the event of certain recapitalizations. The Second Circuit agreed with the Commission's position that options investors and the options markets generally are best served if the adjustment rule, which entrusts the decision to adjust the terms of an option contract to an OCC committee in its "sole discretion," is interpreted to be unreviewable except upon a showing of bad faith by the decisionmakers.

The Commission recently filed briefs in two cases addressing the question whether certain debt instruments issued by corporations not subject to federal bank regulation are securities under the federal securities laws. In *Holloway v. Peat, Marwick, Mitchell & Co.*,[172] the district court held that debt instruments sold to the public by a finance company, a trust company, and their parent holding company met the statutory definition of "security." Nevertheless, relying on *Marine Bank v. Weaver*,[173] the court concluded that the trust company instruments were not securities subject to regulation by the Commission. On appeal to the United States Court of Appeals for the Tenth Circuit, the Commission argues that the exception identified by the Supreme Court in *Marine Bank* was based on the applicability of a comprehensive federal bank regulatory scheme designed to ensure the solvency of the issuing bank and the safety of deposits. In *Holloway*, however, the issuers were not subject to federal bank regulation, or even to a comparable state bank regulatory scheme. Thus, the Commission urges that there is no justification for ousting the protection of the federal securities laws.

Similarly, in *Sanderson v. Roethenmund*,[174] the Commission contends that certain instruments called International Certificates of Deposit that are issued by a corporation not subject to bank regulation are securities under the federal securities laws because: (1) they are "notes" within the definition of "security" in the Securities Act and the Exchange Act; and (2) they are not subject to the *Marine Bank* exception. Additionally, the Commission argues that, because these instruments are within the statutory definition of security, they need not satisfy the test for "investment contract" under the law.[175]

The Commission successfully urged the United States Court of Appeals for the Tenth Circuit in *Busch v. Carpenter*[176] to reverse the district court's finding that certain securities were exempt from registration under the Securities Act's intrastate offering exemption. The court agreed with the Commission that this exemp-

tion is only available for a distribution of securities (including resales by persons purchasing without investment intent) within one state by an issuer "doing business" within that state. The court disagreed, however, with the Commission's position that the defendant must show that the original buyers bought with investment intent. Rather, it held that the defendant may make a prima facie case that the securities were distributed in-state by demonstrating that the stock was originally sold only to residents of that state. The plaintiff then has the burden of showing that the distribution continued through resales by those persons.

Finally, the Supreme Court, in an opinion involving the impact of the Hague Evidence Convention on the use of traditional discovery procedures, agreed with the position urged by the United States and the Commission that the Convention does not provide the exclusive means for obtaining evidence abroad. In deciding *Societe Nationale Industrielle Aerospatiale v. United States District Court for the Southern District of Iowa,*[177] the Court also rejected the argument that, before litigants may use ordinary discovery methods, they must resort to Convention procedures. Instead, the Court held that the particular facts of the case—including sovereign interests and the likelihood that resort to the Convention's procedures will prove effective—should determine whether the Convention procedures should be used.

Trading On Material Non-Public Information—Cases involving trading on material nonpublic information continue to be litigated actively. This year the Commission participated on appeal in three such cases.

In *Carpenter v. United States,*[178] the Commission and the United States argued to the Supreme Court that it should sustain the criminal convictions for securities, mail, and wire fraud of a newspaper reporter and two of his associates for trading securities while in possession of market-sensitive information stolen from the reporter's employer. On the securities law issue, the Government argued that their fraudulent scheme to purchase securities on the basis of nonpublic information stolen in breach of the reporter's fiduciary duty to his employer violated the federal securities laws. A primary purpose of the antifraud provisions is to preserve the integrity of the securities markets, and that integrity is threatened whenever persons obtain an unfair advantage by trading on stolen nonpublic information. Subsequent to the close of the fiscal year, the Supreme Court unanimously affirmed the mail and wire fraud convictions, and affirmed by an equally divided court the securities fraud convictions.

In *SEC v. Certain Unknown Purchasers of the Common Stock and Call Options of Santa Fe International Corp.,*[179] an action based on illegal insider trading, two objectors to a Commission settlement appealed to the United States Court of Appeals for the Second Circuit a decision by the district court to limit recovery from the disgorgement fund to those who sustained net losses during the period of illegal trading alleged in the Commission's complaint. The court dismissed the objection of one investor whose losses occurred before that period. With respect to the other investor, who had traded during the time period but who had sustained no net losses, the Court held that, in light of the limited size of the disgorgement fund, it was reasonable for the district court to allow recovery only for investors who suffered over-all losses.

Finally, in another insider trading action, *SEC v. Tome,*[180] the United States

Court of Appeals for the Second Circuit affirmed a judgment in favor of the Commission against defendants who traded on nonpublic information about a corporate takeover. The district court had enjoined the defendants—an Italian national, an Italian broker-dealer, and three Panamanian corporations—from further antifraud violations and ordered disgorgement of more than $5.1 million in illegal profits and interest. The court of appeals rejected the argument of the Italian defendants that the district court never obtained jurisdiction over them because they were never served personally with the complaint in the proceeding, but were served instead by notice published in a newspaper. Under the circumstances of this case—including efforts by the Italian defendants to deceive the Commission about their involvement in the illegal trades and difficulties posed by foreign bank secrecy laws—the publication notice was found by the court to be adequate and not in violation of constitutional due process guarantees. The court also dismissed arguments raised by all the defendants about the admissibility and sufficiency of the evidence, and rejected a challenge to the lower court's disgorgement order. (The court had earlier granted the Commission's motion to dismiss the appeal of another defendant in this case, who has refused to appear in response to an arrest warrant issued in a related criminal case, on the ground that he is a fugitive from justice.)

Tender Offer and Merger Litigation—This year, as in past years, the Commission filed friend of the court briefs in several cases involving tender offers and mergers.

In *CTS Corp. v. Dynamics Corp.*,[181] the Supreme Court upheld the constitutionality of the Control Share Acquisitions Chapter of the Indiana Business Corporation Law. The Commission and the United States had argued that the statute, which strips certain securities purchasers of voting rights unless "disinterested" shareholders vote to restore them, is an unconstitutional restraint on interstate commerce. The Court rejected that argument, holding that the statute, to the limited extent it affects interstate commerce, is justified by the state's interests in defining the attributes of shares in its corporations and in protecting shareholders. The Court also found that the statute does not discriminate against interstate commerce in securities since it does not distinguish interstate from intrastate acquisitions, and does not create an impermissible risk of inconsistent regulation by different states. In addition, the Court held that the Williams Act does not preempt the Indiana statute.

In a pending case, *Basic Incorporated v. Levinson*,[182] the Commission filed a brief in the Supreme Court concerning the standard for assessing the materiality of merger negotiations under Rule 10b-5. The brief also addresses the issue of whether the fraud-on-the-market theory can be used to show a plaintiff's reliance on fraudulent corporate statements. The Commission argues that the proper standard for materiality is whether a reasonable investor would consider the information significant in making investment decisions. The significance to investors of an uncertain event, such as a prospective merger, depends on balancing the importance of the merger to the company against the likelihood of its occurrence; merger activity is material if the activity significantly increases the possibility of a value-affecting merger. The Commission also argues that the fraud-on-the-market theory is appropriate where there is an active secondary market, so that the

price of securities reflects corporate misstatements disseminated in the marketplace. A plaintiff who relies on a market price that reflects fraudulent statements may be deemed to have indirectly relied on the fraudulent statements. Furthermore, the Commission argues, it is appropriate to presume that prices in active secondary markets do reflect corporate statements and that investors do rely on the integrity of the prices in those markets in making investment decisions.

At the request of the United States Court of Appeals for the Ninth Circuit, the Commission filed a brief in *Newmont Mining Corp. v. Pickens, et al.*,[183] arguing that the federal securities laws do not require that a tender offeror have a firm financing commitment in place before commencing a tender offer. Rather, the Commission argued, an offeror must fully and accurately disclose whatever financing arrangement has been made, and later amend its disclosure statement if and when it acquires firm financing. This may require the offeror to extend the period of the tender in order to give shareholders an adequate opportunity to consider the new information. The court held, in a two-to-one decision, that the federal securities laws do not require that a tender offeror have fixed financing before it commences an offer.

The Commission filed a friend of the court brief in the Texas Supreme Court in the case of *Texaco, Inc. v. Pennzoil Co.*,[184] supporting review of an intermediate state appellate court ruling that Pennzoil's contract to purchase stock did not violate Commission Rule 10b-13. The rule prohibits persons who have made a tender offer for a security from purchasing, or making an arrangement to purchase, the security other than through the tender offer. The Commission argued in its brief that the alleged contract was an arrangement by Pennzoil to purchase stock outside of its outstanding tender offer for that stock, and thus violated the rule. The Texas Supreme Court, finding no reversible error, refused to review the case.

Litigation Involving Requests for Access to Commission Records—Although the Commission received more than 5,000 Freedom of Information Act (FOIA) and confidential treatment requests in fiscal year 1987, only three of those requests resulted in the filing of court actions against the Commission. Two cases were resolved favorably to the Commission, and the third, decided adversely to the Commission, is on appeal. The Commission received 1,908 requests under the FOIA for access to Commission records and 3,205 requests for confidential treatment from persons who submitted information. In fiscal year 1987, there were 69 appeals of FOIA request denials to the Commission's General Counsel and four appeals of confidential treatment request denials.

In one of the FOIA cases, *Occidental Petroleum Corp. v. SEC*,[185] the plaintiff sought review of the Commission's partial denial of its request for confidential treatment of documents obtained by the staff during its investigation of questionable foreign payments by Occidental. The district court remanded the matter to the Commission for revision of its confidential treatment procedures and reconsideration of Occidental's request. The Commission's appeal of the district court's order is pending.

Litigation Against the Commission and Its Staff—During fiscal year 1987, the Commission and its staff were defendants in 56 actions in which persons sought to challenge Commission rules, to enjoin Commission law enforcement efforts, to

obtain awards for damages, or to challenge personnel decisions. The Commission prevailed in all but one of the 15 cases decided during the fiscal year.

In *Sprecher v. Fischer,*[186] the United States Court of Appeals for the Second Circuit upheld a district court order dismissing Sprecher's second challenge of an ongoing Commission investigation. The district court concluded that *res judicata* and collateral estoppel barred his claims. In *Panaro v. von Stein,*[187] the plaintiff has alleged that the same Commission investigation challenged in *Sprecher v. Fischer,*[188] is unlawful. Panaro's motion to dismiss the complaint with prejudice as to two defendants, and without prejudice as to the others, is pending.

In *Kendrick v. Zanides,*[189] plaintiff brought a baseless retaliatory private damages action against the Commission staff members who participated in successful civil and criminal prosecutions against him for various federal securities law violations. After dismissing the action, the court awarded the Commission attorney's fees as a sanction against plaintiff's counsel for filing this frivolous case. Plaintiff's counsel appealed the fee award to the United States Court of Appeals for the Ninth Circuit, but subsequently withdrew the appeal.

Three actions were filed under the Right to Financial Privacy Act seeking to block Commission subpoenas of bank records. In each of these cases, the district court found that the Commission was seeking the records for a legitimate law enforcement inquiry and ordered compliance with the Commission's subpoenas.

In addition, two motions were filed in fiscal year 1987 under the Equal Access to Justice Act seeking attorneys fees and expenses. The court awarded fees in the first case. The Commission's appeal of that award is pending. In the second action, an insider trading case, the court found that the Commission was substantially justified in bringing the suit and denied defendants' fee applications. The defendants' appeal of that order is pending.

Finally, three court actions were filed against the Commission raising allegations of illegal discrimination under Title VII of the Civil Rights Act of 1964. One of these actions is pending; the other two were decided favorably to the Commission.

Significant Legislative Developments

Insider Trading—On December 11, 1986, former Chairman Shad testified before the Subcommittee on Oversight and Investigations of the House Committee on Energy and Commerce concerning the Commission's insider trading program. The Chairman discussed some of the Commission's recent significant insider trading cases, observing that these developments demonstrated the Commission's enhanced abilities to discover and prosecute inside traders.

During the 100th Congress, the Senate held a series of hearings on legislation to define insider trading. On June 19, 1987, Commissioner Cox testified before the Subcommittee on Securities of the Senate Banking, Housing and Urban Affairs Committee, concerning a statutory definition of insider trading. He stated that the Commission could support a statutory definition that preserved its enforcement authority, but the Commission did not support S. 1380, a proposal before the Subcommittee, because certain provisions in the bill would impede enforcement efforts. At the request of the Subcommittee, the Commission prepared its own proposal for an insider trading definition, which was submitted to the Subcommittee on August 3, 1987, and discussed by Commissioner Cox in testimony on August

7. Following the August 7 testimony, at the request of Senators Riegle and D'Amato, the Commission participated in efforts to develop a consensus proposal for legislation defining insider trading. As a result of this process, on November 18, 1987, the Commission submitted revised legislation defining insider trading.

Regulation of Corporate Takeovers—Both the House and Senate actively considered legislation concerning the regulation of corporate takeovers during the first session of the 100th Congress. In April 1987, Commissioner Cox testified before the Subcommittee on Antitrust Monopolies and Business Rights of the Senate Judiciary Committee. His testimony summarized the Commission's recent activity in the tender offer area and discussed various proposals for amending the law governing takeovers.

On June 23, 1987, Commissioner Cox testified before the Senate Committee on Banking, Housing and Urban Affairs concerning proposed corporate takeover legislation. Subsequently, on September 17, 1987, Chairman Ruder testified before the Subcommittee on Telecommunications and Finance of the House Committee on Energy and Commerce concerning legislative proposals on takeovers. The Commission's testimony generally supported legislation that would reduce the initial Schedule 13D filing period and, until a Schedule 13D is filed, prohibit further acquisitions once the filing threshold is crossed. The Commission also favored legislation to enhance its enforcement remedies for violations of the Section 13(d) reporting requirements, including the authority to seek monetary penalties. The Commission did not, however, support a number of other proposals that would substantially alter the present scheme for regulating tender offers.

Proposed Bank Broker-Dealer Act—On May 4, 1987, the Commission sent to Congress the proposed Bank Broker-Dealer Act, which would amend the Exchange Act to allow the Commission to regulate certain brokerage activities of banks. This legislation is an outgrowth of Rule 3b-9, which was invalidated by the United States Court of Appeals for the District of Columbia Circuit in November 1986. The proposal would amend the Exchange Act's definition of "broker" and "dealer" to include banks engaging in public solicitation of brokerage business, banks receiving transaction-related compensation for brokerage services provided to trust, managing agency or other advised accounts, and banks dealing in or underwriting securities. Additionally, the proposal would amend Section 15(a) of the Exchange Act to require that banks establish separate entities, registered with the Commission, to engage in securities activities, so that the Commission's regulation of those activities would not conflict with the regulation of banking activities by other agencies. The Commission believes that this legislation is necessary to protect the investors who do business with bank brokerage departments and to ensure that all entities engaged in the securities business are subject to a uniform regulatory scheme.

Proposed Truth in Savings Act—On August 5, 1987, General Counsel Daniel L. Goelzer testified on behalf of the Commission before the Subcommittee on Consumer Affairs of the Senate Banking, Housing, and Urban Affairs Committee in connection with the proposed Truth in Saving Act. That legislation would require uniform disclosure of interest rates payable on deposit accounts offered by depository institutions and of fees assessable against such accounts. The Subcommittee asked the Commission whether the bill should be amended to include investment

companies. The General Counsel stated that such an amendment was unnecessary because the Commission has broad authority to regulate investment company advertising, and has exercised that authority to require widespread dissemination of investor information. In addition, in light of the functional differences between deposit instruments and investment companies, there would be numerous practical problems if investment company activities were regulated under legislation designed for bank deposit accounts.

Agricultural Credit Act of 1987—On September 14, 1987, Congressman John D. Dingell, Chairman of the House Committee on Energy and Commerce, requested Chairman Ruder's views on H.R. 3030, the proposed Agricultural Credit Act of 1987, which would provide for the creation of securities backed by pooled Farmers Home Administration loans. On October 1, 1987, General Counsel Goelzer testified on this Act on behalf of the Commission at hearings held before the Subcommittee on Telecommunications and Finance of the House Committee on Energy and Commerce. By letter dated October 15, 1987, the Commission objected to the proposed exemption of such securities from the Securities Act and the Exchange Act, arguing that the securities law exemption granted to the securities of other federally chartered corporations should not be considered a precedent in the case of these new securities, where the federal guarantee would be for less than 100 percent of the value of such securities. The Commission also stated that brokers and dealers in the farm loan securities market should be regulated under the broker-dealer provisions of the Exchange Act, rather than the Government Securities Act of 1986, which regulates the activities of government securities dealers. Following the hearings, the proposed Agricultural Credit Act was amended to incorporate the Commission's recommendations.

Commission Authorization Request—On May 13, 1987, former Chairman Shad testified before the Subcommittee on Securities of Senate Banking, Housing, and Urban Affairs Committee in support of the Commission's authorization request for fiscal years 1988-1990. Commissioner Cox testified on the same subject before the Subcommittee on Telecommunications and Finance of the House Committee on Energy and Commerce on June 4, 1987. The authorization requests include a set of conforming, clarifying, and other technical amendments to the securities laws. In addition to correcting errors and deleting various obsolete provisions, the legislation would give the Commission and the appropriate bank regulators authority to sanction not only transfer agents but persons associated with transfer agents as well. The grounds for sanctions would be expanded from violations of the transfer agent provisions of the Exchange Act to include convictions, injunctions, administrative orders, and misconduct of the type that are grounds for sanctions against other securities professionals.

Financial Guarantee Study—Section 105 of the Government Securities Act of 1986 directed the Commission to perform a study concerning "the use of the exemption contained in [S]ection 3(a)(2) of the Securities Act of 1933 (15 U.S.C. 77c(a)(2)) for securities guaranteed by banks, and the use of insurance policies to guarantee securities." On August 31, 1987, the Commission transmitted its report, which concluded that the Section 3(a)(2) exemption places insurance companies at an apparent competitive disadvantage, since a corporate security backed by a bank standby letter of credit is exempt from the Securities Act's registration re-

quirements, but a corporate security backed by an insurance policy is not. The Commission, however, was unable to quantify the extent of disadvantage. To address any disparity, the Commission recommended that Congress amend Section 3(a)(2) of the Securities Act to eliminate the exemption from registration for securities issued or guaranteed by banks. At the same time, the Commission recommended that Congress amend the Securities Act to provide authority for the Commission to grant exemptive relief from the registration provisions of the Act for those securities or securities transactions for which full registration is unnecessary.

Report on the Internationalization of the Securities Markets—In July 1987, the Commission's staff submitted its Report on the Internationalization of the Securities Markets to the House Committee on Energy and Commerce and the Senate Committee on Banking, Housing, and Urban Affairs. This comprehensive report examined a wide range of issues raised by the accelerating internationalization of the securities markets, including: (1) United States and foreign disclosure and distribution requirements and their application to international issues of securities; (2) differing accounting and auditing standards in relation to multinational issues of securities; (3) the globalization of securities markets and its effects on broker-dealers, investment companies and investment advisers; (4) the enforcement of the United States securities laws in a global securities market; and (5) economic trends affecting internationalization. In preparing the report, the Commission staff conducted extensive research in the fields of law, economics and accountancy. The staff anticipates that the report will be used by Congress and the Commission to examine possible legislative, rulemaking, or policy initiatives to deal with internationalization of the securities markets.

Federal Government Loan Sales—On February 19, 1987, former Chairman Shad testified before the Senate Committee on the Budget about the applicability of the federal securities laws to the sale of federal government loan assets. On March 10, 1987, Commissioner Fleischman testified before the House Committee on Small Business on the same subject. Sales of such federal assets are mandated by the Omnibus Budget Reconciliation Act of 1986 in order to reach the Gramm-Rudman-Hollings fiscal year 1987 deficit target of no more than $144 billion. The Commission reviewed the applicability of the Securities Act to the proposed sales, possible statutory exemptions that might be utilized, and the requirements imposed by registration under the Securities Act. The Commission also examined how the government loan sales would be affected by other securities statutes, particularly the Exchange Act and the Investment Company Act of 1940.

Corporate Reorganizations

The Commission acts in a statutory advisor's role in reorganization cases under Chapter 11 of the Bankruptcy Code to ensure that the interests of public investors are adequately protected. In these cases a debtor generally is allowed to continue business operations under court protection while it negotiates a plan to rehabilitate the business and to pay the company's debts. Reorganization plans often provide for the issuance of new securities to creditors and shareholders in exchange for part or all of their claims or interests in the debtor, under an exemption in the Bankruptcy Code from registration under the Securities Act.

In its capacity as special advisor, the Commission may raise or present its views on any issue in a Chapter 11 case. Although the Commission may not initiate an appeal, it frequently participates in appeals taken by others. While Chapter 11 relief is available to businesses of all sizes, the Commission generally limits its participation to cases involving debtors that have publicly traded securities registered under the Exchange Act. In fiscal year 1987, the Commission presented its views on a variety of issues.

Committees—Official committees are empowered to negotiate with a debtor in possession on the administration of a case and to participate in all aspects of the case, including formulation of a reorganization plan. With court approval, an official committee is permitted to employ, as a cost of administration, one or more attorneys, accountants, or other agents to assist the committee in performing its duties. In addition to a committee representing creditors holding unsecured claims, the Code allows the court or a United States Trustee to appoint additional committees for stockholders and others where necessary to assure adequate representation of their interests. During fiscal year 1987, the Commission moved or supported motions for the appointment of committees to represent investors in three Chapter 11 cases.[190]

In *In re Johns-Manville Corp.*,[191] the Official Equity Holders Committee, appointed at the outset of the case to represent both common and preferred interests, moved to have itself disbanded because of irreconcilable conflicts over the debtor's proposed plan, and sought the appointment of separate committees to represent the two interests. The bankruptcy court disbanded the official committee but refused to appoint separate replacement committees. In so doing, the court relied principally on the presence of individual common and preferred shareholders who were active in the case. In addition, the court expressed its belief that shareholders would not suffer a "critical degree" of prejudice if new committees were not appointed. The Commission supported an appeal by both classes of shareholders to the district court, urging that the bankruptcy court had applied improper legal criteria in refusing to appoint the substitute committees. The district court, however, found no abuse of discretion in the bankruptcy court's refusal to appoint the committee. The court also concluded that, since Manville had already filed a plan of reorganization substantially diluting common stockholder interest, there was no longer a need for an official committee to represent shareholders.

The Commission supported a further appeal by certain Manville common stockholders to the United States Court of Appeals for the Second Circuit from this refusal to appoint a committee. In connection with this appeal, the Commission joined the stockholders in seeking to stay the hearing on confirmation of Manville's plan pending resolution of this key issue. The Commission urged that, contrary to the reasoning of the lower courts, a committee was needed to represent common stockholders at the critical stage of plan confirmation. The court denied the stay and thereafter dismissed the appeal without reaching the merits, holding that it lacked jurisdiction over the committee controversy since the order refusing to appoint an official committee was not a final, appealable order. The court concluded that such orders were reviewable only on appeal from the final order of plan confirmation or upon certification of an interlocutory order from the district court.

In *In re The LTV Corporation*,[192] the Commission, as a result of its experience

in *Manville,* filed a motion for the appointment of separate equity security holders committees to represent common and preferred stockholders. The Commission argued that, because the appointment of separate committees is economically feasible in a large case such as this (involving some $6.3 billion in assets), it is preferable to appoint such committees at the outset rather than waiting until an actual conflict develops. Appointing a single committee to represent both interests is appropriate only in smaller cases where it is economically infeasible for the estate to bear the cost of two committees for the duration of the case. The bankruptcy court disagreed with the Commission and appointed a single committee to represent both common and preferred shareholders.

Consistent with its reasoning in *LTV,* the Commission moved in *In re Towle Manufacturing Co.*[193] for the appointment of a single equity security holders committee to represent both common and preferred stockholders. The Commission concluded that, in light of the debtor's relatively small size and number of shareholders, two committees were impracticable. After initially denying the Commission's motion for a committee, the bankruptcy court, upon rehearing, ordered the appointment of a single stockholder committee.

The Commission responded on another important issue related to committees, in *In re Psych Systems, Inc.,*[194] to objections filed by creditors concerning the proper standard to be applied in awarding attorney fees for an official equity security holders' committee when the estate proves to be insolvent and shareholders do not ultimately participate in the plan of reorganization. The Commission urged that the provision in Section 330(a) of the Bankruptcy Code, which authorizes payment for the "actual and necessary" professional services of a committee, permits compensation for attorney's services reasonably related to the performance of duties within the scope of the committee's official responsibilities, without regard to whether those services produce a measurable benefit to the estate or to the committee's constituents. The Commission pointed out that the proper remedy is to disband a committee when it becomes apparent that the committee is unnecessary, rather than altering the standard of compensation for committee counsel at the end of a case. The bankrutpcy court, agreeing with the Commission, authorized payment to committee counsel.

Estate Administration—The Commission acts to protect the interests of public investors in reorganization cases by participating on selected issues involving administration of the debtor's estate that have a significant impact upon the rights of public investors.

In *In re Amarex, Inc.,*[195] the Commission supported an appeal to the district court by limited partner investors, urging reversal of the bankruptcy court's decision to subordinate all their claims pursuant to Section 510(b) of the Bankruptcy Code, which provides for the automatic subordination of rescission or damage claims arising out of the purchase or sale of securities. The Commission argued that Section 510(b) should not be read to subordinate every claim by a security owner against a debtor. The Commission pointed out that it is not uncommon for security owners to have distinct and legitimate claims other than securities fraud type claims and that Section 510(b) was not intended to affect those claims. The district court agreed with the position urged by the Commission, noting that the statute's language and the legislative history reveal that Congress intended subor-

dination to apply to claims related to the purchase or sale of a security—and to no other claims. An appeal to the United States Court of Appeals for the Tenth Circuit is pending.

The case of *In re Standard Metals*[196] raised the issue of whether a debtor that has taken no steps to give notice of the time for filing claims to potential creditors not listed on its schedules may cut off the right of such creditors who file late claims to participate in the reorganization. The bankruptcy court concluded that, because the claim involved in the case, which was based on the debtor's violations of the federal securities laws, was presumably unknown to the debtor before the claims bar date was established, notice of the bar date was not required. The district court affirmed. The Commission argued in an appeal to the United States Court of Appeals for the Tenth Circuit, that the Bankruptcy Code and rules impose a duty on the debtor to give at least publication notice to unscheduled creditors. In addition, the Commission argued that due process requires an appropriate form of notice before claims may be barred and discharged in a reorganization case. In its initial opinion, a panel of the court affirmed the lower courts' orders without reaching the question of notice.[197] A dissenting judge urged that due process required notice, and that the debtor and the bankruptcy court had a duty to give notice once the existence of creditors claiming fraud became known.

Thereafter, the court granted a petition for rehearing on the issue of notice. On rehearing, the Commission reiterated its view that the Bankruptcy Code and rules as well as due process require publication notice to unscheduled creditors.

The Commission also argued that, where creditors subsequently become known, the statute places a duty on the debtor and on the bankruptcy court to see that appropriate notice is directed to those creditors. The appeal on rehearing is pending.

The Commission has taken the position, both in *Standard Metals* and in *In re American Reserve,*[198] a Chapter 7 case in which the Commission is appearing as a friend of the court, that a creditor may file a class proof of claim in bankruptcy on behalf of other similarly situated creditors. In its briefs, the Commission has argued that neither the Bankruptcy Code nor the Bankruptcy Rules should be read to preclude the filing of class proofs of claims. In the Commission's view, the broadened claim concept adopted in the Bankruptcy Code, and the prospect that many individuals in a bankruptcy may have similar claims, are inconsistent with a restrictive interpretation of the proof of claim requirement. The Tenth Circuit in its initial opinion in *Standard Metals* disagreed with the Commission on this issue and ruled against class claims in bankruptcy. Likewise, a district court ruled in *American Reserve* against the filing of class proofs of claim. An appeal to the Seventh Circuit is pending in *American Reserve,* where the Commission has reiterated its longstanding position. An appeal is also pending on this issue in the district court in *In re Charter Co.,*[199] where the Commission has taken the same position.

Disclosure Statements/Plans of Reorganization—A disclosure statement is a combination proxy and offering statement used in soliciting acceptances of a plan of reorganization. Such plans often provide for the exchange of new securities for claims and interests of creditors and shareholders of the debtor. The Bankruptcy Code provides that adequate disclosure is to be made without regard to whether or not the information provided would otherwise comply with the disclosure require-

ments of the federal securities laws. But, in recognition of the Commission's special expertise on disclosure questions, the Bankruptcy Code recognizes the Commission's right to be heard, distinct from its special advisory role, on the adequacy of disclosure. For this reason, the Bankruptcy Rules require service on the Commission of all disclosure statements.

During fiscal year 1987, the Commission received approximately 5,288 disclosure statements filed in Chapter 11 cases involving both privately-held and publicly-held corporations. The staff limits its review to those disclosure statements filed in cases involving a publicly-held company or a company likely to be publicly traded as a consequence of the reorganization. During 1987, the staff reviewed 143 disclosure statements.

In its review of disclosure statements, the staff seeks to determine whether the issuance of securities under a plan is consistent with the exemption from registration in the Bankruptcy Code and otherwise in compliance with the federal securities laws. The Commission also reviews statements to determine whether there is adequate disclosure concerning the proposed plan. Generally, the Commission seeks to resolve questions concerning bankruptcy disclosure through staff comments to the plan proponent. If questions cannot be resolved through this process, the Commission may object to the disclosure statement in the bankruptcy court.

During fiscal year 1987, the Commission commented on disclosure statements in 108 cases, and objected to a disclosure statement in one case. In *In re Custom Laboratories, Inc.*,[200] the Commission filed objections to the debtor's disclosure statement, arguing that it contained inadequate information concerning management, the feasibility of the reorganization plan, and the basis for relying upon the bankruptcy exemption from Securities Act registration for the sale of securities to existing shareholders. The Commission also urged the court to order amendment of the plan to eliminate provisions that purported to release non-debtor individual liability. Following the filing of the Commission's objections, the debtor withdrew its disclosure statement.

In addition to specific disclosure concerns, the Commission acts to assure that public investors are given an opportunity to be heard on disclosure-related questions. From time to time, the Commission objects to confirmation of plans where there is a significant legal question presented. During fiscal year 1987, the Commission objected to confirmation in two cases and filed a brief on issues raised in an appeal from plan confirmation in a third case.

The Commission filed objections to confirmation of reorganization plans that provided for the discharge of third party liability for securities law violations in *In re Energy Exchange Corporation and Vulcan Energy Corporation*,[201] and *In re Storage Technology Corporation*.[202] The Commission argued that, unless there is separate consideration in exchange for the discharge, a plan cannot condition the receipt of distributions under a plan on release of claims against third parties. The Commission argued that such a discharge contravenes Section 524 of the Bankruptcy Code, which provides that the discharge of a debtor does not affect the liability of any other entity with respect to the debt. The Commission further argued that insofar as a plan purports to release persons from liability under the federal securities laws, it is contrary to public policy. In both cases, the bankruptcy courts

overruled the objections, holding that the release provisions of the plan were not improper discharges under the Code.

In *In re Johns-Manville,*[203] the Commission filed a brief in an appeal by common stockholders of the bankruptcy court's order confirming a plan of reorganization. In its brief, the Commission reiterated its position that common stockholders in that case were improperly denied representation at the confirmation hearing because of the bankruptcy court's refusal to appoint an official committee. The Commission, however, recognized that the error in refusing to appoint a committee did not necessarily require reversal and a new hearing. The Commission urged that the appropriate standard of review in light of the error was whether there was a reasonable possibility that the shareholders, if represented by a committee, could have presented evidence disputing the debtor's evidence of insolvency. The district court subsequently affirmed the bankruptcy court's order confirming the plan of reorganization.

Economic Research and Analysis

Key 1987 Results

The economic and statistical research program provides the Commission and the Divisions with the perspective and the technical support required to understand and evaluate the economic aspects of Commission regulation. This program is carried out by the Directorate of Economic and Policy Analysis (DEPA) and the Office of the Chief Economist (OCE).

The economic staff provides the Commission with economic advice and research studies on rule proposals, established policy and the capital markets. The staff assists the Commission in making decisions affecting the efficiency and structure of our nation's securities industry and markets. In addition, the program encompasses statistical monitoring of major program initiatives impacting the securities industry, domestic and international capital markets, and publication of the Commission's SEC Monthly Statistical Review.

Changes in the marketplace have increased the number and complexity of economic issues before the Commission. The trend toward increased internationalization of the securities markets, the recent turbulence in financial markets, the application of new technology within the industry, and the continued expansion of new financial products have greatly complicated the analysis of the impact of Commission regulation. New and more complex market structures and trading systems also increase the need for economic analysis. For example, the operation of options markets has significantly changed due to the introduction of new automated execution systems and as a result of different exchanges trading options on the same NASDAQ securities.

The world's securities markets have become more interdependent in response to economic, institutional, technological and regulatory forces. At the same time, the securities markets have assumed a larger role in the international capital market as international bond issues grew from $38 billion in 1980 to $225 billion in 1986. Regulatory changes are now occurring in the capital markets of, among others, the United Kingdom, Canada, Japan and France. There has also been a rapid maturation of foreign securities markets which have experienced faster growth rates compared to the United States market.

United States and Canadian securities markets have developed electronic trading links, and the London Stock Exchange now participates in the first transatlantic link with United States markets, exchanging quotation information in selected stocks. The National Association of Securities Dealers is also planning to begin the exchange of quotations with the Stock Exchange of Singapore. Additionally, the American Stock Exchange has entered into an agreement with the European Options Exchange which allows investors to open an options position in one market and close it in the other. United States clearing agencies have begun to develop links with clearing agencies from around the world.

During fiscal 1987, the economic staff reviewed 110 rules and rule proposals.

Rule reviews emphasized the economic costs and benefits of alternative approaches to regulation. In addition, advice was given to the operating divisions on requirements of the Regulatory Flexibility Act (RFA), particularly focused on reducing regulatory burdens on small business entities. In fiscal 1987, the economic staff reviewed 65 RFA analyses and certifications.

Also during the fiscal year, the staff prepared a report to Congress, in conjunction with other divisions and offices, on the internationalization of securities markets. Specifically, the economics staff analyzed: (1) the extent and nature of international trading in securities; (2) United States and foreign portfolio investment patterns; (3) the growth of the international bond and equity market; (4) major restructuring in overseas markets; and (5) the emergence of various international funds as vehicles to facilitate international capital flows. The staff published a major study on the effects of multiple trading in options based upon recent experience with options on OTC equities as well as on the traditional listed equities. The staff also prepared a report analyzing the use of repurchase agreements by broker-dealers and the risks which are involved in such transactions. This study was used as a framework for considering several amendments to the broker-dealer financial responsibility and recordkeeping rules. The staff also developed a system to detect and analyze possible instances of market manipulation involving the use of options.

In the full disclosure area, the staff prepared an empirical analysis of the trading and returns behavior of initial public offerings to assist the Commission in determining the appropriate time period needed for prospectus delivery. The staff also updated an earlier analysis of Schedule 13D filings to aid in determining the need for revisions in beneficial ownership reporting. Studies completed in the corporate control area covered such topics as sources of tender offer financings, dual class recapitalizations, effects of defeating takeover attempts, market anticipation of takeovers and the effects of the Ohio takeover law. Additionally, the economics staff assisted the Division of Corporation Finance in examining alternative criteria for establishing the threshold parameters for including corporations in the mandatory disclosure system. The staff prepared a study assessing the effects of Rule 415 (shelf registration) on the revenues of securities underwriters. Another study analyzed the effects of an accounting ruling which upheld a book value ceiling test for oil and gas companies using full-cost accounting.

The economics staff examined fund disclosure regarding the costs of buying, holding and redeeming mutual fund shares to determine if it is meaningful and accessible enough to assist investors in making informed decisions. Other analyses examined the use of fund assets in the distribution of mutual fund shares and the results of this practice for investors, investment companies and the fund distribution system. The staff also examined problems that have developed in mutual fund advertising practices in portraying fund performance and evaluated the impact of potential regulatory solutions on the effectiveness of fund advertising and the ability of investors to make informed decisions.

Management and Program Support

Key 1987 Results

The goals of program direction are to formulate and execute the Commission's policies and to efficiently manage the agency's resources in support of those policies. Those goals are accomplished primarily in two ways—policy, management and administrative support. Policy management activities involve formulation, review and assessment, information dissemination, and executive resource management. Administrative support encompasses services such as accounting, data processing, staffing and logistics to support the Commission's work.

Policy Management

The Commission continued hosting roundtable discussions and other forums with industry and investor representatives on a variety of issues relating to the securities markets. The Commission held 120 meetings to consider approximately 570 rule proposals, enforcement actions, and other matters that significantly affect the health of the securities markets and the nation's economy. In addition, Commission officials testified in 19 Congressional hearings on topics such as tender offer regulation, insider trading, program trading, and the internationalization of the securities markets.

The Commission's management staff initiated 24 major projects during the fiscal year including reviews of the information security program and internal control objectives. In addition, numerous internal audits were conducted of Commission programs, activities and functions.

Consumer Affairs and Information Services

Consumer affairs specialists responded to approximately 40,000 complaints and inquiries during fiscal year 1987, representing an 11 percent increase over last year. Of these, approximately 46 percent involved investor disputes with registered broker-dealers, 23 percent related to general inquiries, and 18 percent concerned issuers of securities. The remaining complaints and inquiries related to mutual funds, transfer agents, banks, or investment advisers. The majority of complaint letters were processed internally. However, 29 percent of the letters were referred on behalf of the investor to investment firms for review and resolution. In addition, the Office of Consumer Affairs and Information Services developed materials to apprise investors of the current status of companies involved in class action litigation and bankruptcy proceedings, and also began revising its consumer education materials.

The office processed 1,908 Freedom of Information Act (FOIA) requests and 3,205 confidential treatment requests during the fiscal year, representing increases of 24 and 64 percent, respectively, over fiscal year 1986. Confidential treatment requests were typically made in connection with proprietary corporate information and were carefully evaluated. The staff also coordinated 2,005 Congressional re-

quests for Commission records, representing a 50 percent increase over last fiscal year. The Commission's FOIA regulations were amended to comply with the Freedom of Information Reform Act of 1986 and subsequent policy guidance from the Office of Management and Budget and the Department of Justice.

More than 21,000 visitors used the Commission's Public Reference Room in Washington, D.C. The public can view most corporate filings, broker-dealer and investment advisor registrations, Commission releases, and other public materials at this facility. Approximately 358,800 documents were recorded on microfiche and made available to the public during the fiscal year. The Commission also maintains Public Reference Rooms in the New York and Chicago regional offices.

Equal Employment Opportunity

The Office of Equal Employment Opportunity (EEO) staff conducted a one-hour seminar on the prevention of sexual harassment in the workplace for all Commission employees. The EEO staff also instructed 165 managers and supervisors from headquarters and two regional offices on issues dealing with EEO law, affirmative action, complaint processing, and other EEO matters.

During fiscal year 1987, the employment of women increased 2.7 percent. Employment for all other minority groups remained constant. The Commission's work force consists of 32 percent minorities and 49 percent women. As in past years, the contributions and achievements of minority groups and women were recognized with programs for Afro-American History Month, Asian-Pacific American Heritage Week, Hispanic Heritage Week, and Women's Week.

The Commission-Securities Industry Committee on Equal Employment Opportunity continued its financial support of minority students by awarding $17,000 in scholarships during the fiscal year. Scholarship funds were contributed by brokerage firms, exchanges, securities associations, broker-dealers, and investment advisers that are members of the Committee.

Facilities Management

The Office of Administrative Services (OAS) assisted in relocating the Boston regional office and the San Francisco branch office and began negotiating with the General Services Administration (GSA) on the forced relocation of the New York regional office. OAS also acquired additional space in the Commission's headquarters building to support expanded enforcement operations and the EDGAR project, requiring extensive alterations to accommodate new staff. In addition, GSA delegated contract authority to the Commission over the existing guard contract for the headquarters building. As a result, the Commission saved $70,000 because GSA no longer received reimbursement for administering the contract.

Financial Management

Commission funding in fiscal year 1987 was initially provided by an annual appropriation of $110.5 million. This amount was later increased by $4 million to cover the full costs of the January 1987 pay increase and the new Federal Employees' Retirement System (FERS). The Commission spent $112 million of its total appropriation. The remaining $2.5 million, consisting of unspent funds for the

EDGAR project and FERS, was returned to the Department of the Treasury (Treasury).

The Commission continued to improve its financial management programs. The use of microcomputers was expanded to expedite the preparation of financial reports required by the Office of Management and Budget and other executive oversight agencies. The fee collection process was enhanced through a greater use of electronic funds transfer and Treasury-sponsored lockbox facilities. Also, audits were conducted to ensure that distributed payroll, accounting and budget functions were performed in strict compliance with established regulations. The Commission reduced the amount of travel advances by increasing staff use of Diners Club cards and by receiving travel vouchers promptly from staff. As a result, an additional $70,000 was available for travel by program staff during the fiscal year. Finally, the Commission payroll system completed its third year as a host system available to other Government agencies.

During fiscal year 1987, Commissioners participated in 61 meetings and conferences. To pay the cost of attendance, private entities reimbursed the Commission $27,073 while the government's portion amounted to $8,201. Commission staff participated in 376 meetings and conferences. The Commission was reimbursed $109,319, while the government's portion of these costs totaled $30,865.

Information Systems Management

The Office of Information Systems Management (ISM) made significant progress in integrating and improving automation functions at the Commission. Specifically, ISM successfully awarded a contract to acquire 80 portable, laptop microcomputers for regional office examiners and investigators. ISM also acquired an additional 128 desktop microcomputers for use by headquarters staff. Microcomputers already have demonstrated their effectiveness for applications such as word processing and spreadsheet operations. In addition, ISM has initiated analyses and studies for an integrated office automation system at the Commission.

During fiscal year 1987, the Commission acquired and installed the Bridge Market Information system, which provides real-time price and volume information, as well as consolidated quotes and news items on stocks and options traded on the exchanges and over-the-counter. The system also provides historical trade information, including data on commodities and financial futures. This system has had a substantial impact on meeting the information requirements of the Commission staff in certain program areas because stock and futures trading can be monitored more effectively. The staff can also perform on-line comparisons between financial futures and their underlying indices and compute an annualized rate of return available through the execution of an arbitrage program.

ISM successfully awarded a contract to replace one of the Commission's obsolete mainframe central processing units. A request for proposals was released to procure a replacement for the remaining central processing unit with an award projected for early 1988. The new units will permit the Commission to upgrade its capability to respond to increasing information reporting and analysis requirements.

Personnel Management

During fiscal year 1987, employees currently enrolled in the Civil Service Retirement System were permitted to change to the new Federal Employees Retirement System (FERS) and to participate in the Thrift Savings Plan. The Commission successfully implemented FERS on schedule in January 1987. This effort required extensive coordination among the Offices of Personnel, the Comptroller, and Information Systems Management. The Office of Personnel provided counseling and disseminated information to help employees decide whether to switch to FERS. The Commission assisted employees further by providing decision advisors and a software package designed to analyze projected benefits under the two retirement systems.

The Office of Personnel improved its recruitment productivity through newly delegated hiring authority for research assistants, examiners, accountants, and secretaries. The office also obtained delegated authority to hire attorneys above minimum pay rates and to offer special pay rates to headquarters typists. In addition, the staff participated in two job fairs which were extremely beneficial in generating applications, interviews, and new employees in a variety of occupations.

The training program emphasized computer literacy skills by enrolling 223 employees in 301 microcomputer applications courses. Other improvements to the training program involved revising headquarters supervisory training to provide for more participation by top Commission executives as guest speakers and conducting special training on stress management and leadership.

The Office of Personnel took steps to improve the efficiency of its position management program. For example, three standardized position descriptions were established for use throughout the Commission. The office implemented new standards issued by the Office of Personnel Management for paralegal specialists. The Commission also initiated a program to study and evaluate occupations across organizational lines. In addition, several reorganizations were implemented and the accuracy of position descriptions were certified in half of the Commission's divisions and offices.

In November 1986, the Commission received the Outstanding Employer of the Year Award from the District of Columbia Rehabilitation Services Administration. This award recognized the Commission's efforts in hiring and training handicapped individuals and enhancing supervisors' understanding of the handicapped.

Public Affairs

The Office of Public Affairs communicates information on Commission activities to those interested in or affected by Commission actions, including regulated entities, the press, employees of the Commission and the general public. Both ongoing activities and special projects are undertaken by the office in support of the Commission's mission.

Public Affairs staff prepares the SEC News Digest, which provides information on vitually all SEC actions—rule changes, enforcement actions against individuals or corporate entities, acquisition reports, releases, decisions on requests for exemptions, upcoming Commission meetings, and other events of interest. Informa-

tion on Commission activity is also disseminated through notices of administrative actions, litigation releases, and other materials. The News Digest is available in the Public Reference Room.

Press releases issued prior to Commission meetings and press briefings conducted after these meetings provide insight into proposed and adopted changes in policies and regulation. The office also issues press releases on upcoming events, on-going programs, and special projects. In all, 89 news releases were issued during the year. When appropriate, actions are brought to the attention of the national and regional press. Special projects such as roundtable discussions on emerging issues in the financial markets are also publicized.

The office directs publication of the SEC Annual Report that provides information on Commission activities to Congress, the securities bar and other interested parties, and, through the Depositary Library System, to selected colleges and universities throughout the country.

Speeches presented by Commissioners and senior staff and testimony are retained and disseminated in response to requests from the public. During the year, the staff responded to approximately 69,500 requests for information and coordinated programs for 93 groups of foreign visitors. Also during the year, the staff updated and revised such publications as the "SEC Publications Guide", "Investigate Before You Invest", and "Q & A for Small Business".

Public Affairs publishes a regular newsletter, the Employee News, and prepares a daily summary of news clips for Commission employees.

Commission Operations

For the fifth consecutive year and the sixth time in the Commission's 53-year history, revenues collected exceeded the agency's annual appropriation. In fiscal year 1987, the Commission collected $278.4 million for deposit into the general fund of the United States Treasury. These revenues amount to 243 percent of the Commission's 1987 appropriated funds. Total collections consisted of $263.9 million in fee revenue and $14.5 million in disgorgements from fraud actions. Fee revenue is generated from four primary sources: (1) securities registered under the Securities Act of 1933 (61% of the total); (2) transactions on securities exchanges (24%); (3) tender offer and merger filings (12%); and (4) miscellaneous filings (3%).

Commissioners and Principal Staff Officers

(As of September 30, 1987)

Commissioners	Term Expires
David S. Ruder, *Chairman*	1991
Charles C. Cox	1988
Aulana L. Peters	1989
Joseph A. Grundfest	1990
Edward H. Fleischman	1992

Secretary: **Jonathan G. Katz**
Executive Assistant to the Chairman: **Linda D. Fienberg**

James A. Clarkson, III, *Director of Regional Office Operations*
Ernest B. Miller, *Manager, Equal Employment Opportunity*
John O. Penhollow, *Edgar Project Manager*
John A. Kelley, *Director, Office of Edgar Management*

Biographies of Commissioners

David S. Ruder

David Sturtevant Ruder was sworn in as the 23rd Chairman of the Securities and Exchange Commission on August 7, 1987, by Associate Justice Antonin Scalia of the Supreme Court of the United States.

Chairman Ruder was a member of the faculty of Northwestern University School of Law from 1961 to 1987, teaching in the field of corporate and securities law. He was dean of the School of Law from 1977 to 1985. He taught as a visiting professor at the University of Pennsylvania Law School in 1971 and was a faculty member at the Salzburg Seminar in American Studies in 1976.

He began his tenure as the tenth dean of the Northwestern University School of Law in September 1977 and was responsible for the conduct and the successful completion of an extensive and sophisticated faculty recruitment program that attracted 16 distinguished scholars and teachers to the faculty. He was an active participant in the planning, organization and successful completion of the $25 million Law School Campaign for endowment, renovation and new facilities. The Arthur Rubloff Building, the primary component of the Law School Campaign, was dedicated on August 4, 1984. It doubled the existing space for teaching, research and scholarship.

Chairman Ruder was instrumental in the negotiations to attract the headquarters of the American Bar Association, the American Bar Foundation, and the American Bar Endowment as tenants of Northwestern University in facilities adjacent to the Northwestern University School of Law, creating a national legal center and resource. The American Bar Center was dedicated on August 3, 1984. He relinquished his responsibilities as dean of the Northwestern University School of Law in July 1985 to return to research and teaching.

While at Northwestern, Chairman Ruder participated in planning the first Corporate Counsel Institute, held at the School of Law in 1962, and served as its director for five years (1963-67). He has been a member of the Institute's Planning Committee throughout most of its 25 years of existence.

Chairman Ruder has also been active in various bar-association activities. On the national level, Chairman Ruder has been actively involved in the American Bar Association Section on Corporation, Banking and Business Law since 1970, as a member of its Council (1970-74), its Committee on Federal Regulation of Securities (1974-present), its Committee on Corporate Law (1974-78; 1986-1987), its Ad Hoc Committee on the American Law Institute Corporate Governance Project (1986-1987); and as section competence advisor to the American Bar Association Standing Committee on Lawyer Competency (1986-1987). He has been chairman of the Public Interest Issues Committee.

Author of many articles on corporate and securities matters, Chairman Ruder has been a speaker and participant in continuing legal education programs of numerous organizations and has been active in bar association activities in the corpo-

rate and securities law field. While at Northwestern, he was active in the organization and on-going activities of the Ray Garrett, Jr., Corporate and Securities Law Institute and in the establishment of the Corporate Counsel Center at Northwestern University School of Law, which sponsors legal research and provides continuing professional education programs for corporate lawyers.

A native of Wausau, Wisconsin, Chairman Ruder received a bachelor's degree, cum laude, in 1951 from Williams College, where he was a member of Phi Beta Kappa and Gargoyle, the senior honorary society. He was editor-in-chief of the Williams Record, the college newspaper.

He received his law degree with honors in 1957 from the University of Wisconsin, where he was a member of the Order of the Coif and the recipient of the Salmon W. Dalberg Prize as the outstanding graduating student. He was editor-in-chief of the Wisconsin Law Review. Mr. Ruder served in the U.S. Army from 1951 to 1954, attaining the rank of First Lieutenant.

From 1957 to 1961, he was an associate with the Milwaukee law firm of Quarles & Brady, and while teaching at Northwestern was also of counsel to the Chicago law firm of Schiff, Hardin & Waite from 1971 to 1976.

Charles C. Cox

Charles C. Cox was sworn in as the 62nd Member of the Commission on December 2, 1983. His term expires in June 1988.

Mr. Cox joined the Commission on September 1, 1982, as Chief Economist. He organized the Office of the Chief Economist to analyze the economic effects of proposed rules and legislation, evaluate established Commission policy, and study various capital market topics.

Previously, Mr. Cox was a professor of management at Texas A&M University from 1980 to 1982, and a professor of economics at Ohio State University from 1972 to 1980. He served as a National Fellow of the Hoover Institution at Stanford University from 1977 to 1978.

During his academic career, Mr. Cox focused his research on the economics of public regulation of economic activity. He has published various articles on this topic in scholarly journals. Mr. Cox is a member of the American Economic Association.

Mr. Cox was born in Missoula, Montana, on May 8, 1945. He received his undergraduate education at the University of Washington where he was elected to Phi Beta Kappa in 1966, and earned a B.A. degree, magna cum laude, with distinction in economics in 1967. He received A.M. and Ph.D. degrees in economics from the University of Chicago in 1970 and 1975, respectively.

Aulana L. Peters

Aulana L. Peters was sworn in as the 64th Member of the Commission on June 11, 1984. Her term expires in June 1989.

Until her appointment, Mrs. Peters was a partner with the Los Angeles firm of Gibson, Dunn & Crutcher, which she joined as an associate in 1973. As a member of that firm's Litigation Department, she specialized in business and commercial litigation with emphasis on the securities and unfair competition areas, particularly

class action suits. About one-third of her law practice involved cases of alleged violations of the Securities Act of 1933 and the Securities Exchange Act of 1934, representing both defendants and plaintiffs. She was also involved in tender offer/proxy contest litigation.

She has frequently served on legal panels and has lectured for the California Continuing Education of the Bar and others. Mrs. Peters is a member of the Los Angeles County and American Bar Associations.

From 1963 to 1967, she lived in Milan and then in Paris, where she held various positions, the last of which was an Administrative Assistant within the Secretariat of the Organization for Economic Cooperation and Development. She has also lived in San Salvador, Central America, and The Cameroons (West Africa).

Mrs. Peters, who was born on November 30, 1941, is the first black appointed to the Commission. She earned a J.D. with honors from the University of Southern California Law Center in 1973 and a B.A. in philosophy from the College of New Rochelle in 1963.

Joseph A. Grundfest

Joseph A. Grundfest was sworn in as the 65th Commissioner of the Securities and Exchange Commission on October 28, 1985. His term expires in June 1990.

Mr. Grundfest came to the Commission from the Council of Economic Advisers in the Executive Office of the President, where he was counsel and senior economist for legal and regulatory matters. While at the Council, he played an active role in the formulation of Administration policy regarding regulation of securities markets, financial institutions, international trade, and the reformation of the antitrust laws. Mr. Grundfest is both an attorney and economist. He has practiced law with Wilmer, Cutler & Pickering and has served as an economist with The Rand Corporation, the Brookings Institution, and Peat, Marwick & Mitchell.

Mr. Grundfest is author or co-author of numerous publications dealing with topics such as contests for corporate control, the legal and economic regulation of markets subject to kickback schemes, the regulation of markets for broadcast stations and television advertising, and the role of citizen participation in administrative proceedings. During his academic career, Mr. Grundfest served as a Brookings Institution Fellow, a Stanford University Fellow, and a California State Fellow for the Study of Law and Economics.

Mr. Grundfest was born in New York City on September 8, 1951. He received his undergraduate education at Yale University where he earned a B.A. degree in economics in 1973. During an undergraduate year abroad, Mr. Grundfest completed, with First Class Distinction, the M.Sc. Program in Mathematical Economics and Econometrics at the London School of Economics. Between 1974 and 1978, he earned his J.D. degree from Stanford University and completed all requirements, other than the dissertation, for a doctorate in economics.

Edward H. Fleischman

Edward H. Fleischman was sworn in as the 66th Member of the Securities and Exchange Commission on January 6, 1986. His term expires in June 1992.

He formerly practiced law with Gaston, Snow, Beekman & Bogue (previously Beekman & Bogue), where he specialized in securities and corporate law and related areas.

During his career, Mr. Fleischman has been elected a member of the American Law Institute, the American College of Investment Counsel and the American Society of Corporate Secretaries, and has served as an Adjunct Professor of Law teaching securities regulation at the New York University Law School. He has been a lecturer at seminars dealing with securities and futures law and practice. He was co-author of a series of articles relating to Commission Rule 144.

Mr. Fleischman was born in Cambridge, Massachusetts, on June 25, 1932. A member of the U.S. Army from 1952 to 1955, he served with the 173rd Military Intelligence Platoon in Germany from 1954 to 1955. Mr. Fleischman received his undergraduate education at Harvard College and graduated with a B.A. degree cum laude in history. He was a Stone Scholar at Columbia Law School, where he received his LL.B. degree in 1959.

Mr. Fleischman was admitted to the New York Bar in 1959 and to the bar of the U.S. Supreme Court in 1980. He serves on the Committee on Federal Regulation of Securities where he has chaired the Ad Hoc Subcommittee on Rule 144 and the Subcommittee on Broker-Dealer Matters, and was a co-draftsman of the Committee letter on utilization and dissemination of "inside" information. He is also a member of the Committee on Counsel Responsibility, and currently chairs the Committee on Developments in Business Financing where he co-drafted the Committee paper on resale of institutional privately placed debt and chaired the Subcommittee on Simplified Indentures in addition to the Annual Review of Developments. Other bar activities include membership on the Committee on Developments in Investment Services, and the Administrative Law Committee on Securities, Commodities and Exchanges where he was vice chair for Commodities before taking the chair for three years.

[105]A tenth exchange technically still registered with the Commission is the Intermountain Stock Exchange (ISE). The Exchange is now inactive and conducts no trading. As part of an agreement with the Commission, the Commodity Exchange purchased the registration statement of ISE and must decide by January 1988, whether it intends to reactivate trading at a later time. No trading could commence, however, without further Commission approval.

[163]*SEC v. Blinder, Robinson & Co.*, Nos. 87-1080, 87-1086 (D.C. Cir.) (discussed *supra*).

[164]These same constitutional issues have been raised in cases involving the Federal Trade Commission. *See Ticor Title Ins. Co. v. FTC*, No. 85-3089 (D.D.C. Jan. 3, 1986), *aff'd*, (D.C. Cir. March 24, 1987); *Hospital Corp. of America v. FTC*, 807 F.2d 1381 (7th Cir. 1986), *cert. denied*, 107 S. Ct. 1975 (1987); *FTC v. American Nat'l. Cellular, Inc.*, 810 F.2d 1511 (9th Cir. 1987). The decisions in the first two cases did not reach the constitutional challenge; in the last, the United States Court of Appeals for the Ninth Circuit upheld the Federal Trade Commission's power to bring enforcement actions as consistent with *Humphrey's Executor*, 295 U.S. 602 (1935). The issue was also raised but dismissed as premature in *FTC v. Monahan*, 1987-1 Trade Cas. (CCH) 67,540 (D. Mass. April 13, 1987), *appeal pending*, No. 87-1392 (1st Cir.).

APPENDIX

THE SECURITIES INDUSTRY

Revenues, Expenses, and Selected Balance Sheet Items

Broker-dealers that are registered with the Commission produced revenues of $64.9 billion in calendar year 1986, 29 percent above the 1985 level. Almost 70 percent of this increase in revenues stemmed from the growth of revenues from securities brokerage, principal transactions and underwriting. The "all other revenues," which include interest income from securities purchased under agreements to resell and fees from handling private placements, mergers and acquisitions, accounted for the remaining 30 percent increase in revenues.

Securities commission income increased $3.0 billion or 27 percent, while revenues from mutual fund sales rose 65 percent.

Trading gains on firms' securities accounts increased $3.7 billion, or 25 percent, and represented 28 percent of total revenues in 1986. Profits from underwriting increased $1.8 billion, 36 percent, and stabilized as a percent of total revenues at ten percent.

Pre-tax income increased 26 percent from the preceding year to $8.3 billion, as expenses grew by $13.0 billion (30 percent) to $56.6 billion in 1986.

Assets rose by $68.2 billion to $524.8 billion and liabilities grew $61.7 billion to $493.8 billion. Ownership equity increased $6.5 billion during 1986 to $31.0 billion at year's end.

Source· FOCUS Report

Securities Industry Dollar In 1986 For Carrying and Clearing Firms

Data for carrying and clearing firms only are presented here to allow for more detail, as reporting requirements for firms which neither carry nor clear differ and data aggregation of these two types of firms necessarily results in loss of detail. Carrying and clearing firms are those firms which clear securities transactions or maintain possession or control of customers' cash or securities. This group produced 86 percent of the securities industry's total revenues in calendar year 1986.

Brokerage activity accounted for about 31 cents of each revenue dollar in 1986, exactly the same as in 1985. Securities commissions were the most important component, producing 20 cents of each dollar of revenue, while margin interest and revenues from mutual fund sales generated 5 cents and 6 cents, respectively.

The dealer side produced 60 cents of each dollar of revenue. Twenty-nine of these cents came from trading and investment, 11 cents from underwriting, and 20 cents from other securities-related revenues. The latter is comprised primarily of interest income from securities purchased under agreements to resell and fees from handling private placements, mergers and acquisitions.

Total expenses consumed 89 cents of each revenue dollar earned in 1986, almost the same as the 1985 level of 88 cents. This resulted in a pre-tax profit margin of 11 cents per revenue dollar.

Employee-related expenses (registered representatives' compensation and clerical and administrative employees' expenses) are the largest component of expenses. Employee-related expenses summed to $19.9 billion, and consumed 36 cents of the revenue dollar in 1986, a slight increase from 1985. In dollar terms, interest expense increased to $14.2 billion, $2.7 billion more than the year before. As a percent of revenues, however, interest expense declined slightly in 1986 to absorb 25 cents of each revenue dollar. Other expense categories consumed about the same proportion of the industry revenue dollar in 1986 as they did in 1985.

Total assets of broker-dealers carrying and clearing customer accounts rose by $71.8 billion to $509.7 billion in 1986. About 63 percent of this increase can be attributed to resale agreements, which rose to $188.4 billion. By year-end 1986, resale agreements had become the single most important item on the balance sheet of these firms, comprising 37 percent of assets. Firms' proprietary positions of $167.0 billion had a modest increase of 7.5 percent and accounted for 33 percent of assets. Most of the remaining assets represented receivables either from customers or other broker-dealers.

Total liabilities, including subordinated debt, increased $66.1 billion or 16 percent to $483.0 billion. About 87 percent of this growth was due to the $56.0 billion increase in repurchase agreements. Owners' equity rose 27 percent from $21.0 billion in 1985 to $26.7 billion, and total capital increased 36 percent to $36.7 billion from $27.0 billion in 1985.

Broker-Dealers, Branch Offices, Employees

The number of broker-dealers filing FOCUS Reports rose six percent from 8,766 in 1985 to 9,328 in calendar year 1986. During the same period, the number of branch offices increased seventeen percent from 15,375 to 18,014. The number of registered representatives employed in the securities industry rose from 357,133 to 404,000 in 1986, a thirteen percent increase.

Self-Regulatory Organizations: Expenses, Pre-Tax Income and Balance Sheet Structure

In 1986 the total revenues of self-regulatory organizations ("SROs") with marketplace jurisdiction rose approximately $133.1 million to $778.2 million, an increase of 21% over 1985 (the 1985 increase was 15% over 1984). The New York Stock Exchange ("NYSE"), National Association of Securities Dealers ("NASD") and American Stock Exchange ("Amex") accounted for 67% of these SROs' total revenues. Most of the SRO revenues came from listing, trading, and market data fees. The NYSE reported total revenues of $296.3 million, of which 58% consisted of listing and trading fees. The Amex reported total revenues of $102.2 million, and NASD reported $124.5 million. The Chicago Board Options Exchange ("CBOE") had the largest percentage increase (31%) in revenues for the second consecutive year.

The total expenses of all marketplace SROs were $647.5 million in 1986, an increase of $83 million (15%) over 1985. The Midwest Stock Exchange ("MSE") had the largest percentage increase in total expenses, 22%. The Spokane Stock Exchange's ("SSE") total expenses remained unchanged in 1986, with expenses totaling $57,000.

Aggregate pre-tax income of these SROs rose to $125.3 million in 1986 from $73.8 million in 1985, an increase of 70%. Pre-tax profit margins widened because aggregated total revenues increased 21% and aggregate total expenses increased only 15%. These wider margins can be partly attributed to rising trading volume and a corresponding increase in transaction fees. The NYSE had a pretax income of $48.6 million, a 36% increase from 1985. The CBOE had an increase of $9.2 million, from $9.2 million to 18.4 million. Amex had an increase of $10.1 million or 105%, the Philadelphia Stock Exchange ("Phlx") an increase of $2.3 million or 115%, and the Boston Stock Exchange ("BSE") an increase of $799 thousand or 116%. The Pacific Stock Exchange ("PSE") had a 1986 pre-tax income of $1.2 million, an increase of 12% over 1985 pre-tax income. Finally, the CSE had a pre-tax income of $113 thousand, a significant reversal of its 1985 performance in which the CSE had a pre-tax loss of $37 thousand. In addition, 1986 was the first year in five in which the CSE reported a net pre-tax gain rather than a pre-tax loss.

The total assets of all marketplace SROs were $1,556 million in 1986, an increase of 31% from 1985. The NYSE's total assets increased by $27.8 million or 9%, from 1985 to 1986. The total assets of the MSE and the Phlx also increased significantly but these increases were due largely to increased asset levels at certain subsidiaries.

The aggregate net worth of the SROs rose to $474.7 million in 1986 from $400.9 million in 1985, an increase of 18%. The largest percentage increase was at the CSE (160%), followed by the Spokane Stock Exchange (40%), the BSE (30%), and the NASD (27%). The NYSE's net worth increased by 14% from $162.7 million to $184.8 million.

Aggregate clearing agency service revenue increased by 24%, or $54 million, in 1986 due to increases in securities trading volume and additional use of depository services. Total deposisitory service revenue increased $36 million primarily due to a $29 million gain by the Depository Trust Company ("DTC") and a $5 million gain by the Midwest Securities Trust Company ("MSTC"). Service revenue of clearing corporations increased by $18 million, which was largely attributable to increases of almost $4 million at the Options Clearing Corporation ("OCC") and $12 million at the National Securities Clearing Corporation ("NSCC").

The depositories continued to expand the base for service revenues by increasing the number of shares on deposit and the face value of debt securities in custody. At the end of 1986, the total value of securities in the depository system reached $2.8 trillion, of which DTC alone held over $1.4 trillion not including some $1.1 trillion in cer-

tificates held by transfer agents as DTC's agent. This movement of certificates into depositories was due to further expansion of the lists of depository eligible issues and the desire of participants to avail themselves of depository services. The MSTC had 541,000 eligible issues at year end, up 59%, and DTC had 372,000, up 42%. The major portion of the growth was in debt issues, particularly municipal bonds, which increased 38% to approximately $450 billion of face value. This represents 58% of the value of all municipal bonds outstanding in the United States.

Total depository pre-tax income was down $2.7 million, 47% from the previous year's result. In 1986, DTC made $2 million less than last year when they had increased shareholders' equity to mitigate business uncertainties. DTC, like all clearing agencies, adjusts refunds of fees and fee structures to earn funds to meet expenses and provide the amount of earnings which it wishes to retain.

The clearing corporations recorded an aggregate increase in pre-tax income of almost $3.8 million. NSCC posted pre-tax earnings of $6.5 million, up $3.2 million over 1985. The OCC recorded a significant decrease in pre-tax income of almost $1.2 million; most of this change was due to last year's one-time increase of over $1 million which was used to capitalize a new subsidiary, the Intermarket Clearing Corporation ("ICC"). OCC, through management of fees, reported a slight loss for the options operations while reporting a profit at ICC equal to ICC's loss of its initial year, 1985.

The Pacific Clearing Corporation ("PCC") incurred a pre-tax loss of over $300,000 after reporting a loss of $1.2 million in 1985. The Pacific Securities Depository Trust Company ("PSDTC") reported a pre-tax loss of $292,000 in 1986 versus a pre-tax operating gain of $189,000 the previous year. In 1986, PSE, the parent company, transferred revenues from equities trading to PCC and PSDTC in the amounts of $787,000 and $322,000, respectively, thus increasing service revenues. Further PSE support to its subsidiaries was provided by forgiving allocated administrative and financial services furnished by the parent to PCC and PSDTC in the amounts of $654,000 and $2.1 million respectively. The combined net worth of PCC and PSDTC further declined to $124,000 from $433,000 at the end of 1985. Subsequently, in April 1987, the Board of Directors of the PSE authorized the closure of those clearing and depository functions not essential to the operation of the PSE. The one-time cost of closure was projected to be between $5 and $7 million.

The aggregate net worth of all clearing corporations and depositories rose by $6 million to a new high of almost $39 million. In addition to the increase in net worth, participant clearing fund contributions which provide protection to the clearing agencies in the event of a participant default also increased. Should a participant default and its losses exceed its deposit, the entire participants' fund may be charged on a pro rata basis. However, no clearing agency has ever assessed non-failing participants' contributions. The equity clearing (participants') funds increased by 30% to $360 million. Depository clearing (participants') funds increased slightly to $223 million.

[1]Although efforts have been made to make the presentations comparable, any single revenue or expense category may not be completely comparable between any two clearing agencies because of (i) the varying classification methods employed by the clearing agencies in reporting operating results and (ii) the grouping methods employed by the Commission staff due to these varying classification methods

[2]The consolidated financial statements of NSCC includes the International Securities Clearing Corporation ("ISCC"), a wholly owned subsidiary of NSCC

[3]The Pacific Stock Exchange forgave PCC and PSDTC their allocated cost for administrative and financial services provided them by the PSE Had these charges not been forgiven, PCC and PSDTC's expenses would have been greater by $654,000 and $2,110,000, respectively. The PSE transfered revenue from equities trading to PCC and PSDTC to more equitably reflect the revenues earned by each line of the business, this increased service revenues by $787,000 and $322,000, respectively As a subsequent event, in April 1987, the Board of Governors of the PSE authorized the closure of PCC and PSDTC

[4]Revenues are net of refunds which have the effect of reducing a clearing agency's base fee rates.

EXEMPTIONS

Section 12(h) Exemptions

Section 12(h) of the Exchange Act authorizes the Commission to grant a complete or partial exemption from the registration provisions of Section 12(g) or from other disclosure and insider trading provisions of the Act where such exemption is consistent with the public interest and the protection of investors.

For the year beginning October 1, 1986, nine applications were pending and an additional six applications were filed during the year. All fifteen of these applications were granted. No applications were pending at the close of the year.

Exemptions For Foreign Private Issuers

Rule 12g3-2 provides various exemptions from the registration provisions of Section 12(g) of the Exchange Act for the securities of foreign private issuers. Perhaps the most important of these is that contained in subparagraph (b) which provides an exemption for certain foreign issuers which submit, on a current basis, the material specified in the rule. Such material includes that information about which investors ought reasonably to be informed and which the issuer: (l) has made public pursuant to the law of the country of domicile or in which it is incorproated or organized; (2) has filed with a foreign stock exchange on which its securities are traded and which was made public by such exchange; and or (3) has distributed to its security holders. Periodically, the Commission publishes a list of those foreign issuers which appear to be current under the exemptive provision. The most current list is as of April 30, 1988, and contains a total of 1,684 foreign issuers.

FINANCIAL INSTITUTIONS

There were 3,074 companies registered under the Investment Company Act of 1940 as of September 30, 1987. New registrations totaled 422 with 44 registrations terminated during the fiscal year. This compares with 1986 fiscal year figures of 2,583 total registrations, 299 new registrations and 47 terminations.

Table 14

COMPANIES REGISTERED UNDER THE INVESTMENT COMPANY ACT OF 1940 AS OF SEPTEMBER 30, 1987

	New Registrations	Terminations	Approximate Market Value of Assets of Active Companies (Billions)[1]
Management Open-End (Mutual Funds) (Non-Insurance Company)	343	50	$ 913
Management Closed-End:

Sub-Total	79	11	60
Unit Investment Trust (Non-Insurance Company)	83	13	125
Face Amount Certificates	0	0	2
Insurance Company, Both Open-End Management and Unit Investment Trust[2]	0	0	110
TOTALS for Fiscal 1987	505	74	$1,210

Total Number of Active Registered Investment Companies as of September 30, 1987: 3,305[3]

[1]The approximate market value of assets was calculated using various published services as well as staff estimates.

[2]Could also be selling pressure from insurance companies because they do not permit switching among the various types of investments (i.e., equity and debt).

[3]There are approximately 197 inactive companies registered. Inactive refers to registered companies which as of September 30, 1987, were in the process of being liquidated or merged, or have filed an application pursuant to Section 8(f) of the Act for deregistration, or which have otherwise gone out of existence and remain only until such time as the Commission issues an order under Section 8(f) terminating their registration.

SECURITIES ON EXCHANGES

Market Value and Share Volume

The market value of stocks, options, warrants and rights on registered exchanges totaled $1.9 trillion in calendar year 1986. Of this total, $1.7 trillion, or 91 percent, represented the market value of transactions in stocks, rights and warrants and $160.8 billion or nine percent in equity (including exercises) and non-equity options transactions. The value of equity/option transactions on the New York Stock Exchange (excluding exercises) was $1.5 trillion, up 42 percent from the previous year. The market value of such transactions rose 64 percent to $62.7 billion on the American Stock Exchange and increased 43 percent to $352.7 billion on all other exchanges. The volume of trading in stocks on all registered exchanges totaled 48.3 billion shares in calendar year 1986, a 30 percent increase over the previous year, with 81 percent of the total accounted for by trading on the New York Stock Exchange.

The volume of options contracts (including exercises) traded on options exchanges was 303.7 million contracts in calendar year 1986, 25% higher than in 1985. The market value of these contracts increased 49% to $160.8 billion. The volume of contracts (excluding exercises) executed on the Chicago Board Options Exchange increased 21 percent to 180.4 million; option trading on the American Stock Exchange rose 35 percent; Philadelphia Stock Exchange contract volume rose 35 percent; and Pacific Stock Exchange contract volume rose 10 percent.

NASDAQ (Volume and Market Value)

NASDAQ share volume and market value information for over-the-counter trading has been reported on a daily basis since November 1, 1971. At the end of 1986 there were 5,189 issues in the NASDAQ system. Volume for calendar year 1986 was 28.7 billion shares, up 39 percent from the 20.7 billion shares traded in the previous year. It was the highest volume in NASDAQ's 15-year history. This trading volume encompasses the number of shares bought and sold by market-makers plus their net inventory changes. The market value of shares traded in the NASDAQ system was $378.2 billion at the end of 1986, the highest ever.

Share and Dollar Volume by Exchange

Share volume in calendar year 1986 for stocks, rights and warrants on exchanges totaled 48.6 billion, an increase of 31 percent from the previous year. The New York Stock Exchange accounted for 81 percent of the 1986 share volume; the American Stock Exchange, six percent; the Midwest Stock Exchange, six percent; and the Pacific Stock Exchange, four percent.

The market value of stocks, rights and warrants traded was $1.7 trillion, 42 percent over 1985. Trading on the New York Stock Exchange contributed 85 percent of the total. The Midwest Stock Exchange and Pacific Stock Exchange contributed six percent and three percent, respectively. The American Stock Exchange accounted for three percent of dollar volume.

Value and Number of Securities Listed on Exchanges

The market value of stocks and bonds listed on U.S. exchanges at the end of 1986 was $3.7 trillion, an increase of 11 percent over 1985. The market value of stocks (common and preferred), was $2.2 trillion, an increase of 13 percent during 1986. The value of listed bonds increased 9 percent. Stocks with primary listing on the New York Stock Exchange had a market value of $2.1 trillion and represented 97 percent of the value of common and preferred stocks listed on registered exchanges. Those listed on the American Stock Exchange accounted for almost all of the remaining three percent of the total and were valued at $70.3 billion, an increase of 11 percent over the previous year.

Securities on Exchanges

As of September 30, 1987, a total of 7,909 securities, representing 3,145 issuers, were admitted to trading of securities exchanges in the United States. This compares with 7,891 issues, involving 3,133 issuers a year earlier. Over 5,600 issues were listed and registered on the New York Stock Exchange, accounting for 65.0 percent of the stock issues and 80.7 percent of the bond issues. Data below on "Securities Traded on Exchanges" involved some duplication since it includes both solely on dually listed securities.

Table 23
SECURITIES TRADED ON EXCHANGES

Spokane	20	40	—	3	43	3

[1]Issuers exempted under Section 3(a)(12) of the Act, such as obligations of U S Government, the states, and cities, are not included in this table.

Table 24
IMMOBILIZATION TRENDS

	1987	1986	1985	1984	1983	1982
Book-entry Deliveries at DTC (in thousands)	78,000	66,700	55,800	48,000	50,000	37,000
Total Certificates Withdrawn from DTC (in thousands)	10,000	9,200	9,100	10,100	13,600	12,500
Book-entry Deliveries per Certificate Withdrawn	7 8	7.3	6 1	4 8	3.7	3 0

Certificate Immobilization

Book-entry deliveries continued to outpace physical deliveries in the settlement of securities transactions among depository participants. This tendency is illustrated in Table 24, IMMOBILIZATION TRENDS. The Table captures the relative significance of the mediums employed, in a ratio of book-entry deliveries to certificates withdrawn from DTC. The figures exclude municipal bearer bonds. In 1987, while the number of shares traded in U.S. markets increased by 32%, the total certificates withdrawn from DTC increased less than 10%, and the ratio of book-entry deliveries to certificates withdrawn continued to grow. In 1987, the ratio was over two and a half times the 1982 figure of 3.0 book-entry deliveries rendered for every certificate withdrawn.

1933 ACT REGISTRATIONS

Effective Registration Statements

During fiscal year 1987, 5,914 registration statements valued at $454.7 billion became effective. In fiscal year 1986, 5,925 statements, valued at $484.4 billion, became effective.

Purpose and Type of Registration

Effective registrations for cash sale for the account of issuers in fiscal year 1987 amounted to $347.5 billion, a decline of 5 percent from fiscal year 1986's total of $364.0 billion. Of this amount, $106.9 billion were registrations for immediate, cash sale, an increase of $15.2 billion (17 percent) from fiscal year 1986's figure of $91.8 billion.

Of the $106.9 billion, debt securities accounted for $48.7 billion (46 percent), common stock and other equity accounted for $49.7 billion (46 percent) and preferred stock totalled $8.6 billion (8 percent).

Delayed and extended cash sales registered for the account of the issuer totalled $240.6 billion or 53 percent of all registrations. Of registrations for delayed sales, domestic securities accounted for $195.9 billion while foreign securities accounted for $10.6 billion. Registrations for extended sales came to $34.2 billion.

Securities registered for the account of the issuer for other than cash sales (e.g., for exchange offers) amounted to $88.4 billion or 19 percent of all registrations. Registrations of securities for secondary offerings amounted to $18.8 billion or 4 percent of the value of all registrations.

Registrations of all types were valued at $454.7 billion in fiscal year 1987. Of this total, $251.2 billion in bonds and other debt securities were registered. Another $181.2 billion of common stock and other equity were registered and preferred stock registrations totalled $22.3 billion. Of the $251.2 billion registered in debt, $48.7 billion (19 percent) were registered for primary, immediate cash sale and registrations for primary, delayed and extended cash sales accounted for $188.0 billion (75 percent). The total for preferred stock ($22.3 billion) included $13.9 billion registered for issuers for cash sale, $7.3 billion registered for issuers for other transactions and $1.2 billion registered for secondary offerings. Of the $181.2 billion of registrations for common stock and other equity securities, registrations for issuers for cash sale came to $97.0 billion, other registrations for issuers totalled $75.3 billion and registrations for secondary offerings were valued at $8.9 billion.

TYPES OF PROCEEDINGS

ADMINISTRATIVE PROCEEDINGS

Persons Subject to Acts Constituting, and Basis for, Enforcement Action	Sanction
Broker-dealer, municipal securities dealer, government securities dealer, transfer agent, investment adviser or associated person	
Willful violation of securities laws or rules; aiding or abetting such violation; failure reasonably to supervise others, willful misstatement or omission in filing with the Commission; conviction of or injunction against certain crimes or conduct.	Censure or limitation on activities, revocation, suspension or denial of registration, bar or suspension from association (1934 Act, Sections 15(b)(4)-(6), 15(c)(1)-(2), 15B(c)(2)-(6), 17A(c)(3), Advisers Act, Section 203(e)-(f))
Registered securities association	
Violation of or inability to comply with the 1934 Act, rules thereunder, or its own rules; unjustified failure to enforce compliance with the foregoing or with rules of the Municipal Securities Rulemaking Board by a member or person associated with a member	Suspension or revocation of registration, censure or limitation of activities, functions, or operations (1934 Act, Section 19(h)(1))
Member of registered securities association, or associated person	
Entry of Commission order against person pursuant to 1934 Act, Section 15(b); willfull violation of securities laws or rules thereunder or rules of Municipal Securities Rulemaking Board; effecting transaction for other person with reason to believe that person was committing violations of securities laws	Suspension or expulsion from the association; bar or suspension from association with member of association (1934 Act, Section 19(h) (2)-(30)).
National securities exchange	
Violation of or inability to comply with 1934 Act, rules thereunder or its own rules; unjustified failure to enforce compliance with the foregoing by a member or person associated with a member.	Suspension or revocation of registration; censure or limitation of activities, functions, or operations (1934 Act, Section 19(h)(1)).
Member of national securities exchange, or associated person	
Entry of Commission order against person pursuant to 1934 Act, Section 15(b), willful violation of securities laws or rules thereunder, effecting transaction for other person with reason to believe that person was committing violations of securities laws	Suspension or expulsion from exchange; bar or suspension from association with member (1934 Act, Section 19(h)(2)-(3))
Registered clearing agency	
Violation of or inability to comply with 1934 Act, rules thereunder, or its own rules; failure to enforce compliance with its own rules by participants	Suspension or revocation of registration; censure or limitation of activities, functions, or operations (1934 Act, Section 19(h)(1)).
Participant in registered clearing agency	
Entry of Commission order against participant pursuant to 1934 Act, Section 15(b)(4); willful violation of clearing agency rules; effecting transaction for other person with reason to believe that person was committing violations of securities laws.	Suspension or expulsion from clearing agency (1934 Act, Section 19(h)(2))

Securities information processor	
Violation of or inability to comply with provisions of 1934 Act or rules thereunder	Censure or limitation of activities; suspension or revocation of registration (1934 Act, Section 11A(b)(6))
Any person	
Willful violation of 1933 Act, 1934 Act, Investment Company Act or rules thereunder; aiding or abetting such violation, willful misstatement in filing with Commission.	Temporary or permanent prohibition against serving in certain capacities with registered investment company (Investment Company Act, Section 9(b)).
Officer or director of self-regulatory organization	
Willful violation of 1934 Act, rules thereunder or the organization's own rules, willful abuse of authority or unjustified failure to enforce compliance.	Removal from office or censure (1934 Act, Section 19(h)(4)).
Principal of broker-dealer	
Engaging in business as a broker-dealer after appointment of SIPC trustee.	Bar or suspension from being or becoming associated with a broker-dealer (SIPA, Section 10(b))
1933 Act registration statement	
Statement materially inaccurate or incomplete	Stop order refusing to permit or suspending effectiveness (1933 Act, Section 8(d))
Issuer subject to Sections 12, 13, 14 or 15(d) of the 1934 Act or associated person	
Failure to comply with such provisions or having caused such failure by an act or omission that person knew or should have known would contribute thereto.	Order directing compliance or steps effecting compliance (1934 Act, Section 15(c)(4)).
Securities registered pursuant to Section 12 of the 1934 Act	
Noncompliance by issuer with 1934 Act or rules thereunder	Denial, suspension of effective date, suspension or revocation of registration; prohibition against trading in securities when registration suspended or revoked (1934 Act, Section 12(j)).
Public interest requires trading suspension	Summary suspension of over-the-counter or exchange trading (1934 Act, Section 12(k))
Registered investment company	
Failure to file Investment Company Act registration statement or required report; filing materially incomplete or misleading statement or report	Suspension or revocation of registration (Investment Company Act, Section 8(e))
Company has not attained $100,000 net worth 90 days after 1933 Act registration statement became effective	Stop order under 1933 Act, suspension or revocation of registration (Investment Company Act, Section 14(a))
Attorney, accountant, or other professional or expert	
Lack of requisite qualifications to represent others; lacking in character or integrity, unethical or improper professional conduct; willful violation of securities laws or rules; or aiding and abetting such violation.	Permanent or temporary denial of privilege appearing or practicing before the Commission (17 CFR Section 201 2(e)(1)).

Attorney suspended or disbarred by court; expert's license revoked or suspended; conviction of a felony or of a misdemeanor involving moral turpitude.	Automatic suspension from appearance or practice before the Commission (17 CFR Section 201 2(e)(2)).
Permanent injunction against or finding of securities violation in Commission-instituted action; finding of securities violation by Commission in administrative proceedings.	Temporary suspension from practicing; censure; permanent or temporary disqualification from practicing before the Commission (17 CFR Section 201 2(e)(3))
Member of Municipal Securities Rulemaking Board	
Willful violation of 1934 Act, rules thereunder, or rules of the Board; abuse of authority	Censure or removal from office (1934 Act, Section 15B(c)(8)).

CIVIL PROCEEDINGS IN FEDERAL DISTRICT COURTS

Persons Subject to Acts Constituting, and Basis for, Enforcement Action	Sanction
Any person	
Engaging in or about to engage in acts or practices violating securities laws, rules or orders thereunder (including rules of a registered self-regulatory organization	Injunction against acts or practices which constitute or would constitute violations (plus other equitable relief under court's general equity powers) (1933 Act, Section 20(b), 1934 Act, Section 21(d), Holding Company Act, Section 18(f); Investment Company Act, Section 42(e); Advisers Act, Section 209(e); Trust Indenture Act, Section 321)
Noncompliance with provisions of the law, rule, or regulation under 1933, 1934, or Holding Company Act, order issued by Commission, rules of a registered self-regulatory organization, or undertaking in a registration statement.	Writ of mandamus, injunction, or order directing compliance (1933 Act, Section 20(c); 1934 Act, Section 21(e), Holding Company Act, Section 18(g)).
Trading while in possession of material non-public information in a transaction on an exchange or from or through a broker-dealer (and transaction not part of a public offering), or aiding and abetting such trading.	Maximum civil penalty three times profit gained or loss avoided as a result of transaction (1934 Act, Section 21(d))
Securities Investor Protection Corporation	
Refusal to commit funds or act for the protection of customers	Order directing discharge of obligations and other appropriate relief (SIPA, Section 7(b)).
National securities exchange or registered securities association	
Failure to enforce compliance by members or persons associated with its members with the 1934 Act, rules or orders thereunder, or rules of the exchange or association.	Writ of mandamus, injunction or order directing such exchange or association to enforce compliance (1934 Act, Section 21(e))
Registered clearing agency	
Failure to enforce compliance by its participants with its own rules.	Writ of mandamus, injunction or order directing clearing agency to enforce compliance (1934 Act, Section 21(e)).
Issuer subject to reporting requirements	
Failure to file reports required under Section 15(d) of 1934 Act	Forfeiture of $100 per day (1934 Act, Section 32(b))

Registered investment company

Name of company or of security issued by it deceptive or misleading	Injunction against use of name (Investment Company Act, Section 36(d))

Officer, director, member of advisory board, adviser, depositor, or underwriter of investment company

Engage in act or practice constituting breach of fiduciary duty involving personal misconduct	Injunction against acting in certain capacities for investment company and other appropriate relief (Investment Company Act, Section 36(a))

CRIMINAL PROSECUTION BY DEPARTMENT OF JUSTICE

Basis for Enforcement Action	Sanction or Relief
Any person

1987	142	376

Trading Suspensions

During fiscal year 1987, the Commission suspended trading in the securities of twelve companies. This compares with five in fiscal year 1986. In most instances, the trading suspension was ordered because of substantial questions as to the adequacy, accuracy or availability of public information concerning the company's financial condition or business operations, or because transactions in the company's securities suggested possible manipulation or other violations.

Foreign Restricted List

The Securities and Exchange Commission maintains and publishes a Foreign Restricted List which is designed to put broker-dealers, financial institutions, investors and others on notice of possible unlawful distributions of foreign securities in the United States. The list consists of names of foreign companies whose securities the Commission has reason to believe have been, or are being offered for public sale in the United States in possible violation of the registration requirement of Section 5 of the Securities Act of 1933. The offer and sale of unregistered securities deprives investors of all the protections afforded by the Securities Act of 1933, including the right to receive a prospectus containing the information required by the Act for the purpose of enabling the investor to determine whether the investment is suitable for him. While most broker-dealers refuse to effect transactions in securities issued by companies on the Foreign Restricted List, this does not necessarily prevent promotors from illegally offering such securities directly to investors in the United States by mail, by telephone, and sometimes by personal solicitation. The following foreign corporations and other foreign entities comprise the Foreign Restricted List.

1. Aguacate Consolidated Mines, Incorporated (Costa Rica)
2. Alan MacTavish, Ltd. (England)
3. Allegheny Mining and Exploration Company, Ltd. (Canada)
4. Allied Fund for Capital Appreciation (AFCA, S.A.) (Panama)

107. Yukon Wolverine Mining Company (Canada)

Right to Financial Privacy

Section 21(h) of the Securities Exchange Act of 1934 [15 U.S.C. 78u(h)(6)] requires that the Commission "compile an annual tabulation of the occasions on which the Commission used each separate subparagraph or clause of [Section 21(h)(21)] or the provisions of the Right to Financial Privacy Act of 1978 [12 U.S.C. 3401-22 (the RFPA)] to obtain access to financial records of a customer and include it in its annual report to the Congress."

During the fiscal year, the Commission made no applications to courts for orders pursuant to the subparagraphs and clauses of Section 21(h)(2) to obtain access to financial records of a customer. The table below sets forth the number of occasions upon which the Commission obtained accesss to the financial records of a customer using the procedures provided by (i) Section 1105 of the RFPA [12 U.S.C. 3405], applicable to administrative subpoenas; (ii) Section 1104 of the RFPA [12 U.S.C. 3404], applicable to customer consents; and (iii) Section 1107 of the RFPA [12 U.S.C. 3407], applicable to judicial subpoenas.

CORPORATE REORGANIZATIONS

During fiscal year 1987, the Commission entered its appearance in 32 reorganization cases filed under Chapter 11 of the Bankruptcy Code involving companies with aggregated stated assets of about $22.6 billion and close to 380,000 public investors including the Texaco Chapter 11 case with assets of $18.3 billion and about 275,000 public investors. Counting these new cases, the Commission was a party in a total of 133 Chapter 11 cases during the fiscal year In these cases the stated assets totalled approximately $42.1 billion and almost 1 million public investors were involved. During fiscal year 1987, 35 cases were concluded through confirmation of a plan of reorganization, dismissal, or liquidation, leaving 98 cases in which the Commission was a party at year-end.
